G. Harry Stine,Bill Stine

The Handbook of Model Rocketry George Harry Stine,1983 This National Association of Rocketry handbook covers designing and building your first model rocket to launching and recovery techniques, and setting up a launch area for competition.

Handbook of Model Rocketry G. Harry Stine,1994-03-28 The Classic Guide by the Father of Model Rocketry Now Completely Revised and up to Date... This new edition of the model rocketeer's bible shows you how to safely build, launch, track, and recover model rockets—and have fun doing it. Whether you're a beginner or a veteran model rocketeer, the *Handbook of Model Rocketry*, the official manual of the National Association of Rocketry (NAR), will become your well-used reference book. G. Harry Stine has been a model rocketeer since 1957 when he founded the NAR and started the first model rocket company. Stine's *Handbook*, after satisfying rocket enthusiasts for nearly three decades, remains the definitive resource. Recent technological progress has had a major effect on the model rocket hobby and sport. This revised and updated edition covers such new technology as: revised computer programs that use improved versions of Basic composite propellant model rocket motors recently approved reloadable model rocket motors building and flying large model rockets radio-controlled boost gliders and rocket gliders solid-state, microchip, computer-readable modules used to measure temperature, pressure, acceleration, and airspeed

Handbook of Model Rocketry G. Harry Stine,Bill Stine,2004-04-22 A fully updated new edition of the bible of model rocketry and the official handbook of the National Association of Rocketry G. Harry Stine was one of the founders of model rocketry and one of its most accomplished and respected figures. His Handbook of Model Rocketry has long been recognized as the most authoritative and reliable resource in the field. Now fully updated and expanded by Harry's son Bill Stine, who inherited his father's passion for model rockets, the new Seventh Edition includes the many changes in the hobby that have occurred since the last edition was published, such as new types of rockets, motors, and electronic payloads, plus computer software and Internet resources. This new edition also includes new photos and a new chapter on high-power rocketry. G. Harry Stine, founder and one-time president of the National Association of Rocketry, started the world's first model rocket company, whose kits are now in the Smithsonian. Bill Stine, also a model rocket expert, is the founder and president of Quest Aerospace Inc.

Launch Magazine's History of Rockets and Model Rockets Mark Mayfield,2009-10-28 In 1954, before the United States had even launched its first satellite into orbit, a Nebraska shoe salesman named Orville Carlisle developed a small black powder motor that could fire a toy rocket to 1,000 feet or more, blast out a parachute with a small

ejection charge, and allow the model to float harmlessly to the ground. America was hooked and hobby rocketry was born. Complete with explanations of the events and scientific developments that led to the proliferation of hobby rocketry, Launch Magazine's History of Rockets Model Rockets is a full-color pictorial history of aerospace endeavors around the world.

Launch Magazine's History of American Rocketry Mark

Mayfield,2021-09-21 A must-have for anyone fascinated by space travel, rocketry, NASA, SpaceX, and more! A new era in spaceflight, led by SpaceX and other commercial rocket companies, is generating the kind of worldwide interest in space travel that we haven't seen since the space race of the 1960s. Kids are dreaming of becoming astronauts again. New feats, such as SpaceX's remarkable ability to land booster rockets, under powered descent, back on land or sea has galvanized a new generation of rocket enthusiasts. Yet none of this would be possible without the advances of rocketry over the past century. The Chinese were the first to develop black-powder fireworks and rockets centuries ago, but modern rocketry truly began with Robert Goddard's launch of a liquid-fueled rocket on a

Massachusetts farm in 1926. That metal contraption—which flew just 41 feet high before arching over and streaking 184 feet into a cabbage patch—came just 43 years before Neil Armstrong stepped foot on the moon on July 20, 1969. Armstrong’s Apollo 11 mission was made possible by a giant 36-story-tall Saturn V rocket that used some of the same propulsion principles as Goddard’s first tiny, crude rockets. The beginning of the “Space Age” is considered to be Russia’s launch of the world’s first satellite, Sputnik, in 1957. But it was the pioneering human spaceflights of the 1960s that captured the imagination of the world and turned astronauts into heroes. Weapons of war—the Redstone, Atlas, and Titan II missiles—were converted into civilian launch boosters and led to the success of the Mercury and Gemini programs. All the while, Saturn rockets were being developed that would ultimately lead to the moon missions. Kids were so excited about these pioneering space flights that an entirely new hobby—model rocketry—was created to serve their interests. Small scale models of NASA’s big rockets were ordered by the millions, generating a \$100 million hobby at a time when there were no video games, no internet, and no cable, just three broadcast television networks. Now, the next generation of rockets from SpaceX and other commercial companies, along with NASA’s new launch vehicles and Orion spacecraft, will lead the United States and the world into a new era of rocketry—beginning with crewed flights to the moon as early as 2024, and ultimately to Mars within the first half of this century.

Make: Rockets Mike Westerfield,2014-08-21 This book teaches the reader to build rockets--powered by compressed air, water, and solid

propellant--with the maximum possible fun, safety, and educational experience. Make: Rockets is for all the science geeks who look at the moon and try to figure out where Neil Armstrong walked, watch in awe as rockets lift off, and want to fly their own model rockets. Starting with the basics of rocket propulsion, readers will start out making rockets made from stuff lying around the house, and then move on up to air-, water-, and solid propellant-powered rockets. Most of the rockets in the book can be built from parts in the Estes Designer Special kit.

Model Rocket Design and Construction Timothy S. Van Milligan, 1995 Instructions on turning design concepts into unique and exciting model rockets that work. Shows how to safely design, build, launch, fly, and recover sport model rockets. Includes tips and techniques for aeronautics, rocket safety, building materials, and more.

Modern High-power Rocketry Mark Canepa, 2005 International conspiracy funded by unimaginable wealth and influence detected and destroyed by one determined man operating on the edge of accountability.

The Model Rocketry Handbook Stuart Lodge, 2004 Stuart Lodge has worked with many forms of model rocketry and built up a depth of experience of the science and practice of this futuristic hobby. This book describes the physics and chemistry for those who want to explore the hobby in depth but also enables newcomers to gain the knowledge to enjoy it safely.
