More Technology for the Rest of Us Nancy D. Courtney,2010-02-26 In this valuable book, 11 chapters each overview a technology of interest to librarians working in the field today. From cloud computing to data curation to open-source software, the world of technology offers great opportunity—and potential frustration. Nancy Courtney and her team of IT experts have set out to enhance the former and alleviate the latter. More Technology for the Rest of Us: A Second Primer on Computing for the Non-IT Librarian follows up on Courtney's 2005 technology volume by tackling the most recent advances in IT. Each chapter describes a technology important to the library field, explains how it works in terms a non-IT professional can understand, and describes its uses. The essays in More Technology for the Rest of Us are not meant to make readers experts, but to provide a basic introduction to some of the current technologies impacting libraries and their patrons. Articles are brief and clearly written, and computer jargon is defined and explained. Each chapter lists references for further information, and there is a selected

bibliography and glossary at the end of the book.

Bachelors of a different sort John Potvin,2021-01-07 The bachelor has long held an ambivalent, uncomfortable and even at times unfriendly position in society. This book carefully considers the complicated relationships between the modern queer bachelor and interior design, material culture and aesthetics in Britain between 1885 and 1957. The seven deadly sins of the modern bachelor (queerness, idolatry, askesis, decadence, the decorative, glamour and artifice) comprise a contested site and reveal in their respective ways the distinctly queer twinning of shame and resistance. It pays close attention to the interiors of Lord Ronald Gower, Alfred Taylor, Oscar Wilde, Charles Shannon and Charles Ricketts, Edward Perry Warren and John Marshall, Sir Cedric Morris and Arthur Lett-Haines, Noël Coward and Cecil Beaton. Richly illustrated and written in a lively and accessible manner, Bachelors of a different sort is at once theoretically ambitious and rich in its use of archival and various historical sources.

<u>The Oxford Handbook of Megaproject Management</u> Bent Flyvbjerg,2017-06-01 The Oxford Handbook of Megaproject Management provides state-of-the-art scholarship in the emerging field of megaproject management. Megaprojects are large, complex projects which typically cost billions of dollars and impact millions of people, like building a high-speed rail line, a megadam, a national health or pensions IT system, a new wide-body aircraft, or staging the Olympics. The book contains 25 chapters written especially for this volume, covering all aspects of megaproject management, from front-end planning to actual project delivery, including how to deal with stakeholders, risk, finance, complexity, innovation, governance, ethics, project breakdowns, and scale itself. Individual chapters cover the history of the field and relevant theory, from behavioral economics to lock-in and escalation to systems integration and theories of agency and power. All geographies are covered - from the US to China, Europe to Africa, South America to Australia - as are a wide range of project types, from hard infrastructure to soft change projects. In-depth case studies illustrate salient points. The Handbook offers a rigorous, research-oriented, up-to-date academic view of the discipline, based on high-quality data and strong theory. It will be an indispensable resource for students, academics, policy makers, and practitioners.

Sort Your Head Out Sam Delaney,2023-02-09 'An honest, funny account of how we're all capable of changing for the better' SETH MEYERS 'A great, motivating book that can really help - every bloke should read it' SHAUN RYDER Sam Delaney was Jack the Lad. He was confident, loud and funny; an absolute legend, to be honest. Or at least that was what he pretended to be. But when he reached his thirties, work, relationships and fatherhood started to take their toll. Like so many blokes who seemed to be totally fine, he often felt like a complete failure whose life was out

of control; anxiety and depression had secretly plagued him for years. Turning to drink and drugs only made things worse. Sam knew he needed help - the problem was that he thought self-help was for hippies, sobriety was for weirdos and therapy was for neurotics. Keeping it all inside was what nearly dragged Sam under. Then he began to open up and share his story with others. Soon his life started to get better and better. Now, he's written this book to help you do the same. Covering his complex upbringing, fast paced career, struggles with addiction and recovery, and detailing lessons he's learnt along the way, Sort Your Head Out is Sam's startlingly raw, compassionate and hilarious account of why opening up is the first step to sorting your head out.

Managing Online Forums Patrick O'Keefe,2008-04-21 Every day, millions of users log on to their favorite online forums and interact with others to get advice and discuss everything from the latest news and trends to their hobbies, professions, and whatever else strikes their fancy. Administrators have to lead these communities, deal with difficult users, and choose moderators. Legal constraints, spammers, and technical issues can turn the excitement of running an online community into chaos. With the right guidance, however, running forums can be a pleasure. Patrick O'Keefe has spent years developing and managing online communities. Now, he shows readers how to make the right decisions about every aspect of their forums, including: • choosing a name and domain name • picking the right software • deciding on user options like avatars and private messaging • setting guidelines and dealing with violators • ensuring that posts stay on topic • settling online disputes among users • involving users and keeping the site interesting Managing Online Forums is the one book that shows site owners and administrators how to create a safe and entertaining community that users will return to again and again.

Out of Sorts Sarah Bessey,2015-11-03 From the popular

blogger and provocative author of Jesus Feminist comes a riveting new study of Christianity that helps you wrestle with—and sort out—your faith. In Out of Sorts, Sarah Bessey—award-winning blogger and author of Jesus Feminist, which was hailed as "lucid, compelling, and beautifully written" (Frank Viola, author of God's Favorite Place on Earth)—helps us grapple with core Christian issues using a mixture of beautiful storytelling and biblical teaching, a style well described as "narrative theology." As she candidly shares her wrestlings with core issues—such as who Jesus is, what place the Church has in our lives, how to disagree yet remain within a community, and how to love the Bible for what it is rather than what we want it to be—she teaches us how to walk courageously through our own tough questions. In the process of gently helping us sort things out, Bessey teaches us how to be as comfortable with uncertainty as we are with solid answers. And as we learn to hold questions in one hand and answers in the other, we discover new depths of faith that will remain secure even through the storms of life.

Societal Security and Crisis Management Per Lægreid,Lise H. Rykkja,2018-07-25 This book studies governance capacity and governance legitimacy for societal security and crisis management. It highlights the importance of building organizational capacity by focusing on the coordination of public resources and underscores the relevance of legitimacy by emphasizing the importance of public perceptions, attitudes, and trust vis-à-vis government arrangements for crisis management. The authors explore several cases and identify relevant dimensions concerning performance, capacity and legitimacy across different countries. It is an ideal volume for audiences interested in public administration, public policy, crisis management and security studies.

Autonomic Computing Manish Parashar,Salim Hariri,2018-10-03 The complexity of modern computer networks and systems, combined with the extremely dynamic environments in which they operate, is beginning to outpace our ability to manage them. Taking yet another page from the biomimetics playbook, the autonomic computing paradigm mimics the human autonomic nervous system to free system developers and administrators from performing and overseeing low-level tasks. Surveying the current path toward this paradigm, Autonomic Computing: Concepts, Infrastructure, and Applications offers a comprehensive overview of state-of-the-art research and implementations in this emerging area. This book begins by introducing the concepts and requirements of autonomic computing and exploring the architectures required to implement such a system. The focus then shifts to the approaches and infrastructures, including control-based and recipe-based concepts, followed by enabling systems, technologies, and services proposed for achieving a set of self-* properties, including self-configuration, self-healing, self-optimization, and self-protection. In the final section, examples of real-world

implementations reflect the potential of emerging autonomic systems, such as dynamic server allocation and runtime reconfiguration and repair. Collecting cutting-edge work and perspectives from leading experts, Autonomic Computing: Concepts, Infrastructure, and Applications reveals the progress made and outlines the future challenges still facing this exciting and dynamic field.

Finance, Budget, and Management for Reference Services Ruth A. Fraley,Bill Katz,2019-12-06 The library budget, a topic of primary importance to the reference librarian, is thoroughly examined in this book, first published in 1988. Experts offer insightful suggestions for reference librarians to understand and take responsibility for budget issues, directly and indirectly. They address the ability to explain the budget - which actually entails explaining the collection, the services, and the process in place for managing the fiscal resources - a necessary skill for any reference librarian faced with looming budget cuts. Providing quality services on a limited budget is also explored. The contributors provide helpful essays on convincing the parent agency to provide adequate support, setting goals and priorities, generating revenue, and more.
