Hurricane Hazel in the Carolinas Jay Barnes,2010 Hurricane Hazel swept the U.S. Eastern Seaboard in mid-October 1954, eventually landing in the record books as one of the most deadly and enduring hurricanes. After punishing Haiti with mudslides that killed hundreds, Hazel edged northward, striking the Carolina coast as a ferocious category four. Landfall occurred near the South Carolina-North Carolina border, where a massive surge washed over barrier beaches and swept away hundreds of homes. Coastal communities like Myrtle Beach, Long Beach, Carolina Beach, and Wrightsville Beach caught the brunt of the storm tide and suffered heavy damages. Hazel barreled inland and battered eastern North Carolina with 100-plus mile-per-hour gusts that toppled trees and power lines and peeled away rooftops. It then raced northward, setting new wind records across seven states. In Ontario, it spawned flash floods that became the most deadly in Canadian history. When it was all over, Hazel had killed more than 1,000 and left a trail of destruction across the hemisphere. But nowhere was its impact more dramatic than in the Carolinas For more than 20 years, Tar Heel native jay Barnes has studied and written about America's hurricane history. In Hurricane Hazel in the Carolinas, he shares dozens of striking photographs from his collection along with his insights into the nature of this benchmark hurricane The Images of America series celebrates the history of neighborhoods, towns, and cities across the country. Using archival photographs, each title presents the distinctive stories from the past that shape the character of the community today. Arcadia is proud to play a part in the preservation of local heritage, making history available to all.

Lowcountry Hurricanes Walter J. Fraser, Jr.,2009-03-01 At once sobering and thrilling, this illustrated history recounts how, for the past three hundred years, hurricanes have altered lives and landscapes along the Georgia-South Carolina seaboard. A prime target for the fierce storms that develop in the Atlantic, the region is especially vulnerable because of its shallow, gradually sloping sea floor and low-lying coastline. With an eye on both natural and built environments, Fraser's narrative ranges from the first documented storm in 1686 to recent times in describing how the lowcountry has endured some of the severest effects of wind and water. This chronology of the most notable lowcountry storms is also a useful primer on the basics of hurricane dynamics. Fraser tells how the 800-ton Rising Sun foundered in open water near Charles Town during the hurricane of 1700. About one hundred persons were aboard. All perished. Drawing on eyewitness accounts, he describes the storm surge of an 1804 hurricane that submerged most of Tybee Island and swept over the fort on nearby Cockspur Island, drowning soldiers and civilians. Readers may have their own memories of Hurricanes Andrew, Opal, and Hugo. Although hurricanes frequently lead to significant loss of life, Fraser recounts numerous gripping instances of survival and rescue at sea and ashore. The author smoothly weaves the lowcountry's long social, political, and economic history with firsthand reports and data accumulated by the National Weather Service and the National Oceanic and Atmospheric Administration. Generously illustrated with contemporary and historical photographs, this is a readable and informative resource on one of nature's most awesome forces.

Hurricane Destruction in South Carolina Tom Rubillo,2006-06-01 In late September 1989, South Carolina was rocked by the colossal force of Hurricane Hugo. A category four hurricane, Hugo devastated the coast and other regions of the state, claiming dozens of lives and causing billions of dollars in damage. Hugo was the Palmetto State's most destructive natural disaster in recent memory, but the story of that storm is only part of the larger history of hurricanes in South Carolina. A History of Hurricane Destruction in South Carolina: Hell and High Water examines more than thirty major hurricanes that have struck the state since the 1800s, offering a revealing look at the destruction and loss that results from these violent manifestations of nature's power. Author Tom Rubillo brings to bear a breadth of research and incorporates first-person accounts of the storms and the struggle of survivors forced to rebuild in the wake of tremendous losses. Hell and High Water is at once a history of the damage wrought by the fury of hurricanes and a reminder that the next great storm could be no more than a season away.

Storm Chaser Jim Reed,2007-10 Reed presents a beautiful picture book about some of the most powerful--and sometimes deadly--weather phenomena in the world. He shares his best images and experiences as he tracks these storms throughout the country.

Storm-surge Forecasting J. W. Nickerson,1971 The report contains an adaptation of a unique storm-surge forecasting technique developed by Dr. C.P. Jelesnianski. This technique results in a computed storm surge profile at the inner boundary of an artificial standard basin seaward of the coast. The profile is derived from nomograms based upon a standard storm passing over a standard basin. Thumb rules and guidelines are presented in the publication for subjectively modifying the computer storm surge height as it moves shoreward of the artificial basin boundary, to fit the natural conditions of a particular coastline. Major advantages of this system are its applicability to almost any locale, its adaptability to data normally available to the field forecaster and the speed with which the forecast may be modified to remain current with natural fluctuations of the storm.

Looking Back Looking Beyond Paul O'Brien,2020-07-21 EXCERPT FROM DODGING FLORENCE...I had just settled in for a minute to check out the TV when my phone lit up - it was Debbie. Hey there, I said, What's going on?You have to think about getting out of there. I was just talking to Linda in Charleston, and she says that they expect to get hit pretty hard.I know, we are keeping an eye on things. Not supposed to come on shore until late Thursday.Well, that may be, but you may be underestimating this storm. I know you told me that there was no return flight out of Myrtle Beach, but we can pay for you to get a flight out of the nearest open airport. Damn, I said, I don't even know what that would be - and how to get there, unless maybe a bunch of us rented a van or pooled our money for some type of hotel bus.Listen, she was pretty serious, I don't want you trapped down there in a hurricane. The nearest could be Wilmington, North Carolina.Ok, all right, we are about to head out for dinner, so I will try to get a sense of what people are thinking.Paul, you don't have to be a daredevil or something - I'd rather have you home safe and sound.I know, ok, we will talk in a while. Don't worry too much now.

The Disappearance of Heather Elvis Amanda Storm,2021-07-03 Heather Elvis was a native of Horry County and she was a graduate of St. James High School in Murrells Inlet, South Carolina. After her graduation in the year 2011, Heather moved into an apartment in Carolina Forest. She shared this apartment with her best friend and coworker, Brianna Warrelmann. Heather was making a living by waitressing at the Tilter Kilt in Myrtle Beach and The House of Blue's in North Myrtle Beach. During her time as a waitress, she was pursuing her studies in cosmetology. According to Heather's father, her cosmetology license was her way of giving back, and making others feel good about themselves. Heather was leading a seemingly ordinary life up until the night of her disappearance on December 17, 2013.

Fifteen Hurricanes That Changed the Carolinas Jay Barnes,2022-03-16 This informative and engaging book tells the true stories of the hurricanes that had the greatest impact on North Carolina and South Carolina, from the eighteenth century to the present day. Hurricane historian

Jay Barnes offers an illuminating and compelling account of the Carolinas' most recent storm disasters, Matthew and Florence, as well as thirteen other memorable hurricanes in the Tar Heel and Palmetto States, including Hazel, Hugo, Fran, and Floyd. In Barnes's hands, the examination of these powerful tropical cyclones leads to a broader view of the history of the Carolinas, revealing not only their terrifying and deadly consequences but also the perseverance of the region's people in the face of such extraordinary disasters. In recounting the rich hurricane history of the Carolinas, from the mountains to the coast, Barnes urges readers to consider the storms to come and profiles how a warming planet and rising seas will affect future Carolina hurricanes.
