Social Media Storms Pernille Rydén, Muhammad Ismail Hossain, Efthymia Kottika, Vatroslav Škare, 2021-08-25 This fascinating new book explores the benefits and dynamics of social media storms and identifies the possible opportunities that they present for further engagement with customers. It provides actionable managerial advice on planning for, measuring, and innovatively navigating social media storms. Based on a sound theoretical background and illustrated by vivid real-life examples and case studies throughout every chapter, this book combines thorough explanations of the elements of business decision-making, market interaction, consumer psychology, branding, and business communication. In comparison to the existing literature, the book departs from the classical, but insufficient crisis communication management approaches to suggest novel frameworks and tools for empowering businesses, consumers, and broader societies in the digital age. *Social Media Storms: Empowering Leadership Beyond Crisis Management* provides advanced undergraduate and postgraduate digital marketing, marketing communications, strategy, and crisis management students with a comprehensive understanding of the social media storm phenomenon and helps marketing and communications professionals to leverage the opportunities that social media storms are bringing.

Organisational Responses to Social Media Storms Andy Phippen, Emma Bond, 2020-07-06 This book explores the growing phenomenon of the social media storm in the context of educational establishments. With a methodological approach that draws on aspects of virtual and offline ethnography, the text presents a series of case studies of public online risk-related incidents. Our ethnographic methodology adopts the use of unobtrusive data collection approaches, to explore publicly available data from online interactive behaviours. Drawing on a range of methods from internet mediated research (IMR) to inform our ethnographic account, the book provides an in-depth exploration of the public and organisational discourses arising from four short, clear high-profile internet risk case studies in the education sector ranging from early year to higher education. It considers the social construction of a new 'risk' culture arising computer-mediated social interactions and its impact on, and response by, the organisations and society.

From Media Hype to Twitter Storm Peter Vasterman, 2018 The word media hype is often used as rhetorical argument to dismiss waves of media attention as overblown, disproportional and exaggerated. But these explosive news waves, as well as - nowadays - the twitter storms, are object of scientific research, because they are an important phenomenon in the public area. Sometimes it is indeed 'much ado about nothing' but in many cases these media storms have played an important role in political issues, scandals and crises. Twitter storms sometimes ruin reputations within hours. Although different concepts are used, such as media hypes, news waves, media storms, information cascades or risk amplification, all the studies in this book refer to the same process in which key events trigger a chain of reactions and interactions, building up huge news waves in the media or rapidly spreading social epidemics in the social media.

From Media Hype to Twitter Storm Peter Vasterman, 2018-02-26 This anthology offers the first comprehensive overview of media hype, a phenomenon often dismissed as ephemeral and unimportant. Despite that reputation, media storms

actually do play an important role in political issues, scandals, and crises, sometimes creating an important shift in public opinion over the course of only a few hours. This book provides an overview of theoretical, conceptual, and methodological issues related to media hype through close explorations of case studies from around the world.

Internet in the Post-Soviet Area Sergey Davydov, 2023-07-10 This book offers a comparative perspective on the technological, economic, and political aspects of Internet development in the post-Soviet countries. In doing so, international experts analyze similarities and differences in various countries throughout the chapters. The volume consists of two parts. The chapters of the first part examine the post-Soviet area as a whole. The second part includes specific case studies on the development of the Internet, either in individual countries or in groups of countries. Countries analyzed are Estonia, Ukraine, Russia as well as three Central Asian countries: Kazakhstan, Uzbekistan and Tajikistan. Topics covered in the volume include, but are not limited to measurement, dynamics, and structure of each national Internet audience; the history of the Internet in the post-Soviet countries; development of infrastructure; Internet regulation and institutional aspects; online markets such as telecommunications, online advertising, e-commerce, and digital content; social and cultural aspects; as well as the transformation of the national media systems. This book is a must-read for students, researchers, and scholars of political science and economics, as well as policymakers and practitioners interested in a better understanding of Internet development in the post-Soviet area.

The Media, the Court, and the Misrepresentation Rorie Spill Solberg, Eric N. Waltenburg, 2014-12-02 The Court's decisions are interpreted and disseminated via the media. During this process, the media paints an image of the Court and its business. Like any artist, the media has license regarding what to cover and the amount of attention devoted to any aspect of the Court and its business. Some cases receive tremendous attention, while others languish on the back pages or are ignored. These selection effects create a skewed picture of the Court and its work, and might affect public attitudes toward the Court. Indeed, studies of media coverage of other governmental institutions reveal that when, and how, their policy decisions are covered has implications for the public's understanding of, compliance with, support for, and cynicism about the policy. This book uncovers and describes this coverage and compares it to the confirmation hearings, the Court's actual work, even its members. Rorie Spill Solberg and Eric N. Waltenburg analyze media coverage of nominations and confirmation hearings, the justices' extra-curricular activities and their retirements/deaths, and the Court's opinions, and compare this coverage to analyses of confirmation transcripts and the Court's full docket. Solberg and Waltenburg contend that media now cover the Court and its personnel more similarly to its coverage of other political institutions. Journalists still regurgitate a mythology supported by the justices, a cult of the robe, wherein unbiased and apolitical judges mechanically base their decisions upon the law and the Constitution. Furthermore, they argue the media also focus on the cult of personality, wherein the media emphasize certain attributes of the justices and their work to match the public's preferences for subject matter and content. The media's

portrayal, then, may undercut the Court's legitimacy and its reservoir of good will.

Policy Analysis in the United States Hird, John A., 2018-03-21 Policy Analysis in the United States brings together contributions from some of the world's leading scholars and practitioners of public policy analysis including Beryl Radin, David Weimer, Rebecca Maynard, Laurence Lynn, and Guy Peters. This volume represents an indispensable companion to other volumes in the International Library of Policy Analysis series, enabling scholars to compare cross-nationally concepts and practices of public policy analysis in the media, sub-national governments, and many more institutional settings. The volume represents an invaluable contribution to public policy analysis and can be used widely in teaching at both graduate and undergraduate levels in schools of public affairs and public policy as well as in comparative politics and policy.

Organizational Crisis Communication Finn Frandsen, Winni Johansen, 2016-10-19 When a crisis breaks out, it's not always just the organization that reacts - the news media, customers, employees, trade associations, politicians, activist groups, and PR experts may also respond. This book offers a new and original perspective on crisis communication based on the theory of the Rhetorical Arena and the so-called multivocal approach. According to this approach, we gain a more dynamic and complex understanding of organizational crises if we focus not only on the communication produced by the organization but also take into account the many other voices who start communicating when a crisis breaks out. It provides: An in-depth overview of the five key dimensions of organizational crises, crisis management and crisis communication A comprehensive introduction to the theory of the Rhetorical Arena and the multivocal approach to crisis communication, including some of the most important voices inside the arena A series of important international case studies and case examples in each chapter. Suitable for students studying crisis communication modules on corporate communication, public relations, and management and organization studies courses.

Fake News: Western Media's Fabricated Reporting on China Maxime Vivas, 2023-05-01 In his book, Maxime Vivas, provides an objective description of China's development and achievements, drawing from his own experiences and perspectives. He critiques the false propaganda disseminated by Western media and systematically rebuts their vilification of China. The author exposes the manipulation and suppression of authentic voices by the French media,

revealing the underlying mechanisms and social atmosphere that fuel Western media's dissemination of false information. Consequently, the book points out that Western minds have been colonized by American propaganda and ensnared in a self-imposed cycle of isolation due to the barriers created by Western media. The author's narrative approach is captivating, seamlessly interweaving elements such as historical accounts, personal anecdotes, factual evidence, and logical reasoning.

British Muslims and Their Discourses Laurens de Rooij, 2024-01-17 This book highlights the changing dynamics of Muslim identity and integration in Britain, focusing on the post-9/11 era. Historically, Muslims faced discrimination based on ethnicity rather than religion. However, contemporary discrimination against Muslims is rooted in different reasons, with events like the Rushdie affair significantly impacting multicultural relations. This study analyzes the evolving multicultural landscape in Britain, exploring the shift from predominantly assimilationist policies to a more mutual process of integration. It delves into the emergence of interfaith dialogue as well as the complexities surrounding the intersection of race, religion, gender, and identity. The research examines two key themes: the discursive positioning of Islam beyond integration and terrorism narratives, and the operationalization of identity by Muslims in various contexts. The study employs empirical methods and cultural studies theories to understand how individual and social practices intersect in this context. By doing so, it contributes to Islamic studies, socio-political studies, and cultural studies, shedding light on the discourses that shape and are shaped by Muslim lives in Britain. The analysis encompasses diverse perspectives, from macro-level societal discourses to micro-level individual actions, thus providing a comprehensive exploration of the multifaceted experiences of Muslims in Britain.

Journalism Ethics Roger Patching, Martin Hirst, 2013-11-20 Journalism Ethics:

Arguments and Cases for the 21st Century explores the major ethical dilemmas facing journalists in the digital age. Engaging with both the theory and practice of journalism ethics, this text explains the key ethical concepts and dilemmas in journalism and provides an international range of examples and case studies, considering traditional and social media from a global perspective. Journalism Ethics offers an introductory philosophical underpinning to ethics that traces the history of the freedom of expression from the time of Greek philosophers like Aristotle, through the French and American revolutions, to modern day. Throughout the book Patching and Hirst examine ethically-challenging issues such as deception, trial by media, dealing with sources and privacy intrusion. They also explore continuing ethical fault lines around accuracy, bias, fairness and objectivity, chequebook journalism, the problems of the foreign correspondent, the conflicts between ethics and the law and between journalists and public relations consultants. Concluding with a step-by-step guide to ethical thinking on the job, this textbook is an invaluable resource for students of journalism, media and communication.
