*The Hawthorne School* Sylvie Perry, 2021-12-07 For fans of Riley Sager, *The Hawthorne School* is a twisty psychological suspense about the lengths one mother will go for her child, inspired by present-day obsession with cults and true crime. Claudia Morgan is overwhelmed. She's a single parent trying the best that she can, but her four-year-old son, Henry, is a handful--for her and for his preschool. When Claudia hears about a school with an atypical teaching style near her Chicagoland home, she has to visit. The Hawthorne School is beautiful and has everything she dreams of for Henry: time to play outside, music, and art. The head of the school, Zelma, will even let Claudia volunteer to cover the cost of tuition. The school is good for Henry: his behavioral problems disappear, and he comes home subdued instead of rageful. But there's something a bit off about the school, its cold halls, and its enigmatic headmistress. When Henry brings home stories of ceremonies in the woods and odd rules, Claudia's instincts tell her that something isn't quite right, and she begins to realize she's caught in a web of manipulations and power. The author's work as a psychotherapist, with a focus on

narcissistic manipulation and addictive power dynamics, guides this exploration of a young mother wanting to do the best for her child.

*My Leaf Book* Monica Wellington,2015-09-01 The brilliant colors of fall foliage take center stage in this picture book perfect for fans of the classic Red Leaf, Yellow Leaf. With her trademark bold, graphic style Monica Wellington has created a picture book about autumn, trees, and leaves. When the seasons change, a young girl visits the arboretum to collect fallen leaves and make a book with them. Brilliant illustrations show each variety of tree the girl encounters, from the common oak to the lesser known gingko. Spreads silhouetting leaves up-close help young children learn to identify them. Like the girl in the book, young readers will be eager to make their very own leaf books.

Look What I Did with a Leaf! Morteza E. Sohi,1995-09-01 Provides examples of different kinds of animals that can be made out of leaves and suggests various uses for the finished product.

*A Leaf Can Be . . .* Laura Purdie Salas,2022-08-01 Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! A leaf is a

leaf, a bit of a tree. But just try to guess what else it can be! A leaf can be a...shade spiller, mouth filler, tree topper, rain stopper. Find out about the many roles leaves play in this poetic exploration of leaves throughout the year. Laura Purdie Salas's lyrical, rhyming text and Violeta Dabija's glowing illustrations make simple yet profound observations about seemingly ordinary objects and encourage readers to suggest what else it can be! Using metaphors for a leaf (tree topper / rain stopper), a rock (hopscotch marker / fire sparker), and water (thirst quencher / kid drencher), these insightful picture books creatively highlight a variety of roles and relationships in nature.

The Leaf Book Ida Geary,1972-01-01

Red Leaf, Yellow Leaf Lois Ehlert,1991 Lois Ehlert uses watercolor collage and pieces of actual seeds, fabric, wire, and roots in this innovative and rich introduction to the life of a tree. A special glossary explains how roots absorb nutrients, what photosynthesis is, how sap circulates, and other facts about trees. Children will beg to share this book over and over.--American Bookseller

*Leaf* Stephen Michael King,2009-03-17 Strange things can happen when you're a kid who doesn't

want to get his hair cut.

The Gold Leaf Kirsten Hall,2017 When the forest animals find a gold leaf, they fight about who gets to have it.

Leaves David Ezra Stein,2007-08-16 It's a young bear's first autumn, and the falling leaves surprise him. He tries to put them back on the trees, but it doesn't work. Eventually, he gets sleepy and burrows into the fallen leaves for a long nap. When he wakes up, it's spring, and there are suddenly brand-new leaves all around, welcoming him. Graceful illustrations and a childlike main character offer the perfect way to talk with children about the wonder of the changing seasons.

The Book of Leaves Allen J. Coombes,2014-12-10 Of all our childhood memories, few are quite as thrilling, or as tactile, as those of climbing trees. Scampering up the rough trunk, spying on the world from the cool green shelter of the canopy, lying on a limb and looking up through the leaves at the summer sun almost made it seem as if we were made for trees, and trees for us. Even in adulthood, trees retain their power, from the refreshing way their waves of green break the monotony of a

cityscape to the way their autumn transformations take our breath away. In this lavishly illustrated volume, the trees that have enriched our lives finally get their full due, through a focus on the humble leaves that serve, in a sense, as their public face. The Book of Leaves offers a visually stunning and scientifically engaging guide to six hundred of the most impressive and beautiful leaves from around the world. Each leaf is reproduced here at its actual size, in full color, and is accompanied by an explanation of the range, distribution, abundance, and habitat of the tree on which it's found. Brief scientific and historical accounts of each tree and related species include fun-filled facts and anecdotes that broaden its portrait. The Henry's Maple, for instance, found in China and named for an Irish doctor who collected leaves there, bears little initial resemblance to the statuesque maples of North America, from its diminutive stature to its unusual trifoliolate leaves. Or the Mediterranean Olive, which has been known to live for more than 1,500 years and whose short, narrow leaves only fall after two or three years, pushed out in stages by the emergence of younger leaves. From the familiar friends of our backyards to the giants of deep woods, The Book of Leaves brings the forest to life—and to our living

rooms—as never before.

*Leaf Man* Lois Ehlert, 2005 Fall has come, the wind is gusting, and Leaf Man is on the move. Is he drifting east, over the marsh and ducks and geese? Or is he heading west, above the orchards, prairie meadows, and spotted cows? No one's quite sure, but this much is certain: A Leaf Man's got to go where the wind blows. With illustrations made from actual fall leaves and die-cut pages on every spread that reveal gorgeous landscape vistas, here is a playful, whimsical, and evocative book that celebrates the natural world and the rich imaginative life of children. Includes an author's note and leaf-identifying labels.

*The Life of a Leaf* Steven Vogel, 2012-10-17 In its essence, science is a way of looking at and thinking about the world. In *The Life of a Leaf*, Steven Vogel illuminates this approach, using the humble leaf as a model. Whether plant or person, every organism must contend with its immediate physical environment, a world that both limits what organisms can do and offers innumerable opportunities for evolving fascinating ways of challenging those limits. Here, Vogel explains these

interactions, examining through the example of the leaf the extraordinary designs that enable life to adapt to its physical world. In Vogel's account, the leaf serves as a biological everyman, an ordinary and ubiquitous living thing that nonetheless speaks volumes about our environment as well as its own. Thus in exploring the leaf's world, Vogel simultaneously explores our own. A companion website with demonstrations and teaching tools can be found here:

**Leaf Jumpers** Carole Gerber, 2006-07-01 This vibrant poem celebrates the beauty of autumn while inviting us all to go ahead and jump in that big, colorful, pile of fall leaves. Leslie Evan's bold artwork brings together gold, orange, yellow, red, and brown leaves into a literary pile creating the magic of autumn for young readers. The poetic text gives simple facts about different types of fall leaves making it easy for readers to identify leaves ranging from red maple to sycamore by color, shape, and other characteristics. Informative and fun, Carole Gerber brings us a wonderful introduction to seasons and science for the earliest of leaf jumpers.

*Tree By Leaf* Cynthia Voigt, 2008-06-19 It's not fair that Clothilde's father has returned from World War I so disfigured that he retreats to the boathouse as a recluse. It's not fair that her brother has abandoned the family to live with his rich grandfather in Boston. It's not fair that her mother has reverted to the role of a lady, leaving Clothilde to do all the housework. And it's certainly not fair that the Maine peninsula that Clothilde inherited from a great-aunt may have to be sold to support the family. Then a mysterious Voice speaks to Clothilde, giving her the chance to change the life fate has dealt her and the people she loves. But Clothilde's wishes come true in unexpected, frightening ways - - and at a price she isn't sure she has the courage to pay.

House of Leaves Mark Z. Danielewski, 2000-03-07 "A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an

odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

The Leaf Detective Heather Lang, 2021-02-09 This picture book biography tells the story of Meg

Lowman, a groundbreaking female scientist called a real life Lorax by National Geographic, who was determined to investigate the marvelous, undiscovered world of the rainforest treetops. Meg Lowman was always fascinated by the natural world above her head – the colors, the branches, and, most of all, the leaves and mysterious organisms living there. Meg set out to climb up and investigate the rain forest tree canopies – and to be the first scientist to do so. But she encountered challenge after challenge. Male teachers would not let her into their classrooms, the high canopy was difficult to get to, and worst of all, people were logging and clearing the forests. Meg never gave up or gave in. She studied, invented, and persevered, not only creating a future for herself as a scientist, but making sure that the rainforests had a future as well. Working closely with Meg Lowman, author Heather Lang and artist Jana Christy beautifully capture Meg's world in the treetops.

As a child this chosen one touches the heart of the Leaf People who will shelter and save him. While on a camping trip with his family Philip has gotten lost in the woods and unprepared for the snow which falls overnight or a hungry wolf looking for food. Philip is in great danger. How can the Leaf People rescue the helpless child and reunite him with his family and instill in a young child the love and wonders of our friends in nature? These Friends whom we have long ignored and now have forgotten are waiting for the Chosen one who they will save but in turn they will also be saved by him. This selfless act will fulfill the prophecy of the chosen one. Could this child be the one?

All Is Leaf John T Price, 2022-06-08 Drawing inspiration and urgency from the storied Goethe Oak tree at Buchenwald concentration camp—and from the leaf as symbol of all change, growth, and renewal—award-winning essayist John Price explores a multitude of dramatic transformations, in his life

and in the fragile world beyond: “the how of the organism—that keeps your humanity alive.” He employs an array of forms and voices, whether penning a break-up letter to America or a literary rock-n-roll road song dedicated to prairie scientists, or giving pregame pep talks to his son’s losing football team. Here, too, are moving portrayals of his father’s last effort as a small-town lawyer to defend the rights of abused women, and his own efforts as a writing teacher to honor the personal stories of his students. From his Iowa backyard to the edge of the Arctic Circle, from the forgotten recesses of the body to the far reaches of the solar system, this book demonstrates the ways imagination and informed compassion can, as Price describes it, expand thousandfold the boundaries of what we might “have naïvely considered an individual self.”
