Cyber Law in Mexico Cristos Velasco, 2019-07-10 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in Mexico covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software

licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Mexico will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Privacy and Data Protection Law in Mexico Cristos Velasco, María Solange Maqueo, 2022-11-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to privacy and data protection law in Mexico covers every aspect of the subject, including the protection of private life as a fundamental – constitutional – right, the application of international and/or regional conventions protecting the right to privacy, privacy rights in the context of electronic communications or at the workplace, and the protection of individuals regarding the processing of personal data relating to them. Following a general introduction about the country, the monograph assembles its information and guidance in two parts: (1) protection of privacy, including national case law regarding the protection of this fundamental right, specific legislation on the confidentiality of interpersonal communications, and sector-specific rules regarding privacy protection, such as privacy rights of employees, patients, consumers or

celebrities; (2) personal data protection, including not only general rules on data quality, legitimate processing, data retention, data subject rights, security and accountability, but also specific provisions regarding the processing of health data or other sensitive personal information, further processing for research purposes, exemptions for law enforcement or national security purposes, and rules regarding liabilities, sanctions and redress.

Beyond the Valley Ramesh Srinivasan, 2020-09-01

How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca,

East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the “design labs” of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.

Bloody Minded Alex Dowsett, 2023-09-28 'A must read' Phil Liggett, MBE 'A story like no other in cycling' Ned Boulting **IMAGINE COMPETING IN THE WORLD'S MOST BRUTAL CYCLE RACES, KNOWING THAT A CRASH COULD BE FATAL** Alex Dowsett is one of Britain's greatest cyclists. He has ridden Grand Tours and Classics for elite teams including Sky and Movistar and broke the iconic World Hour Record – the ultimate time trial challenge. With humour, insight and honesty, Alex recounts his years as a pro-cyclist and the challenges he has faced in his struggle to reach the top. Alex has achieved all this despite being the only able-bodied elite sportsperson in the world with haemophilia A. He describes how the condition – in which falls can be fatal – both blighted his young sporting life, and boosted his determination to succeed. Every professional cyclist requires courage, but Alex takes fearlessness to another level in a sport where injury and suffering are a given. With an all-star cycling cast, including Bradley Wiggins, Chris Froome, Mark Cavendish and Lance Armstrong, this pulsating book lifts the lid on life in the peloton at the world's top level. From his highs – including Giro d'Italia stage victories – to his frustrations at the injustices he faced in the sport, Alex's memoir perfectly chronicles a career in which he was driven equally by love and rage. Combining Alex's personal triumphs with his unique take on being part of the golden age of British cycling, this is an unmissable tale of sporting endeavour. 'A fascinating insight into the mindset of an elite sportsman who overcame great odds to reach the very top' Simon Brotherton 'The humblest super-talent in the peloton, proving nice guys can win. A wonderful book' Carlton Kirby 'An inspiration for anyone who wants to do whatever they're told they can't.' Michael

Hutchinson 'Such an inspiring tale. Poignant and moving, and told with forthright honesty' Peter Cossins
