*The Concept of State Aid Under EU Law* Juan Jorge Piernas López,2015 An analysis of the evolution of the legal concept of State aid in the EU, this book examines the main formulas established by the Court of Justice of the EU since the early 1950s, underpinning the legal boundaries of State aid in relation to the historical, political, economic, and legal evolution of its field of application: the internal market.

South-East Europe Design Automation, Computer Engineering, Computer Networks and Social Media Conference ,2017 The conference scope includes the Design Automation, CAD tools for chip design, formal methods, verification, computer engineering, computer networks and telecommunications and Social Media.

**Developments in Services of General Interest** Erika Szyszczak,Jim Davies,Mads Andenæs,Tarjei Bekkedal,2011-05-18 This is the third book in the series Legal Issues of Services of General Interest. The book focuses upon a set of research questions on the recent developments in the emergence of services of general interest (SGIs) as a distinct EU concept. This includes, inter alia, the emergence of universal service obligations and the way they are regulated in the EU in primary and secondary law, the range of soft law communications adopted by the Commission to create a distinctive EU concept of SGIs, the residual role of hard law in the Treaty on the Functioning of the European Union (TFEU), the special problems created by Social Services of General Economic Interest and the interaction of procurement and state aid law with SGIs. A new perspective is offered in this book: some of the issues faced by the EU in accommodating SGIs into a regulatory framework are found also in the policy of the WTO and in least developed countries (LDCs).

*Museums, Objects, and Collections* Susan Pearce,2017-08-15 This book examines the historical context of museums, their collections, and the objects that form them. Susan M. Pearce probes the psychological and social reasons that people collect and identifies three modes of collecting: collecting as souvenirs, as fetishes, and as systematic assemblages. She considers how museum professionals set policies of collection management; acquire, study, and exhibit objects; and make meaning of the objects in their care. Pearce also explores the ideological relationship between museums and their collections and the intellectual and social relationships of museums to the public.

Ordoliberalism, Law and the Rule of Economics Josef Hien,Christian Joerges,2017-12-28 Ordoliberalism is a theoretical and cultural tradition of significant societal and political impact in post-war Germany. For a long time the theory was only known outside Germany by a handful of experts, but ordoliberalism has now moved centre stage after the advent of the financial crisis, and has become widely perceived as the ideational source of Germany's crisis politics. In this collection, the contributors engage in a multi-faceted exploration of the conceptual history of ordoliberalism, the premises of its founding fathers in law and economics, its religious underpinnings, the debates over its theoretical assumptions and political commitments, and its formative vision of societal ordering based upon a synthesis of economic theories and legal concepts. The renewal of that vision

through the ordoliberal conceptualisation of the European integration project, the challenges of the current European crisis, and the divergent perceptions of ordoliberalism within Germany and by its northern and southern EU neighbours, are a common concern of all these endeavours. They unfold interdisciplinary affinities and misunderstandings, cultural predispositions and prejudices, and political preferences and cleavages. By examining European traditions through the lens of ordoliberalism, the book illustrates the diversity of European economic cultures, and the difficulty of transnational political exchanges, in a time of European crisis.

**The Oxford Handbook of Classics in Public Policy and Administration** Steven J. Balla, Martin Lodge, Edward Page, 2015 This Handbook brings together a collection of leading international authors to reflect on the influence of central contributions, or classics, that have shaped the development of the field of public policy and administration. The Handbook reflects on a wide range of key contributions to the field, selected on the basis of their international and wider disciplinary impact. Focusing on classics that contributed significantly to the field over the second half of the 20th century, it offers insights into works that have explored aspects of the policy process, of particular features of bureaucracy, and of administrative and policy reforms. Each classic is discussed by a leading international scholar. They offer unique insights into the ways in which individual classics have been received in scholarly debates and disciplines, how classics have shaped evolving research agendas, and how the individual classics continue to shape contemporary scholarly debates. In doing so, this volume offers a novel approach towards considering the various central contributions to the field. The Handbook offers students of public policy and administration state-of-the-art insights into the enduring impact of key contributions to the field.

**Public Policy Praxis** Randy S. Clemons, Mark K. McBeth, 2020-03-03 Public administration and policy analysis education have long emphasized tidiness, stages, and rationality, but practitioners frequently must deal with a world where objectivity is buffeted by, repressed by, and sometimes defeated by value conflict. Politics and policy are messy and power explains much more about the policy process than does rationality. Public Policy Praxis, now in a thoroughly revised fourth edition, uniquely equips students to better grapple with ambiguity and complexity. By emphasizing mixed methodologies, the reader is encouraged, through the use of a wide variety of policy cases, to develop a workable and practical model of applied policy analysis. Students are given the opportunity to try out these globally applicable analytical models and tools in varied case settings (e.g., county, city, federal, international, plus urban and rural) while facing wide-ranging topics (starving farmers and the red panda in Nepal, e-cigarettes, GMOs, the gig economy, and opioid abuse) that capture the diversity and reality of public policy analysis and the intergovernmental and complex nature of politics. The fourth edition expands upon its thorough exploration of specific tools of policy analysis, such as stakeholder mapping, content analysis, group facilitation, narrative analysis, cost-benefit analysis, futuring, and survey analysis. Along with teaching how to, the authors discuss the limitations, the practical political problems, and the ethical problems associated with different techniques and methodologies. Many new cases have been added, along with clear instructions on how to do congressional research and a Google Trends analysis. An expanded online Teaching Appendix is included for adopters, offering original cases, answers to problems, alternative approaches to case use, teaching exercises, student assignments, pedagogical ideas, and supplemental material directly tied to concepts covered in the text. With an easily accessible and conversational writing style, Public Policy Praxis is an ideal textbook for undergraduate and graduate courses in public policy analysis, community planning, leadership, social welfare policy, educational policy, family policy, and special seminars.

**Contested Cities and Urban Activism** Ngai Ming Yip, Miguel Angel Martínez López, Xiaoyi Sun, 2018-10-13 This edited volume advances our understanding of urban activism beyond the social movement theorization dominated by thesis of political opportunity structure and resource mobilization, as well as by research based on experience from the global north. Covering a diversity of urban actions from a broad range of countries in both hemispheres as well as the global north and global south, this unique collection notably focuses on non-institutionalised or localised urban actions

that have the potential to bring about radical structural transformation of the urban system and also addresses actions in authoritarian regimes that are too sensitive to call themselves “movement”. It addresses localized issues cut off from international movements such as collective consumption issues, like clean water, basic shelter, actions against displacement or proper venues for street vendors, and argues that the integration of the actions in cities in the global south with the specificity of their local social and political environment is as pivotal as their connection with global movement networks or international NGOs. A key read for researchers and policy makers cutting across the fields of urban sociology, political science, public policy, geography, regional studies and housing studies, this text provides an interdisciplinary and international perspective on 21st century urban activism in the global north and south.

*Public Policy Praxis--theory and Pragmatism* Randall S. Clemons, Mark K. McBeth, 2001 For courses in Public Policy and Policy Analysis. This readable and conceptual approach to public policy carefully balances theory and practice-unlike most other texts, which either lack theory or lack practicality. The authors combine positivist and postpositivist perspectives on policy analysis, supported by interesting and useful teaching cases. Fully classroom tested, the text material explores the political basis of policy making and analysis, with a careful eye toward students' practical needs. Models and tools are provided, along with the analytical knowledge necessary for policy analysis. Carefully structured chapters offer instructors maximum ease and flexibility in the classroom.

*The Dynamics of the Breakthrough in Eastern Europe* Jadwiga Staniszkis, 2023-11-10 Understanding the dramatic political, social, and economic changes that have taken place in Poland in the mid-1980s is one key to predicting the future of the communist bloc. Jadwiga Staniszkis, an influential, internationally known expert on contemporary trends in Eastern Europe, provides an insider's analysis that deserves the attention of all scholars interested in the region. Staniszkis presents the breakthrough of 1989 as a consequence not only of systemic contradictions within socialism but also of a series of chance events. These events include unique historical circumstances such as the emergence of the globalist faction in Moscow, with its new, world-system perception of crisis, and the discovery of the round-table technique as a productive ritual of communication, imitated all over Eastern Europe. After describing the development, collapse, and reorganization of a new center in Poland in 1989-1990, she discusses the first attempt at privatizing the economy. Her analysis of the dilemmas accompanying breakthrough and transition is an invaluable guide to the challenges that face both capitalism and democracy in Eastern Europe.

**The Policy Process** Stuart S. Nagel, 1999 Since the passage of national welfare reform legislation in the areas of welfare, employment, health and social services have been changing rapidly. This book discusses many of the different changes that these policies have gone through in recent years as well as the shift of responsibility toward state and local government for these changes. It is divided into: Part One: Federal, State and Local Relations; Part Two: Executive, Legislative and Judicial Relations; Part Three: The Group Struggle; Part Four: Public Values; Part Five: Democracy With Resistance.

**Preservation Microfilming** Association of Research Libraries, 1996 This guide presents information on planning and managing microfilming projects, incorporating co-operative programmes, service bureaux and the impact of automation for library staff with deteriorating collections.

*Advances in Artificial Intelligence* Marie-Jean Meurs, Frank Rudzicz, 2019-05-21 This book constitutes the refereed proceedings of the 32nd Canadian Conference on Artificial Intelligence, Canadian AI 2019, held in Kingston, ON, Canada, in May 2019. The 27 regular papers and 34 short papers presented together with 8 Graduate Student Symposium papers and 4 Industry Track papers were carefully reviewed and selected from 132 submissions. The focus of the conference was on artificial intelligence research and advanced information and communications technology.

Following a piloting process where over 350 stakeholders participated, an earlier prototype of the list was revised and translated into a tool to support AI developers and deployers in developing Trustworthy AI. The tool supports the actionability the key requirements outlined by the Ethics Guidelines for Trustworthy Artificial Intelligence (AI), presented by the High-Level Expert Group on AI (AI HLEG) presented to the European Commission, in April 2019. The Ethics Guidelines introduced the concept of Trustworthy AI, based on seven key requirements: human agency and oversight technical robustness and safety privacy and data governance transparency diversity, non-discrimination and fairness environmental and societal well-being and accountability Through the Assessment List for Trustworthy AI (ALTAI), AI principles are translated into an accessible and dynamic checklist that guides developers and deployers of AI in implementing such principles in practice. ALTAI will help to ensure that users benefit from AI without being exposed to unnecessary risks by indicating a set of concrete steps for self-assessment. Download the Assessment List for Trustworthy Artificial Intelligence (ALTAI) (.pdf) The ALTAI is also available in a web-based tool version. More on the ALTAI web-based tool:
