Decline of the Corporate Community Eelke M. Heemskerk,2007 Traditionally, much of big business in the industrialized Western world has been organized around particular corporate societies—notoriously referred to as “old boy” networks. With the recent drift toward a more liberal market economy, however, these networks have been showing signs of decline—in some cases, all but disappearing. Eelke M. Heemskerk combines formal network analysis and interviews with key members of the corporate elite in order to examine how this decline has affected Dutch capitalism. Even in a liberal market economy, however, corporate directors need social networks to communicate and coordinate their strategic decisions, and Decline of the Corporate Community considers the shift of the corporate elite to the new private and informal circles where networking takes place.

Foundations of Security Christoph Kern, Anita Kesavan, Neil Daswani, 2007-05-11 Software developers need to worry about security as never before. They need clear guidance on safe coding practices, and that’s exactly what this book delivers. The book does not delve deep into theory, or rant about the politics of security. Instead, it clearly and simply lays out the most common threats that programmers need to defend against. It then shows programmers how to make their defense. The book takes a broad focus, ranging over SQL injection, worms and buffer overflows, password security, and more. It sets programmers on the path towards successfully defending against the entire gamut of security threats that they might face.

Analysis of Multiple Dependent Variables Patrick Dattalo, 2013-03-14 Multivariate procedures allow social workers and other human services researchers to analyze complex, multidimensional social problems and interventions in ways that minimize oversimplification. This pocket guide provides a concise, practical, and economical introduction to four procedures for the analysis of multiple dependent variables: multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multivariate multiple regression (MMR), and structural equation modeling (SEM). Each procedure will be presented in a way that allows readers to compare and contrast them in terms of (1) appropriate research context; (2) required statistical assumptions, including levels of measurement of variables to be modeled; (3) analytical steps; (4) sample size; and (5) strengths and weaknesses. This invaluable guide facilitates course extensibility in scope and depth by allowing instructors to supplement course content with rigorous statistical procedures. Detailed annotated examples using Stata, SPSS (PASW), SAS, and Amos, together with additional resources, discussion of key terms, and a companion website, make this an unintimidating guide for producers and consumers of social work research knowledge.

The Substance of Style Virginia Postrel, 2009-03-17 Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Sustainable Strategic Management Jean Garner Stead,W. Edward Stead,2017-09-08 “Sustainable strategic management” refers to strategic management policies and processes that seek competitive advantages consistent with a core value of environmental sustainability.This book has been specifically written as a text to augment traditional graduate and undergraduate management courses on strategic management. It fills the need for a strategy text that gives full attention to sustainability and environmental protection. The authors have structured the book to follow the usual order of topics in any standard management text. Sustainable Strategic Management also features an on-going, chapter-by-chapter case study (Eastman Chemical Company) that exemplifies many of the principles of environmentally sound management practices.From creating organizational visions, to formulating goals and strategies, to strategy implementation and evaluation, this book provides readers with new ways of thinking about their organization’s role in the greater society and ecosystem. From the Authors’ Preface:Ours is the first book to integrate sustainability into strategic management. It covers the full gamut of strategic management concepts and processes that would be expected in any quality strategic management book, and it does so in a way that thoroughly weaves sustainability into each and every one of them. Students using this book understand such things as: why reducing materials and energy intensity is an effective functionallevel strategy, why socially differentiated products command premium prices, and why a business ecosystem pursuing a vision of social and ecological responsibility can dominate its market. Further, because the book is relatively short, reasonably priced, and very thorough in its coverage of strategic management concepts and ideas, it can be used either as a stand-alone text for graduate and undergraduate strategic management courses, as a supplement to another book, or as one of a group of short texts.

This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. African Footballers in Europe Ernest Yeboah Acheampong,Malek Bouhaouala,Michel Raspaud,2019-09-30 African Footballers in Europe traces the social and economic evolution of African football and examines the strategies and resources that players mobilise in their migrations, with a particular focus on ‘Give Back Behaviours’ (how players contribute to their countries or communities of origin). It shines new light on contemporary migrations, labour markets in sport, and processes of development in Africa. Using a multidisciplinary approach and Weberian methodology to analyse players’ 'Give Back' behaviour, the book highlights the complex rationale behind this behaviour, based on a combination of social, cultural, and economic elements. It features interviews with former and current African professional players, providing a vivid picture of the role of communities in players’ migration projects, the allure of the European football market, and investment initiatives that can contribute to local and regional development. This is a vital read for academics, researchers, and students of sport sciences, sociology of sport, sport management, sociology, geography, political sciences, management, sociology of Africa, migration studies, sociology of the labour market, and economic sociology. It is also an important resource for professional organisations, NGOs, football agents, football administrators, federations, confederations, and governments.
