Flip! How the Frisbee Took Flight Margaret Muirhead, 2021-04-27 The origin story of the Frisbee soars with unexpected twists and turns. Fred Morrison is credited as the inventor of the Frisbee, but for centuries folks have been flipping for flying discs. Ancient Greeks flicked discs, and beginning in the 1920s, college kids at Yale University were tossing pie tins. Fred lived in California and had no idea about ancient Greeks or East Coast college kids. His invention quest began in 1932 after tossing a tin popcorn lid

around the backyard. For more than twenty years, Fred and his wife, Lu, tried and failed to perfect a flying-disc concept. Eventually they created what we know today as the Frisbee. Their story is full of good old-fashioned perseverance, success, and fun!

[Art Therapy Activities for All Ages](#) Joan Stewart, 2024-04-18 The purpose of Art Therapy is to create an oasis of time to allow the brain and body to relax, recharge, and rejuvenate itself, while exploring the creative process of manipulating design elements such as line, shape, form, space, texture, tone, and color. Art Therapy can help people express themselves more freely, improve their mental health, and improve interpersonal relationships. The basis of Art Therapy is established on the idea that people can recover and feel better via artistic expression. There is increasing evidence in rehabilitation medicine and the field of neuroscience that art enhances brain function by impacting brain wave patterns, emotions and the nervous system. Art can also raise serotonin levels. These benefits don’t just come from making art, they also occur by experiencing art. As an Art Facilitator, I have thoroughly tested all the activities in this book over many years and

with a variety of people. Many activities are structured to encourage team work, problem solving and communication as well as individual creativity in a relaxed, social environment. I was always surprised and impressed at the results. While each activity focuses on one of the main categories (brain, senses, memory, teamwork and loss) all of them involve a number of skills. The results can be different with each new group and even when presented to the same group again.
