O Meu Gravador de Sonhos Ana Rita Afonso,2018-01-15 À noite, enquanto dormes, o teu cérebro produz sonhos extraordinários, uns agradáveis outros nem tanto. E se tivesses uma máquina capaz de os gravar e de os exibir? Por mero acaso, numa feira de velharias, essa máquina acabou por vir parar às mãos do João Pedro, desencadeando-se a partir daí uma série de aventuras invulgares, contagiantes e imprevisíveis. O gravador de sonhos, considerado o objeto mais valioso do mundo, é muito cobiçado por perigosos bandidos, como os ladrões de sonhos. Prepara-te, tudo pode acontecer! _____ Aos pais, educadores e professores. É um livro que pensa muito nas “crianças e adolescentes digitais”, pouco atraídos pela leitura em suporte papel e cada vez mais dependentes da “realidade online” ou dos jogos eletrónicos. Procura-se seduzi-los. Os livros podem ser envolventes, divertidos e inesquecíveis. Criar a disponibilidade para ler um livro implica, entre outras, a capacidade para estar em ligação com o nosso mundo interno, relação que parece cada vez mais comprometida. A tônica descritiva pretende funcionar, também, como uma espécie de ilustração, com riqueza cromática e sem limites para o processo imaginativo. A liberdade e a criatividade estão convocadas para transformar a realidade – que aparece aqui contaminada pelo fantástico. Esta obra foi alvo de um “pré-teste” com oito crianças entre os dez e os quinze anos. Os resultados foram animadores.

MEU (SOC)s and Operational Maneuver from the Sea Phillip W. Boggs,1999 The beginning of the 21st century will confront the U.S. Marine Corps' forward-deployed Marine Expeditionary Units (Special Operations Capable) (MEU (SOC)) with challenges and opportunities while operating as the Nation's Force in Readiness. The challenges are caused by the demise of the Soviet Union and the rise of regional conflict, which affects the United States national interests. As the world's population explodes in the coastal regions, the potential for conflict and possible Marine Corps intervention grows. The opportunities for the Marine Corps entering the 21 century are in the emerging technologies that will enhance the way Marines operate in the future. This monograph suggests changes required in the MEU (SOC) organization that will allow it to operate under the new Marine Corps doctrine entitled Operational Maneuver from the Sea (OMFTS). Beginning with a history of key Marine Corps challenges, the monograph demonstrates how the Marine Corps has recognized changes in conflict and technology throughout its history and adapted accordingly. Although the study proves the Marine Corps can adapt to change, it demonstrates the Marine Corps has always maintained its expeditionary ethos and naval heritage. This monograph reviews and explains the key concepts of the threat and new operating doctrine to confront that threat. The threat study, entitled Chaos in the Littorals, predicts a complex operating environment along the world's coastlines and urban areas. To confront these challenges, the Marine Corps has defined seventeen new concepts for future operations within OMFTS. Ship to Objective Maneuver, Sustained Operations Ashore and Comprehensive Command and Coordination are three key concepts of OMFTS that will have immediate effects on how a MEU (SOC) operates in the future. After examining the organization and capabilities of the MEU (SOC), this monograph analyzes a present day MEU (SOC) attempting to operate under OMFTS within.

MEU (SOC)s and Operational Maneuver from the Sea Phillip W. Boggs,U.S. Army Command and General Staff College. School of Advanced Military Studies,1999

A New Division of Labor Andrew R. Hoehn,2007 A new U.S. grand strategy has been emerging, one that requires not only resources but patience and commitment: the promotion of democracy and freedom abroad. The U.S. armed forces will continue to be among the myriad contributors necessary to achieve this goal. In the face of increasing complexity, changing tactics, and tight budgets, the defense establishment will need to change in multiple ways, yet must also not risk its historic strengths. This volume draws together and integrates insights derived from a wide range of research efforts undertaken at RAND over the past few years. Some of the observations include different ways to organize and employ forces and to divide labor among them, updated insights about the natures of likely future conflicts, the need to further improve information resources, and the value of fostering partnerships among the services and with allies. the authors also offer specific recommendations, such as a recommendation to the Air Force to reevaluate its concepts for large-scale power projection. -- p. G-Protein-Coupled Receptor Dimers Katharine Herrick-Davis,Graeme Milligan, Giuseppe

Di Giovanni, 2017-08-31 G-protein-coupled receptors (GPCRs) are believed to be the largest family of membrane proteins involved in signal transduction and cellular responses. They dimerize (form a pair of macromolecules) with a wide variety of other receptors. The proposed book will provide a comprehensive overview of GPCR dimers, starting with a historical perspective and including, basic information about the different dimers, how they synthesize, their signaling properties, and the many diverse physiological processes in which they are involved. In addition to presenting information about healthy GPCR dimer activity, the book will also include a section on their pathology and therapeutic potentials.
