ACS Carolyn Manville Baum, Dorothy Edwards, 2008-01-01 Activity Card Sort, 2nd Edition (ACS) is a flexible and useful measure of occupation that enables occupational therapy practitioners to help clients describe their instrumental, leisure, and social activities. The format's 89 photographs of individuals performing activities and 3 versions of the instrument (Institutional, Recovering, and Community Living) is easily understood and administered. Using the ACS will give clinicians the occupational history and information they need to help clients build routines of meaningful and healthy activities. Includes 20 instrumental activities, 35 low-physical-demand leisure activities, 17 high-

physical-demand leisure activities, and 17 social activities and allows for the calculation of the percentage of activity retained.

The Message Content of Advertisements for Active

Army Enlistments Sandra Baxter, 1988 This report describes the message content analysis undertaken as part of the Army Communications Objectives Measurement System (ACOMS) project. The results are based on a sample of 3,665 male and female 16-24-year-olds who viewed 13 video and 11 print active Army advertisements. The analysis of the data indicates that unaided recall of Army sponsorship is made by a high percentage of respondents when video and print ads are initially displayed in the midst of other advertisements. The message attributes rated most highly by the video-advertisement viewers concerned high technology equipment, an experience to be proud of, and an opportunity to develop one's potential. Print-advertisement respondents perceived messages dealing with money for education, skill training, and experience to be proud of. Statistically significant differences were found between the genders and among ethnic groups for many of the Army attributes perceived in the advertisements. Generally, males and whites perceived the attributes more frequently than females and blacks, respectively. Analysis of main messages confirms that the attributes capture the vast majority of messages conveyed, although an attribute focusing on adventure and excitement could be added. Keywords: Army personnel, Enlisted personnel, Recruiting. (SDW).

Necessary Conditions Geoff Krall, 2023-10-10

During his years working as an instructional coach for a national network of schools, Geoff Krall had the chance to witness several inspirational moments when math class comes alive for middle or high school students--when it is challenging but also fun, creative, and interactive. In *Necessary Conditions: Teaching Secondary Math with Academic Safety, Quality Tasks, and Effective Facilitation*, Krall documents the essential ingredients that

produce these sorts of moments on a regular basis and for all students. They are Academic Safety, Quality Tasks, and Effective Facilitation. Academic Safety: Krall implements equitable classroom experiences that help fight stigmas associated with race and gender in schools. This allows students to feel socially and emotionally secure while nurturing their identities as mathematicians and increasing engagement during classroom discussions Quality Tasks: Teachers can adapt or create dynamic, student-centered lessons that break down math into small, manageable sections, removing the frustrations felt by students who aren't considered math people Effective Facilitation: This book shows how to incorporate teaching moves and math routines designed for engagement, persistence, and interactivity. Teachers can allow students to explore safely while maintaining consistent classroom expectations My work as a math instructional coach for a network of schools has afforded me the unique opportunity to visit exceptional teachers across the country, documenting their tasks, teaching moves, and academically safe learning environments. You'll experience dispatches from these effective classrooms in which we'll observe how teachers attend to all three elements that make up the ecosystem. -- Geoff Krall from his book, Necessary Conditions

Touching the Altar Carol M. Bechtel, 2008-01-14 What does it mean to be in the presence of God's holiness? How can it affect us whether we seek it out or stumble upon it? Can it truly change our

very reality to encounter it? The essayists in this volume explore these questions at the heart of Christian worship, considering the oft-neglected Old Testament as essential to understand our purpose in worship. Following the structure of the Hebrew canon -- beginning with the Pentateuch, moving through to the Psalms, then wisdom literature -- each chapter considers a separate aspect of worship, from theater to the Sabbath to sacred space, offering new inspiration. In the final essay Carol Bechtel rereads the book of Job through the lens of our human limitations (as opposed to the usual theme of theodicy), with compelling applications for both life and worship. Each of these essays concludes with two appropriately themed hymns and a For Further Reading list. Five of the seven contain sidebars that illustrate and enrich key points. Evocative woodcut artwork by Margaret Adams Parker provides a striking backdrop to the text. Taken together, these essays testify powerfully to the belief that the Old Testament is not only valuable but also essential to whole and fully foundational preaching and worship. Written primarily by Old Testament professors, *Touching the Altar* will make an engaging supplemental text for introductory or elective Old Testament courses and will also go far toward providing deeper worship for any Christian.
