Fishes in Lagoons and Estuaries in the Mediterranean 3B Mohamed Hichem Kara, Jean-Pierre Quignard, 2019-07-30 Based on the most recent scientific data, and without neglecting historical publications, Fishes in Lagoons and Estuaries in the Mediterranean 3 comprehensively details Mediterranean lagoonal-marine migratory fish. It provides information regarding their systematics, ecobiology, ethology, genetics and their exploitation. This volume, third in a set of books on Mediterranean ichthyofauna, offers a synthesis of the knowledge acquired from 1890 to the present day for each of the 21 species most frequently found in Mediterranean lagoons and estuaries. These species are detailed across two volumes, 3A and 3B. The scientific data presented in this book concern their lagoon life as much as their marine life, and are therefore of particular interest for both the management of fish stocks and for the conservation of species. Designed to give rapid and comprehensive access to the body of knowledge on Mediterranean lagoonal and estuarine migratory fishes, this volume is for anyone involved in the use, management or protection of natural environments and their populations, including ecobiologists, geographers, engineers, teachers, students and researchers.

World Women in Mathematics 2018 Carolina Araujo, Georgia Benkart, Cheryl E. Praeger, Betül Tanbay, 2019-11-16 The first World Meeting for Women in Mathematics - (WM)2 - was a satellite event of the International Congress of Mathematicians (ICM) 2018 in Rio de Janeiro. With a focus on Latin America, the first (WM)2 brought together mathematicians from all over the world to celebrate women mathematicians, and also to reflect on gender issues in mathematics, challenges, initiatives, and perspectives for the future. Its activities were complemented by a panel discussion organized by the Committee for Women in Mathematics (CWM) of the International Mathematical Union (IMU) inside the ICM 2018 entitled "The gender gap in mathematical and natural sciences from a historical perspective". This historical proceedings book, organized by CWM in coordination with the Association for Women in Mathematics, records the first (WM)2 and the CWM panel discussion at ICM 2018. The first part of the volume includes a report of activities with pictures of the first (WM)2 and a tribute to Maryam Mirzakhani, the first woman to be awarded the Fields medal. It also comprises survey research papers from invited lecturers, which provide panoramic views of different fields in pure and applied mathematics. The second part of the book contains articles from the panelists of the CWM panel discussion, which consider the historical context of the gender gap in mathematics. It includes an analysis of women lecturers in the ICM since its inception. This book is dedicated to the memory of Maryam Mirzakhani.

Algebraic and Geometric Ideas in the Theory of Discrete Optimization Jesus A. De Loera, Raymond Hemmecke, Matthias K?ppe, 2012-01-01 This book presents recent advances in the mathematical theory of discrete optimization, particularly those supported by methods from algebraic geometry, commutative algebra, convex and discrete geometry, generating functions, and other tools normally considered outside the standard curriculum in optimization.

Moment and Polynomial Optimization Jiawang Nie, 2023-06-15 Moment and polynomial optimization is an active research field used to solve difficult questions in many areas, including global optimization, tensor computation, saddle points, Nash equilibrium, and bilevel programs, and it has many applications. The author synthesizes current research and applications, providing a systematic introduction to theory and methods, a comprehensive approach for extracting optimizers and solving truncated moment problems, and a creative methodology for using optimality conditions to construct tight Moment-SOS relaxations. This book is intended for applied mathematicians, engineers, and researchers entering the field. It can be used as a textbook for graduate students in courses on convex optimization, polynomial optimization, and matrix and tensor optimization.

Mixed Integer Nonlinear Programming Jon Lee, Sven Leyffer, 2011-12-02 Many engineering, operations, and scientific applications include a mixture of discrete and continuous decision variables and nonlinear relationships involving the decision variables that have a pronounced effect on the set of feasible and optimal solutions. Mixed-integer nonlinear programming (MINLP) problems combine the numerical difficulties of handling nonlinear functions with the challenge of optimizing in the context of nonconvex functions and discrete variables. MINLP is one of the most flexible modeling paradigms available for optimization; but because its scope is so broad, in the most general cases it is hopelessly intractable. Nonetheless, an expanding body of researchers and practitioners – including chemical engineers, operations researchers, industrial engineers, mechanical engineers, economists, statisticians, computer scientists, operations managers, and mathematical programmers – are interested in solving large-scale MINLP instances.

Les sacrifices dans l'Ancien Testament Guy Lasserre, 2022-01-12 Les sacrifices, tels que l'Ancien Testament en parle, ont disparu du culte chrétien et de la culture occidentale moderne. Ils sont devenus des pratiques étranges, cruelles et dépassées. Les textes bibliques qui les évoquent ou les prescrivent ne reçoivent plus guère d'attention. En dehors du langage religieux ou ethnologique, il reste quelques usages dans le langage courant pour évoquer des renoncements divers. Ces divers usages se sont éloignés du sens premier de ces pratiques et faussent notre compréhension de ce dont parle la Bible lorsqu'elle utilise le vocabulaire sacrificiel. Selon l'Ancien Testament, les sacrifices sont une pratique cultuelle essentielle et quotidienne. Les textes qui en parlent sont nombreux et divers. Cet ouvrage propose un parcours à travers l'Ancien Testament pour montrer les principaux traits des sacrifices et des rites cultuels auxquels ils appartiennent. Il s'adresse aux personnes intéressées par la Bible et disposées à une étude informée par l'exégèse moderne. Il cherche à présenter les résultats de la recherche qui semblent les plus probables et les plus actuels.
