Tribes of the Everstorm , 2023-12-12 Running through the storm Donic found himself thinking back on his life, never knowing family or connection, partly his reason for venturing beyond his confined existence. Knowing he would need to seek the connection he yearned for outside his dome city. Pelastus. Dome 016. Even as the Razor rain lashed at his suit and visor, creating streaks across his vision, he could clearly see his companion in front of him. A dweller of the After Glass, an outlander, Katrice. Her grace and form were so precise. Leaving nothing to chance in each of her dynamic movements. Her strength and speed a constant source of admiration, bringing back memories of his time in the dome. The monotony, the repetition. Every day he would wake up to the same routine, his level of advancement and the unrelenting want for his attention; granted him some level of diversity in the tasks he performed, but nothing like the world out here. It was uncertain, unformed, chaotic. Yet he would not change any of it. Grateful even for the near-death experiences as they led him here, with her.

A History of Cyber Literary Criticism in China Ouyang Youquan, 2023-08-18 This is the first scholarly attempt to write a history of cyber literary criticism in China. The author uses the Internet as the departure point, literature as the horizontal axis, and criticism as the vertical axis, to draw a detailed trajectory of the development of cyber literary criticism in China. The book comprises two parts. The first part focuses on the representation of historical facts about cyber literary criticism, covering five topics: the evolution of cyber literary criticism in the context of the new media; major types of cyber literary critics and their criticism; academic achievements in cyber literary studies; the form, contents, and rhetorical expressions of so-called netizens' critical commentaries; and important events in the history of cyber literary criticism. The second part discusses the historical changes in literary criticism as responses to cyber literature, covering another five topics: the conceptual transformation in literary criticism of the Internet era; the establishment of evaluation criteria for cyber literature; changes in the function of cyber literary criticism; changes in the constitution of cyber literary critics; and the impact of cyber literary criticism. This book will be an essential read to students and scholars of East Asian Studies, literary criticism, and those who are interested in cyber literature in general.

Application of Frequency and Risk in Water Resources V.P. Singh, 2012-12-06
Floods constitute a persistent and serious problem throughout the United States and many other parts of the world. They are responsible for losses amounting to billions of dollars and scores of deaths annually. Virtually all parts of the nation--coastal, mountainous and rural--are affected by them. Two aspects of the problem of flooding that have long been topics of scientific inquiry are flood frequency and risk analyses. Many new, even improved, techniques have recently been developed for performing these analyses. Nevertheless, actual experience points out that the frequency of say a 100-year flood, in lieu of being encountered on the average once in one hundred years, may be as little as once in 25 years. It is therefore appropriate to pause and ask where we are, where we are going and where we ought to be going with regard to the technology of flood frequency and risk analyses. One way to address these questions is to provide a forum where people from all quarters of the world can assemble, discuss and share their experience and expertise pertaining to flood frequency and risk analyses. This is what constituted the motivation for organizing the International Symposium on Flood Frequency and Risk Analyses held May 14-17, 1986, at Louisiana State University, Baton Rouge, Louisiana.

Encyclopedia of Islands Rosemary Gillespie, David Clague, 2009-08-19 Islands have captured the imagination of scientists and the public for centuries--unique and rare environments, their isolation makes them natural laboratories for ecology and evolution. This authoritative, alphabetically arranged reference, featuring more than 200 succinct articles by leading scientists from around the world, provides broad coverage of all the island sciences. But what exactly is an island? The volume editors define it here as any discrete habitat isolated from other habitats by inhospitable surroundings. The Encyclopedia of Islands examines many such insular settings--oceanic and continental islands as well as places such as caves, mountaintops, and whale falls at the bottom of the ocean. This essential, one-stop resource, extensively illustrated with color photographs, clear maps, and graphics will introduce island science to a wide audience and spur further research on some of the planet's most fascinating habitats.

Shadow of the Dome. John Moore, 2023-11-12 In search of destiny, two paths intersect. Finding light in a time of darkness. In search of her mother's promise. Discover meaning or face his end. In the year 2052, the Dome Initiative was introduced. Put in place after a worldwide pandemic cost the lives of around 17% of the human population. Fear of another pandemic and the promise of economic stability should the repeat occur, cities worldwide began constructing glass domes over their cities. A newly created, flexible, almost

indestructible glass, allowed for the creation of immense glass structures. Though all fell short in scale to a City Dome. Twenty kilometres wide, allowing the city space to grow within. Outside the world's eco system collapsed creating weather upheaval and food shortages. A new pandemic spread as the population outside the domes fell into crisis. Civilization began to collapse. In a radical decision two mandates were put in place. One was a specially created genetic inoculation to the pandemic now sweeping the globe. The second was isolating the inoculated population inside the domes to protect them from not only the deteriorating environment but attacks from outside. Now five hundred years later and the effects of the genetic manipulation are truly apparent. Effecting the body's ability to produce certain chemicals, specifically the ones responsible for desire and attraction. Safe within their dome's life has stagnated as the world outside is forgotten. No longer do people seek love or connection. All now is discovery, what one can learn, invent. or achieve. Though outside life is not as dead as the dome dwellers think. Life still clings to existence and may hold the key to the world's salvation.
