Pop, Sizzle, Boom! Amy Oyler, 2017-06-13 Pop Sizzle Boom is a kid-friendly collection of 101 highly interactive science experiments designed to engage elementary school aged children, encourage their natural curiosity, and transform them into scientists who love to question the world around them. Kids will love baking cookie continents to learn about tectonic plates, experimenting with liquid dyes to find out about acids and bases, mixing together sticky magma candy (which they can later eat!) to discover the properties of rocks, and watching an egg get swallowed by a bottle thanks to the laws of air pressure. Simple, step-by-step instructions with photos or line drawings accompany each popping, sizzling, and booming experiment to ease parents and kids through the process of inquiry and discovery. Everyday ingredients from your cabinets and recycle bins are all that's needed to set the stage for the next awe-inspiring demonstration. This book covers a wide range of topics including biology, chemistry, and physics and provides kid-speak explanations so kids can learn as they play.

47 Easy-to-Do Classic Science Experiments Eugene F. Provenzo, Asterie Baker Provenzo, 2012-07-31 Here is a highly motivating book for grade-school students that will introduce them to many of the world's most popular (and historically significant) scientific experiments. They'll learn about gravity simply by following the acrobatic antics of an ordinary coin. By trying to blow an egg out of a cup, they'll discover the principles of air pressure. Dancing soap bubbles will help them understand the effects of static

electricity, and by dropping quarters into a full glass of water without causing it to overflow, they'll study the effects of surface tension. These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics, inertia, air pressure, magnetism, sound, topology, light, density, vibration, prisms, elasticity, gases, vacuum, perspective, geometry, centrifugal force, buoyancy, color, and much more. Some experiments, such as the optical Newton's Rings are hundreds of years old. Still others, like the straw lever test, are based on Greek experiments with leverage and the center of gravity – first carried out thousands of years ago. Easy-to-follow instructions and illustrations show youngsters how to perform each experiment, most of which are prefaced with historical background, a list of necessary materials and an explanation of key terms. Almost all experiments can be carried out with common household items (tissue paper, scissors, tapes, rubber balloons, pens, pencils, etc.) and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science-curriculum unit. Sources for all historical illustrations given in the text are listed at the end of the book.

71 Science Experiments VIKAS KHATRI,2012-11-15 A study of science and scientific theories and laws is almost incomplete without relevant and methodical Experiments. In fact Experiments are an inseparable part of any Scientific Study or Research. In this book, the author has tried to simplify science to the readers, particularly the school going students through easy and interesting experiments. All the experiments given in the book are based on some scientific phenomena or other such as atmospheric pressure high and low temperatures boiling freezing and melting points of solids liquids and gases gravitational force magnetism electricity solubility of substances etc. Thus read each of these fun - filled experiments and carry it out in your homes or schools under the supervision and guidance of your teachers, parents or elders. The language used in the book is simple and all the experiments have been illustrated with relevant diagrams and methodical steps strictly based on scientific facts. So children, grab this book as fast as you can to satisfy your scientific curiosities by performing these incredible experiments and learning science with fun. #v&spublishers
