The Story of an African Working Class Jeff Crisp,2017-02-15 This seminal work tells the story of Ghana's gold miners, one of the oldest and most militant groups of workers in Africa. It is a story of struggle against exploitative mining companies, repressive governments and authoritarian trade union leaders. Drawing on a wide range of original sources, including previously secret government and company records, Jeff Crisp explores the changing nature of life and work in the gold mines, from the colonial era into the 1980s, and examines the distinctive forms of political consciousness and organization which the miners developed. The study also provides a detailed account of the changing techniques of labour control employed by mining capital and the state, and shows how they failed to curb the workers' solidarity and tradition of militant resistance. Combining lively historical narrative with original analysis, this book remains a unique contribution to the history of Africa and its working class.

RE-BECOMING UNIVERSITIES? David M. Hoffman,Jussi Välimaa,2016-03-09 This book provides an overview of the major findings of the comparative research project, Changes in Networks, Higher Education and Knowledge Society (CINHEKS). The main aim of this international comparative research project is the analysis of how Higher education institutions are networked within distinct knowledge societies in two key regions of the world: Europe and the United States of America. This research project was carried out in four European countries (Finland, Germany, Portugal and the United Kingdom) and in two different states in the United States of America. In addition, during the course of the research, a team from the Russian Federation joined the CINHEKS study. The analysis is contextually grounded in a comparative policy analysis focused on the main developments and understandings of the ideas surrounding the term knowledge society, in all countries concerned. Empirical elaboration is established via a series of sequential studies, each building, incrementally, on the previous study. These studies include institutional profiles of higher education institutions, institutional case studies, and an international comparative survey that illuminates academics' social networks. The research findings broaden our understanding of the differences and similarities in how higher education institutions and individual academics are networked within and between societies that understand themselves as knowledge societies. The book introduces a novel analytical synthesis, which asserts contemporary societies have evolved into Networked Knowledge Societies. Methodologically, the book both challenges and raises the bar for previous approaches in comparative higher education, in terms of research design, execution and lays the groundwork for a new generation of international comparative higher education research.

Noun-Based Constructions in the History of Portuguese and Spanish Patrícia Amaral,Manuel Delicado Cantero,2021-12-15 This book explores the syntactic and semantic change of three types of constructions in Spanish and Portuguese: (i) complex DPs with clausal adjunction (el hecho de, o facto de), (ii) complex prepositions/complementizers and complex connectives (sin embargo de/sem embargo de, so(b) pena de), and (iii) complex predicates containing light verbs (dar consejo/conselho de). While these constructions are syntactically different, they are all clause-taking complex expressions containing a noun followed by the functional preposition de ('of'). This book is the first work to examine them together through a systematic comparative corpus study. This makes it possible to tease apart individual from general changes and to focus on the chronological clustering of changes involving complex constructions in both languages. The development of these constructions has multiple causes related to the noun. Specifically, the reanalysis of the entire expression is affected both by the meaning of the noun and by changes in complementation patterns that systematically affected nouns (as well as verbs and adjectives) in the 16th-17th centuries in both languages. By studying mechanisms of language change and their outcomes in two sister languages, the book addresses questions like: How do complex constructions evolve? How does the meaning of the noun change when considered in isolation and when compared to the meaning of the whole construction? How do syntactic categories change over time? Studies of closely related languages, which can reveal distinct developments occurring in parallel over time, provide a crucial test case for theories of language change

Gender, Culture, and Disaster in Post-3.11 Japan Mire Koikari,2020-10-15 The Great East Japan Disaster – a compound catastrophe of earthquake, tsunami, and nuclear meltdown that began on March 11, 2011 – has ushered in a new era of cultural production dominated by discussions on safety and security, risk and vulnerability, and recovery and refortification. Gender, Culture, and Disaster in Post-3.11 Japan re-frames post-disaster national reconstruction as a social project imbued with dynamics of gender, race, and empire and in doing so Mire Koikari offers an innovative approach to resilience building in contemporary Japan. From juvenile literature to civic manuals to policy statements, Koikari examines a vast array of primary sources to demonstrate how femininity and masculinity, readiness and preparedness, militarism and humanitarianism, and nationalism and transnationalism inform cultural formation and transformation triggered by the unprecedented crisis. Interdisciplinary in its orientation, the book reveals how militarism, neoliberalism, and neoconservatism drive Japan's resilience building while calling attention to historical precedents and transnational connections that animate the ongoing mobilization toward safety and security. An important contribution to studies of gender and Japan, the book is essential reading for all those wishing to understand local and global politics of precarity and its proposed solutions amid the rising tide of pandemics, ecological hazards, industrial disasters, and humanitarian crises.

My Sweet Orange Tree José Mauro de Vasconcelos,2019-07-09 Fifty years after its first publication, the multimillion-copy international bestseller is available again in English, sharing the heartbreaking tale of a gifted, mischievous, direly misunderstood boy growing up in Rio de Janeiro. When Zezé grows up, he wants to be a poet in a bow tie. For now the precocious young boy entertains himself by playing clever pranks on the residents of his Rio de Janeiro neighborhood, stunts for which his parents and siblings punish him severely. Lately, with his father out of work, the beatings have become harsher. Zezé's only solace comes from his time at school, his hours secretly spent singing with a street musician, and the refuge he finds with his precious magical orange tree. When Zezé finally makes a real friend, his life begins to change, opening him up to human tenderness but also wrenching sorrow. Never out of print in Brazil since it was first published in 1968, My Sweet Orange Tree, inspired by the author's own childhood, has been translated into many languages and has won the hearts of millions of young readers across the globe.

States of Grace Patrícia I. Vieira,2018-03-19 Provides in-depth analyses of key moments in Brazilian utopianism, including theologico-political, matriarchal, environmental, and work-free utopias. States of Grace offers a novel approach to the study of Brazilian culture through the lens of utopianism. Patrícia I. Vieira explores religious and political writings, journalistic texts, sociological studies, and literary works that portray Brazil as a utopian "land of the future," where dreams of a coming messianic age and of social and political emancipation would come true. The book discusses crucial utopian moments such as the theological-political utopia proposed by Jesuit Priest Antônio Vieira; matriarchal utopias, like the egalitarian society of the Amazons; work-free utopias that abolished the boundaries separating toil and play; and ecological utopias, where humans and nonhumans coexist harmoniously. The uniqueness of the book's approach lies in rethinking the link between messianic and utopian texts, as well as the alliances forged between progressive religious, socioeconomic, political, and ecological ideas. Patrícia I. Vieira is Associate Professor of Spanish and Portuguese at Georgetown University and Associate Research Professor at the Center for Social Studies of the University of Coimbra, Portugal. She has written several books, including Seeing Politics Otherwise: Vision in Latin American and Iberian Fiction and Existential Utopia: New Perspectives on Utopian Thought (coedited with Michael Marder).

The City of the Senses, the Senses in the City Zara Pinto-Coelho,Helena Pires,2022-02-17 Urban-oriented sensory analysis has a long tradition within the social sciences. However, in communication and cultural studies research, the sensorial orientation is still incipient. This publication is part of an ongoing call by Passeio, the platform for the study of art and urban culture of the Communication and Society Research Centre, for an organicist vision of the city, underlining the need to re-signify the role of the senses in the experience of everyday contemporary urban life. This book includes theoretical and/or empirical contributions from researchers in sociology, communication and cultural studies, who explore three fundamental questions: (a) the effects of the tourist era under the COVID-19 pandemic, (b) the role of music in the production of places and socialities; and (c) the importance of ambiances in the constitution of a carnal relationship with the city.
