Lesbian Sperm Tales Molly Miller,2006-04-13

Queering Reproduction Laura Mamo,2007-08-13 Originally developed to help heterosexual couples, fertility treatments such as in vitro fertilization and sperm donation have provided lesbians with new methods for achieving pregnancy during the past two decades. Queering Reproduction is an important sociological analysis of lesbians' use of these medical fertility treatments. Drawing on in-depth interviews with lesbians who have been or are seeking to become pregnant, Laura Mamo describes how reproduction has become an intensely medicalized process for lesbians, who are transformed into fertility patients not (or not only) because of their physical conditions but because of their sexual identities. Mamo argues that this medicalization of reproduction has begun to shape queer subjectivities in both productive and troubling ways, destabilizing the assumed link between heterosexuality and parenthood while also reinforcing traditional, heteronormative ideals about motherhood and the imperative to reproduce. Mamo provides an overview of a shift within some lesbian communities from low-tech methods of self-insemination to a reliance on outside medical intervention and fertility treatments. Reflecting on the issues facing lesbians who become parents through assisted reproductive technologies, Mamo explores questions about the legal rights of co-parents, concerns about the genetic risks of choosing an anonymous sperm donor, and the ways decisions to become parents affect sexual and political identities. In doing so, she investigates how lesbians navigate the medical system with its requisite range of fertility treatments, diagnostic categories, and treatment trajectories. Combining moving narratives and insightful analysis, Queering Reproduction reveals how medical technology reconfigures social formations, individual subjectivity, and notions of kinship.

Mediated Kinship Rikke Andreassen,2018-08-22 Illustrating the fascinating intersections of online media and new kinship, this book presents a study of the increasing numbers of single women and lesbian couples reproducing by using donor sperm. It explores how they connect with each other online, develop intimate digital communities and, most importantly, locate their children's hitherto unknown biological half-siblings, throughout the world. The author discusses how these new families - consisting of only mothers - engage in extended families involving large numbers of 'donor siblings'. The new families challenge previous understandings of kinship, and provide illustrations of how norms of gender, sexuality and family are challenged, negotiated and maintained in contemporary times. A crucial study of contemporary formations of family, gender and race, Mediated Kinship discusses the racial aspects of the world's largest sperm bank exporting Danish sperm (termed 'Viking sperm'), and explores the narratives of whiteness and imagined racial superiority that circulate among mothers, as well as the racialisations accompanying commercial online sperm sales. By analysing contemporary families of donor-conceived children in the context of legislation, reproduction technologies and online media, the book will appeal to scholars across the social sciences with interests in race and ethnicity, whiteness, gender, sexuality, kinship and the sociology of the family.

The Ultimate Guide to Pregnancy for Lesbians Rachel Pepper,2008-09-05 The Ultimate Guide to Pregnancy for Lesbians covers everything you need to make the thrilling and challenging journey to motherhood: from choosing a donor to tracking fertility to signing the right papers on the dotted lines. Rachel Pepper's lively, easy-to-read guide is the first place to go for up-to-date information and sage advice on everything from sex in the sixth month to negotiating family roles. Why a second edition? When the acclaimed first edition appeared, the author's daughter was only a few months old. This new edition takes into account the parenting know-how Pepper has developed over the intervening six years, as well as the evolving legal status of lesbian parents, and the increasing importance of the Internet for information on fertility, sperm banks, and donors. The resource section is greatly expanded, as are the sections on each trimester of pregnancy, on childbirth, and on life with a newborn. And Pepper provides more insight into preconception planning for both single lesbians and couples. An indispensable resource, The Ultimate Guide to Pregnancy for Lesbians is now bigger and better.

A Donor Insemination Guide Marie Mohler,Lacy Frazer,2002 Conceiving a child together is an act of love. But when doctors, medical staff, sperm banks, donors and a deep-freeze get in on the act, it can become stressful. A DONOR INSEMINATION GUIDE smoothes the way by sharing the experiences of other lesbian women who have successfully conceived using donor insemination, revealing what many doctors don't tell you about the practical details and emotional aspects of this intimate process, including: the pros and cons of known and unknown donors, donor methods, emotional effects on the relationship and legal and medical advice.

Baby Steps Amy Agigian,2004 Explores the controversial implications of lesbian insemination.

Beyond Expectation Jacquelyne Luce,2010-04-02 An in-depth study of lesbian, bi, and queer women's experiences of thinking about and trying to become a parent, Beyond Expectation draws on eighty-two narrative interviews conducted during the late 1990s in British Columbia. Jacquelyne Luce chronicles these women's experiences, which took place from 1980 to 2000, during a period that saw significant changes to the governance of assisted reproduction and the status of lesbian, gay, bisexual, and transgender parents and same-sex partners. Beyond Expectation looks closely at the changing contexts in which women's experiences occurred and draws attention to complex issues such as 'contracting' relationships, mediating understandings of biology and genetics, and decision-making amidst various social, legal, and medical developments. Luce skillfully juxtaposes the stories of her interviewees with the wider public discourses about lesbian/bi/queer parenting and reproductive technology and highlights gaps in existing legislative reforms. Most importantly, Beyond Expectation foregrounds the lived experiences of lesbian, bi, and queer women as they negotiate kinship at the intersection of reproduction, technology, and politics.

Transforming Law's Family Fiona Kelly,2011-05-15 In Transforming Law's Family, Fiona Kelly explores the complex issues encountered by planned lesbian families as they work to define their parental rights, roles, and family structures within the tenets of family law. While Canadian courts recognize lesbian parenthood in some circumstances, a number of issues that are largely unique to planned lesbian families ♦ such as the legal status of known sperm donors and non-biological mothers ♦ remain undefined. Drawing on interviews with lesbian mothers, Fiona Kelly illuminates the changing definitions of family and suggests a model for law reform that would enable the legal recognition of alternative forms of parentage.

Lesbian Family Life, Like the Fingers of a Hand Valory Mitchell,2013-09-13 In this book, an array of approaches - first person and theoretical accounts, clinical understandings, qualitative and quantitative research - are brought to bear on controversial or under-discussed topics in lesbian family life. From conception all the way to care for elderly parents, this book takes a fresh look at lesbian family relationships. Topics include: butch/femme couples, infidelity, the psychological meaning of family for lesbians, age-

discrepant couples, lesbian nuns as family, Listservs as family, intentional family for aging women, women raising sons, mothers who come out late in life, mothers and children in situations of domestic violence, lack of support for lesbian domestic violence survivors, death of a partner, psychological issues in the use of sperm donors or surrogates, and middle-aged lesbians caring for homophobic elderly parents. Some authors use self psychology and Jungian psychology to describe aspects of family life. The richness and diversity of topics makes it a text on lesbian lives. Therapists and academics from throughout the U.S. have contributed to this collection. Many lesbian women, as well as teachers (it can be a text) and mental health professionals who work with children, families, couples and elderly will find useful material here. This book was published as a special issue of the Journal of Lesbian Studies.

Romancing the Sperm Diane Tober, 2018-11-30 In this book Tober explores the intersections between sperm donation and the broader social and political environment in which modern families are created and regulated. The book provides information on family and kinship, genetics and eugenics, and how ever-expanding assisted reproductive technologies continue to redefine what it means to be human.

Buying Dad Harlyn Aizley, 2003 Harlyn Aizley takes the reader on one of the most personal, intimate and utterly female journeys any woman, gay or straight, can make - that of becoming a mother. Aizley's story begins with the search for sperm. The journey unfolds within the context of her relationship with her female partner, her mother's cancer diagnosis, the threat of her own possible infertility, and finally pregnancy itself. Aizley's wry voice and candid prose embrace this confluence of major life events with humour and wisdom.

The Family of Woman Maureen Sullivan, 2004-09-06 Amidst the shrill and discordant notes struck in debates over the make-up—or breakdown—of the American family, the family keeps evolving. This book offers a close and clear-eyed look into a form this change has taken most recently, the lesbian coparent family. Based on intensive interviews and extensive firsthand observation, *The Family of Woman* chronicles the experience of thirty-four families headed by lesbian mothers whose children were conceived by means of donor insemination. With its intimate perspective on the interior dynamics of these families and its penetrating view of their public lives, the book provides rare insight into the workings of emerging family forms and their significance for our understanding of family—and our culture itself.

Sperm Counts Lisa Jean Moore, 2008-10-01 2007 Choice Outstanding Academic Title Winner of the Passing the Torch Award from the Center for Lesbian and Gay Studies It has been called sperm, semen, seed, cum, jizz, spunk, gentlemen's relish, and splooge. But however the “tacky, opaque liquid that comes out of the penis” is described, the very act of defining “sperm” and “semen” depends on your point of view. For Lisa Jean Moore, how sperm comes to be known is based on who defines it (a scientist vs. a defense witness, for example), under what social circumstances it is found (a doctor's office vs. a crime scene), and for what purposes it will be used (in vitro fertilization vs. DNA analysis). Examining semen historically, medically, and culturally, *Sperm Counts* is a penetrating exploration of its meaning and power. Using a “;follow that sperm” approach, Moore shows how representations of sperm and semen are always in flux, tracing their twisting journeys from male reproductive glands to headline news stories and presidential impeachment trials. Much like the fluid of semen itself can leak onto fabrics and into bodies, its meanings seep into our consciousness over time. Moore's analytic lens yields intriguing observations of how sperm is “spent” and “reabsorbed” as it spurts, swims, and careens through penises, vaginas, test tubes, labs, families, cultures, and politics. Drawn from fifteen years of research, *Sperm Counts* examines historical and scientific documents, children's “facts of life” books, pornography, the Internet, forensic transcripts and sex worker narratives to explain how semen got so complicated. Among other things, understanding how we produce, represent, deploy and institutionalize semen-biomedically, socially and culturally—provides valuable new perspectives on the changing social position of men and the evolving meanings of masculinity. Ultimately, as Moore reveals, sperm is intimately involved in not only the physical reproduction of males and females, but in how we come to understand ourselves as men and women.

Lesbian Mothers Ellen Lewin, 2018-03-15 Within a society that long considered lesbian motherhood a contradiction in terms, what were the experiences of lesbian mothers at the end of the twentieth century? In this illuminating book, lesbian mothers tell their stories of how they became mothers; how they see their relationships with their children, relatives, lovers, and friends and with their children's fathers and sperm donors; how they manage child-care arrangements and financial difficulties; and how they deal with threats to custody. Ellen Lewin's unprecedented research on lesbian mothers in the San Francisco area captured a vivid portrait of the moment before gay and lesbian parenting moved into the mainstream of U.S. culture. Drawing on interviews with 135 women, Lewin provided her readers with a new understanding of the attitudes of individual women, the choices they made, and the texture of their daily lives.
