### **Plato and Aristotle's Ethics** Robert

Heinaman, 2017-03-02 This volume, emanating from the Fourth Keeling Colloquium in Ancient Philosophy, presents essays and comments by nine outstanding scholars of ancient philosophy, which examine the influence of Plato on

the development of Aristotle's ethics. The essays focus on the role of pleasure in happiness and the good life (Christopher Taylor and Sarah Broadie), the irreducibility of ethical concepts to value-neutral concepts (Anthony Price and Sarah Broadie), the relation of virtue to happiness (Roger Crisp and Christopher Rowe, Terry Irwin and Sir Anthony Kenny), the role of the requirement of self-sufficiency in determining the content of happiness (John Cooper and Sir Anthony Kenny), and the question of whether the just man should be a participant in the political life of his city (Richard Kraut and Christopher Rowe).

**Ajax in Action** Eric Pascarello,Dave Crane,Darren James,2005-09-30 Val's BlogA tremendously useful field guide specifically written for developers down in the trenches...waiting for the killer solution... Web users are getting tired of the traditional web experience. They get frustrated losing their scroll position; they get annoyed waiting for refresh; they struggle to reorient themselves on every new page. And the list goes on. With asynchronous JavaScript and XML, known as Ajax, you can give them a better experience. Once users have experienced an Ajax interface, they hate to go back. Ajax is new way of thinking that can result in a flowing and intuitive interaction with the user. Ajax in Action helps you implement that thinking--it explains how to distribute the application between the client and the server (hint: use a nested MVC design) while retaining the integrity of the system. You will learn how to ensure your app is flexible and maintainable, and how good, structured design can help avoid problems like browser incompatibilities. Along the way it helps you unlearn many old coding habits. Above all, it opens your mind to the many advantages gained by placing much of the processing in the browser. If you are a web developer who has prior experience with web technologies, this book is for you. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

*Data Warehousing and Knowledge Discovery* Alfredo Cuzzocrea,Umeshwar Dayal,2011-08-19 This book

constitutes the refereed proceedings of the 13th International Conference on Data Warehousing and Knowledge Discovery, DaWak 2011 held in Toulouse, France in August/September 2011. The 37 revised full papers presented were carefully reviewed and selected from 119 submissions. The papers are organized in topical sections on physical and conceptual data warehouse models, data warehousing design methodologies and tools, data warehouse performance and optimization, pattern mining, matrix-based mining techniques and stream, sensor and time-series mining.

*Making Globally Distributed Software Development a Success Story* Qing Wang, Dietmar Pfahl, David Raffo, 2008-05-06 This volume contains papers presented at the International Conference on Software Process (ICSP 2008) held in Leipzig, Germany, during May 10-11, 2008. ICSP 2008 was the second conference of the ICSP series. The theme of ICSP 2008 was "Making Globally Distributed Software Development a Success Story." Software developers work in a dynamic context of frequently changing technologies and with limited resources. Globally distributed development teams are under increasing pressure to deliver their products more quickly and with higher levels of quality. At the same time, global competition is forcing software development organizations to cut costs by rationalizing processes, outsourcing part of or all development activities, reusing existing software in new or modified applications, and evolving existing systems to meet new needs, while still minimizing the risk of projects failing to deliver. To address these difficulties, new and modified processes are emerging, including agile methods and plan-based product line development. Open Source, COTS, and community-developed software are becoming more and more popular. Outsourcing coupled

with 24/7 development demands well-defined processes to support the coordination of organizationally—and geographically—separated teams. The accepted papers present completed research or advanced work-in-progress in all areas of software and systems development process including: agile software processes, CMMI, novel techniques for software process representation and analysis; process tools and metrics; and the simulation and modeling of software processes. Contributions reflecting real-world experience, or derived directly from industrial or open-source software development and evolution, were particularly welcome.

**Simple Lie Algebras Over Fields of Positive Characteristic: Structure theory** Helmut Strade,2004

The problem of classifying the finite-dimensional simple Lie algebras over fields of characteristic  $p > 0$  is a long-standing one. Work on this question during the last 45 years has been directed by the Kostrikin-Shafarevich Conjecture of 1966, which states that over an algebraically closed field of characteristic  $p > 5$  a finite-dimensional restricted simple Lie algebra is classical or of Cartan type. This conjecture was proved for  $p > 7$  by Block and Wilson in 1988. The generalization of the Kostrikin-Shafarevich Conjecture for the general case of not necessarily restricted Lie algebras and  $p > 7$  was announced in 1991 by Strade and Wilson and eventually proved by Strade in 1998. The final Block-Wilson-Strade-Premet Classification Theorem is a landmark result of modern mathematics and can be formulated as follows: Every finite-dimensional simple Lie algebra over an algebraically closed field of characteristic  $p > 3$  is of classical, Cartan, or Melikian type. In the three-volume book, the author is assembling the proof of the Classification Theorem with explanations and references. The goal is a state-of-the-art account on the structure and classification theory of Lie algebras over fields of positive characteristic leading to the forefront of current research in this field. This first volume is devoted to preparing the

ground for the classification work to be performed in the second and third volume. The concise presentation of the general theory underlying the subject matter and the presentation of classification results on a subclass of the simple Lie algebras for all odd primes make this volume an invaluable source and reference for all research mathematicians and advanced graduate students in algebra.
