The Boys' Book of Model Aeroplanes Francis Arnold Collins, 1910

Flying Scale Models Ron Godfrey Moulton, 1956

Airliner Models Anthony J Lawler, 2019-10-08 For most of the past century, beautiful models of airliners have been made to promote their airlines' services in travel agents and their own shops. The models also illustrate the evolution of airliner design over these decades: the wood and fabric biplanes of the 1920s, the broad adoption of all-metal airliners in the 1930s, the first jet airliners of the 1950s, the first wide-body airliners of the 1970s and the pioneering small steps in supersonic air travel are all covered. The increasingly colourful exterior schemes adopted by the airlines, to ensure recognition by aspiring passengers, provide an interesting subtext. For model collectors, the airliner type, makers name, scale, approximate age and the materials used are detailed for each model illustrated. A short history of significant model-making companies is covered. With the onset of online bookings and the closure of airline offices and travel agents, the use of models is fast vanishing forever. The focus of this book is to preserve this fascinating era when models were a significant marketing tool, and to ensure that these models, at least in photographic form, survive as a record for future generations.

Flying Models David Jefferis, 2018-09-25 Models that fly need to be more than just good-looking. They need to be shaped just right to move through the air. This engaging introduction to model making explains aerodynamics, the mathematics of scale, how gliders and models propelled by rubber band, electric motor, fuel, or a rocket work, and the difference between building from a kit and building from scratch. Tips on shaping wings, choosing body materials, and weather-proofing help build fine-motor skills. Young readers are encouraged to build patience, concentration, perseverance, and problem-solving.

Scale Model Gliders Cliff Charlesworth, 1995-01-01

Airbrushing and Finishing Scale Models Brett Green, 2011-01-01 ALSO AVAILABLE AS AN E-BOOK. Brett Green details the prerequisites of airbrushing, including the different types of spray equipment and air sources available,

The Complete Book of Building and Flying Model Airplanes Walter A. Musciano, 1986

Ov-10d Model Glenn Hoover, 2018-08-17 This book contains detailed instructions on building the OV-10D Bronco 1/32 scale model aircraft from Kitty Hawk. A spiral bound version is available on my website In addition to the kit's instructions, there are 4 aftermarket kits each with their own instruction. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Kitty Hawk and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. I also incorporate Eduard's Photo Etch sets 32830, 32831, and 32368 along with Aerocraft Models Undercarriage Set in with Kitty Hawk's instructions. As most modelers know, it can be tricky to go back and forth between the model kit instructions and the aftermarket kit instructions. I took out the guess work and did that for you. The aftermarket steps are color coded making them easy to skip if you just have the basic model. This book provides a little history of the Bronco, photos of the model kit contents including the aftermarket kits, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1404 steps and 180 plus figures over 212 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Kitty Hawk or aftermarket instruction) along with a block to mark that you completed the step. The major instruction sequence for this model is 1. Cockpit 2. Center Fuselage 3. Center Wing 4. Gun Pods 5. Engines 6. Left Fuselage 7. Right Fuselage 8. Center, Left, and Right Wings 9. Wings and Horizontal Stabilizer Assembly 10. Paint 12. Decals 14. Landing Gear 15. Weapons 16. Canopy 17. Propellers 18. Antennas 19. Nose & FLIR I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. Anyway, I hope you find this book useful. See a 16-page sample along with photos of finished models and other books at glennhoovermodels.com.
