Ignition! John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as "a good book on rocket stuff…that's a really fun one" by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

Rules and Reasoning Stefania Costantini,Enrico Franconi,William Van Woensel,Roman Kontchakov,Fariba Sadri,Dumitru Roman,2017-07-03 This book constitutes the proceedings of the International Joint Conference on Rules and Reasoning, RuleML+RR 2017, held in London, UK, during July 2017. This is the first conference of a new series, joining the efforts of two existing conference series, namely "RuleML" (International Web Rule Symposium) and "RR" (Web Reasoning and Rule Systems). The 16 regular papers presented together with 2 keynote abstracts were carefully reviewed and selected from 29 submissions. The RR conference series has been a forum for discussion and dissemination of new results on all topics concerning Web Reasoning and Rule Systems, with an emphasis on rule-based approaches and languages. The RuleML conference series has been devoted to disseminating research, applications, languages and standards for rule technologies, with attention to both

theoretical and practical developments, to challenging new ideas and industrial applications. Both series of conferences aimed at building bridges between academia and industry in the field of rules and their applications. Therefore, RuleML+RR is expected to become a leading conference for all subjects concerning theoretical advances, novel technologies, and innovative applications about knowledge representation and reasoning with rules. This new joint conference provides a valuable forum for stimulating cooperation and cross-fertilization between the many different communities focused on the research, development and applications of rule-based systems. It provides the possibility to present and discuss applications of rules and reasoning in academia, industry, engineering, business, finance, healthcare and other application areas.

  King Lear Jeffrey Kahan,2008-04-18 Is King Lear an autonomous text, or a rewrite of the earlier and anonymous play King Leir? Should we refer to Shakespeare's original quarto when discussing the play, the revised folio text, or the popular composite version, stitched together by Alexander Pope in 1725? What of its stage variations? When turning from page to stage, the critical view on King Lear is skewed by the fact that for almost half of the four hundred years the play has been performed, audiences preferred Naham Tate's optimistic adaptation, in which Lear and Cordelia live happily ever

after. When discussing King Lear, the question of what comprises 'the play' is both complex and fragmentary. These issues of identity and authenticity across time and across mediums are outlined, debated, and considered critically by the contributors to this volume. Using a variety of approaches, from postcolonialism and New Historicism to psychoanalysis and gender studies, the leading international contributors to King Lear: New Critical Essays offer major new interpretations on the conception and writing, editing, and cultural productions of King Lear. This book is an up-to-date and comprehensive anthology of textual scholarship, performance research, and critical writing on one of Shakespeare's most important and perplexing tragedies. Contributors Include: R.A. Foakes, Richard Knowles, Tom Clayton, Cynthia Clegg, Edward L. Rocklin, Christy Desmet, Paul Cantor, Robert V. Young, Stanley Stewart and Jean R. Brink
