TS Hanseatic Josander Schück, The TS Hanseatic was not just any cruise ship. Actually an aged lady, she was a phenomenon in the burgeoning post-war Germany and synonymous with dreamlike and luxurious holidays. No wonder, then, that this ship still has a special reputation, although - or perhaps precisely because - it had to be severely damaged by fire as early as 1966 and then scrapped. In this book, Josander Schück resurrects this dream ship - in the original and as a model. An on-board diary of a ship's hairdresser with a large number of unpublished photos and other documents gives an insight into the working life on board a cruiser in the 1960s. The detailed description of the construction of a 1:100 scale model of the Hanseatic also shows how such a model can be built and given life.

Physical modelling in coastal engineering R.A. Dalrymple, 2018-12-19 Coastal engineering is a field which has grown in importance over the last forty years as mankind has utilised and become dependent on the coastlines of the world to a greater extent. The activities in the field include the study of wave dynamics, shoreline erosion and protection, harbor and breakwater design, dredging technology, estuary mechanics and storm surge calculations, as well as offshore structural design. In all of these areas the level of activity is high and the state of art has improved dramatically since the 1940's. An important aspect of all these areas of research is the use of model studies. This volume consists of a number of papers which cover various aspects of physical modelling in coastal engineering, including the generation of waves in the laboratory, the modelling of sediment transport and the application to various engineering problems. The intent is to provide the reader with an overview of the research activities of individuals who represent major laboratories in their countries: to include Denmark, Scotland, Canada, the People's Republic of China, England, the Netherlands and the U.S.

Sixty Years of Airfix Models Jeremy Brook, 2015-06-30 The best-known and most important manufacturer of plastic model kits in the UK, Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth's. The kits were made to a constant scale and covered a wide variety of subjects, from aircraft to birds and from tanks to dinosaurs. In 1981 the famous London-based company closed down and only the kits survived intact. For the next twenty-five years Airfix was run by Palitoy and later Humbrol, but suffered from a lack of investment. In 2006, Hornby Hobbies Ltd, the train and Scalextric manufacturer, bought the ailing company and transformed it. Money and resources were ploughed into the range, and today Airfix releases around twenty new kits per year, designed to an incredibly high standard. The old kits of the 1950s and 1960s are gradually being replaced by new state-of-the-art tooling, all bearing that most prestigious name - Airfix. Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit, *Sixty Years of Airfix Models*, tells the full story, year by year, of the company and its products. Illustrated throughout with colour photographs of kits, box art and completed models.

Bautechniken für Schiffsmodelle Günther Slansky, Für den Schiffsmodellbauer gibt es nichts, was nicht gebaut werden kann - entscheidend sind die Liebe und die Begeisterung für das gewählte Vorbild, sagt der erfahrene Praktiker Günther Slansky und tritt in diesem Buch den Beweis dafür an. Mississippi-Steamboat um 1880, französischer Eimerkettenbagger aus den 20er Jahren und deutsche U-Boote des Zweiten Weltkriegs - unterschiedlicher könnten die hier beschriebenen Modelle kaum sein. Und doch gibt es Gemeinsamkeiten: der Bau nach Plan mit normalem Werkzeug, die Verwendung von Holz als hauptsächlichem Material, niedrige Baukosten, vorbildgetreuer Detailreichtum und interessante Funktionen. Welche historischen und technischen Grundlagen man erforschen muß, wie Rümpfe, Aufbauten und selbst die Einzelheiten der Schiffsausrüstung entstehen und wie man besondere Funktionen realisiert, all das zeigt der Autor am Beispiel dreier außergewöhnlicher Schiffsmodelle. Dabei kommen die Überlegungen zur Modellkonzeption und die Planung des Bauablaufs ebenso zur Sprache wie die konkrete Ausführung, die mit einer Fülle von praktischen Anregungen eingehend geschildert wird. In 130 Abbildungen sieht man die Schiffsmodelle heranwachsen und kann das Ergebnis staunend bewundern. Mut zum außergewöhnlichen Schiffsmodell - hier wird gezeigt, wie man es verwirklicht.

Agent Storm Morten Storm, Paul Cruickshank, Tim Lister, 2014-09-02 The true story of a jihadi convert seeking redemption in “a rollicking read and a rare insider’s account of Western spying in the age of al Qaeda” (The New York Times Book Review). Standing over six feet tall with flaming red hair, Morten Storm was an unlikely jihadi. But after a troubled youth in his native Denmark, Storm found peace and purpose in his conversion to Islam. His absolute devotion only grew after he attended a militant madrasa in Yemen, named his son Osama, and became close friends with American-born terrorist cleric Anwar al-Awlaki. Then, after a decade of jihadi life, he not only rejected extremism—he began a quest for atonement, becoming a double agent for the CIA as well as British and Danish intelligence agencies. Agent Storm takes readers inside the fanatical jihadist mindset and into the shadows of the world’s most powerful spy agencies in an action-packed account that “reads like a screenplay for a James Bond movie written by Joel and Ethan Coen” (The Washington Post).

Lend-Lease and Soviet Aviation in the Second World War Vladimir Kotelnikov, 2021-12-15 Seventy years have passed since the Second World War yet the books and articles still keep coming in a never-ending stream discussing the question of what role the deliveries of arms and materials by Soviet allies played in the victory of the Red Army. In Russia, the American Bell P-39 Airacobra fighter along with the Studebaker US6 truck and canned stewed meat became the symbols of Allied help to the USSR during the Second World War. Other aircraft which arrived to the country under the Lend-Lease program are less known but also made a valuable contribution to the victory. The author of this book for the first time has assembled a huge volume of information related to the delivery of aviation equipment from the UK and USA. Based on documents from Russian and foreign archives, museums, and veterans' recollections, the author has made a qualitative and quantitative appraisal of the influence of these deliveries upon the Soviet war effort and airpower during the conflict. The book details the routes of the aircraft deliveries to Russia, the modifications which were done in order to suit the demands of the Russian climate and specifics of their front-line use, as well as the process of the new aircraft being mastered by the units of the Red Army Air Force. The first foreign aircraft arrived in the Soviet Union with No. 151 Wing RAF in 1941, and their use expanded rapidly - they took part in the counteroffensive near Moscow, the battles for Stalingrad and the Kursk salient, and operations of the war up to the battle for Berlin and the capitulation of Japanese forces in the North China. The author includes the results of the combat assessments of the aircraft, which were done at the Scientific Testing Institute of the Air Force, as well as reports from front-line regiments, and multiple combat episodes, detailing the views of the Soviet designers and pilots on the British and American aircraft. A separate chapter provides information about the aircraft which were not officially delivered but appeared in the Soviet Union accidentally. For the first time an attempt has been made to assess the influence of the deliveries of material and equipment upon the Soviet aviation industry and war effort. The author's impressive text is supported by nearly 700 color and b/w photographs, 100 color aircraft profiles, plus maps, charts etc.

A Grammar of Contemporary Polish Oscar E. Swan, 2002

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The HMMWV Humvee Steve Parker, 2008 Provides an in-depth look at the HMMWV Humvee, with detailed cross-section diagrams, action photographs, and additional facts and information.

I Mean, Said the Sea Captain Karol Olgierd Borchardt, 2020-10-10 This is a collection of sea stories encompassing about fifteen years of the Polish Merchant Marine from the 1920s until 1939. It covers adventures on sailing ships

and transatlantic liners, until the tragic sinking of the MS Pilsudski (sometimes called the Polish Titanic), by German torpedoes off the English coast. The collection was published in Poland in 1960 and became a bestseller. It is a beautiful tale written with humor and with insight into the cultures of the exotic lands visited, now translated for the first time into English by Danuta Borchardt. She is the author's daughter, a retired psychiatrist, a writer of fiction in English, and an award-winning translator into English of Witold Gombrowicz's novels and of Cyprian Norwid's poems. She had assistance in the translation of Polish nautical terms into English by Jerzy Tarasiewicz, the author's former student.
