Russian author and aviation expert Yefim Gordon interviews Mikoyan design and engineer personnel to reveal the development and operational history of the MiG-29. With access to all design and production records, as well as declassified technical drawings and photographs, Gordon has assembled the ultimate reference to this Cold War fighter, of which an estimated 500 are still believed to be in service around the globe, including in Russia, Bulgaria, Cuba, Czechoslovakia, Hungary, India, Iraq, Iran, Poland and Malaysia.

Simple, cheap, and reliable, the MiG-29 became its nation's frontline fighter, a job it has performed remarkably well for a decade. From Farnborough to Kubinka Benjamin S. Lambeth, Rand Corporation, 1991 At the September 1988 Farnborough Air Show, the author met the chief test pilot of the Mikoyan Design Bureau, Valery Menitskii, who had accompanied the Soviet team to supervise the first flight demonstrations of the MiG-29 in the West. That contact led to several more encounters between the author and Menitskii during the ensuing year, culminating in an invitation from Menitskii to the author to fly the MiG-29. On December 15, 1989, the author flew with Menitskii at Kubinka Air Base near Moscow, thus becoming the first U.S. citizen to fly the MiG-29 and the first Western pilot invited to fly a combat aircraft of any type inside Soviet airspace since the end of World War II. This report documents that experience in detail.

Mikoyan Mig-29 and Mig-35 Yefim Gordon, Dmitriy Komissarov, 2019-04 Designed as a mass-produced and relatively cheap light tactical fighter, the MiG-29 first flew on October 6, 1977. After extensive flight testing, it entered production in 1982 and deliveries to the Soviet Air Force began in 1983. In addition to its main counter-air role, the aircraft had a useful air-to-ground capability, carrying free-fall bombs and unguided rockets. From the outset the MiG-29 had been steadily developed beyond the fourth generation with changes to the airframe, avionics and weapons systems and new variants were produced in the early 2000s. The MiG-29 known as the Fulcrum in the west, became both one of the Soviet Air Force's main fighter types and a successful Soviet export with nearly a third of the 1,500 first-generation Fulcrums built up to 1996 being exported. It saw service with 25 nations around the globe. Apart from the (former) Warsaw Pact nations, notable customers include India, Malaysia, Iraq, Yemen, Eritrea, Cuba and Peru. This revised and expanded edition of the definitive history of the aircraft charts in detail the MiG-29's evolution from the earliest design studies to the latest multi-role versions. It includes an enormous amount of new information, a listing of known operators and production lists together with a magnificent collection of previously unpublished photos.

Mig-29 Fulcrum Robert Pied, Nicolas Deboeck, 2018-06 A close up of the famous Russian MiG-29. This book includes Fulcrums of Poland, Russia, Slovakia, Hungary, India, Malaysia, Bulgaria and even North Korea. Filled with every imaginable detail: fuselage, landing gear, cockpit (many photos of the

MiG-29 Flight Manual Alan R. Wise, 2001 The MiG-29 Fulcrum is acknowledged as the finest lightweight, multi-role fighter ever produced in Russia. It was designed to operate under wartime conditions and fight head-to-head with Western combat aircraft such as the U.S. F-16 Falcon, F/A-18 Hornet, French Mirage 2000, Rafale, and Swedish JAS-39 Gripen. Roughly the size of the F/A-18 Hornet, the Mach 2.3 capable Fulcrum has also demonstrated many extraordinary capabilities and set several world records, including topping the Lockheed SR-71 Blackbird in altitude. Presently in service with the Russian Air Force, as well as the air forces of Georgia, Ukraine, Moldova, India, Germany, Yugoslavia, Serbia, Iraq, Czech Republic, Slovakia, Syria, Poland, Malaysia, Hungary, and Yemen, the MiG-29 has proved to be a rugged and capable fighter that will continue to be a factor in future conflicts, both as ally or foe. It is with this in mind that *MiG-29 Flight Manual: Unclassified* was created - to provide a rare and unprecedented glimpse inside a top Russian aircraft. Using information that only a few years ago was highly classified, this translated text presents an extraordinary look at the capabilities and complexities of one of the very best fighters of the current age.

Mikoyan Gurevich MiG-29 Fulcrum Yefim Gordon, Peter Davison, 2005 In the late 1960s the Soviet Union was working on a fourth-generation jet fighter concept. These aircraft would form the backbone of Warsaw Pact air forces in the next decade. The Soviet aerospace industry began considering enhancing combat capabilities with new air-to-air missiles and a sophisticated weapons control system. Thus the MiG-29 was born. High maneuverability, a high thrust-to-weight ratio, a wide speed range, and special short-range missiles are just a few of the MiG-29's special characteristics. This book extensively covers the concept, variants, upgrades, carrier trials, service, sales, and what the future holds for the MiG-29. Find out how the MiG-29 paved the way for aerodynamic refinements, improved handling, stability, and technological changes that simplified the building process. Learn details on the MiG-29's engine and controls. Powered by two Klimov NPP (Izotov) RD-33 afterburning turbofans rated at 5,040 kgp (11,111 lb st) at full military power, and armed with an internal gun, short- and medium-range air-to-air missiles, unguided rockets, and free-fall bombs, the MiG-29 is truly a marvel in military aircraft. Authors Yefim Gordon and Peter Davison use over 300 photos to illustrate the story of the MiG-29. Topics covered include design, development, structural detail, international production, trials, comparisons, overseas sales, and much more. This book is a must have for all aircraft enthusiasts!

Inside the MiG 29 Fulcrum Marcus Mahy, 1997-01-01

The MiG-29 Andy Groning, 2018-06-28 This book presents the development and operational use of the Soviet/Russian Mikoyan MiG-29. The MiG-29 was the Soviet response to the new generation of air-superiority fighter aircraft fielded by NATO, such as the American F-15 and F-16. The aircraft entered service with the Soviet Air Force in 1982, and was soon flown by many Eastern Bloc air forces. The fighter's performance came as surprise to the West, and modernized variants are still in service today. Described in superb detail are the many MiG-29 variants, and export models that flew in such countries as Algeria, Cuba, Hungary, India, Malaysia, North Korea, Peru, Poland, Sudan, Syria, Ukraine, and many others. Aircraft technical systems and armaments are also discussed in detail.
