Kosovo - Assessment of MFd's Technical Assistance Program International Monetary Fund,2006-06-30 MFD technical assistance to Kosovo has been provided under special circumstances, since it is not a member of the IMF or of the World Bank. As a region within the former Federal Republic of Yugoslavia severely affected by the war with Serbia, Kosovo has been administered by the UNMIK on the basis of UN Security Council Decision 1244 of June 10, 1999. After the end of the war, the UNMIK requested technical assistance from the IMF. The IMF's Executive Board approved this request, and MFD began providing TA in late 1999.

Bosnia and Herzegovina - Assessment of MFd's Technical Assistance Program International Monetary Fund,2006-06-30 This report summarizes the findings of an evaluation of the technical assistance delivered by MFD to the CBBH. The assessment was conducted during a visit to Bosnia and Herzegovina during the period March 15-17, 2006. It covers the period 1997-2005, although MFD TA started earlier: two brief MFD staff visits took place in 1996 to assist the authorities in preparing legislation to establish a currency board and create a market-based central bank.

Recent events have brought multimode fiber issues back into the measurement arena. Polarization-mode dispersion continues to be a topic of much interest with 2 full sessions devoted to a variety of subtopics in the field. Fiber geometry has several contributions, as does the broad topic of fiber mapping with length (including such parameters as chromatic dispersion and polarization properties).

Quasi-Hopf Algebras Daniel Bulacu,Stefaan Caenepeel,Florin Panaite,Freddy Van Oystaeyen,2019-02-21 This is the first book to be dedicated entirely to Drinfeld's quasi-Hopf algebras. Ideal for graduate students and researchers in mathematics and mathematical physics, this treatment is largely self-contained, taking the reader from the basics, with complete proofs, to much more advanced topics, with almost complete proofs. Many of the proofs are based on general categorical results; the same approach can then be used in the study of other Hopf-type algebras, for example Turaev or Zunino Hopf algebras, Hom-Hopf algebras, Hopfish algebras, and in general any algebra for which the category of representations is monoidal. Newcomers to the subject will appreciate the detailed introduction to (braided) monoidal categories, (co)algebras and the other tools they will need in this area. More advanced readers will benefit from having recent research gathered in one place, with open questions to inspire their own research.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an
