Media and Water Joanne Garde-Hansen,2020-12-10 As flooding, drought and water scarcity become more pronounced due to climate change, so the way in which these events are presented in the media assumes greater significance. In particular, the media plays an important role in shaping the public perception and understanding of water issues, and debates around extreme weather events more generally. Joanne Garde-Hansen's book offers a sustained and comprehensive exploration of media representations of water. Drawing on a wide range of media – including newspapers, digital, photography, radio, television and video, as well as empirical research on media and memory – she examines how drought, flooding and water management have been portrayed in the media, both historically and in the contemporary world. The use of the media by water institutions to manage public perceptions and the use of digital media by the public to engage with water companies is also included. A particular feature of the book is an examination of water and gender in developed nations. One of the first books to look at media representations of water, this pioneering work provides valuable insights for both scholarly and professional water research.

Mixed Media Simone Murray,2004-02-20 The first book-length study of the feminist press movement.

Warp Speed Bill Kovach,Tom Rosenstiel,1999 Did the coverage of the Clinton-Lewinsky scandal set a new low for American journalism? How has news gathering and reporting changed, and what effects has this had on the political and cultural landscape? In this insightful and thoughtful book, Bill Kovach and Tom Rosenstiel, two of America's leading press watchers, explore the new culture of news--what they call the new Mixed Media Culture--

and show how it works. Warp Speed describes a world of news in which the speed of delivery is reducing the time for verification, sources are gaining more leverage over the news, and argument is overwhelming reporting. The press, forced to adhere to the demands of the bottom line and keep its audience, is straining more and more to find the Big Story to package as a form of entertainment, turning news stories into TV dramas; and turning history into a kind of Truman Show. As a result, the role of the press in a self-governing society is undermined. Grounded in extensive research, Warp Speed is informed by interviews and testimony from the principal journalists who covered this story and who covered the other great scandals of Washington politics. It offers detailed recommendations on how journalists can right their ship, such as using anonymous sources more responsibly and turning good journalism into good business.

Mixed Media in Contemporary American Literature Joelle Mann, 2021-06-28 Mixed Media in Contemporary American Literature: Voices Gone Viral investigates the formation and formulation of the contemporary novel through a historical analysis of voice studies and media studies. After situating research through voices of nineteenth- and twentieth-century American literature, this book examines the expressions of a multi-media vocality, examining the interactions among cultural polemics, aesthetic forms, and changing media in the twenty-first century. The novel studies shown here trace the ways in which the viral aesthetics of the contemporary novel move language out of context, recontextualizing human testimony by galvanizing mixed media forms that shape contemporary literature in our age of networks. Through readings of American authors such as Claudia

Rankine, David Foster Wallace, Jennifer Egan, Junot Díaz, Michael Chabon, Joseph O'Neill, Michael Cunningham, and Colum McCann, the book considers how voice acts as a site where identities combine, conform, and are questioned relationally. By listening to and tracing the spoken and unspoken voices of the novel, the author identifies a politics of listening and speaking in our mediated, informational society.

Legislating Creativity Dustin Kidd, 2014-04-08 How does political policy-making shape the creative activities of artists? Do the political interests of artists influence actual political practices in any way? *Legislating Creativity* examines the relationship between art and politics through an analysis of controversial art projects tied to the National Endowment for the Arts during the Culture Wars (late 1980s-1990s). Though there have always been

tensions in government funding for the arts, these controversies intensified the public debates surrounding art/politics and remain as a focal point in conversations that continue today. The book focuses on three case studies: Mapplethorpe's controversial photography, an exhibit on the impact of AIDS entitled *Witnesses*, and the Guerrilla Girls. Dustin Kidd has provided a thoroughly enriching look at the intersections of art and politics—the ways that political practices transform creative expression and the ways that artistic drives shape political policies.
