Compendium of community and indigenous strategies for climate change adaptation Mwenge Kahinda, J., Bahal'okwibale, P. M., Budaza, N., Mavundla, S., Nohayi, N.N., Nortje, K., Boroto, R.J.,2021-10-27 Climate change is a major challenge for life on Earth. It is mainly manifested through modifications of average temperature, rainfall intensity and patterns, winds and solar radiation. These modifications significantly affect basic resources, such as land and water resources. Populations at disproportionately higher risk of adverse consequences with global warming of 1.5°C and beyond include disadvantaged and vulnerable populations, some indigenous peoples, and local communities dependent on agricultural or coastal livelihoods (IPCC, 2018). Therefore, adaptation measures are

recommended in order to cope with climate change. Indigenous peoples have developed practices for climate change adaptation, based on their long-term experience with adverse climatic effects. There was thus a need to identify such practices as they could be effectively mainstreamed in community-based adaptation programmes. This report makes an inventory of indigenous and community adaptation practices across the world. The inventory was mainly done through literature review, field work and meetings with selected organisations. The case studies documented are categorized in five technologies and practices themes, including: (1) Weather forecasting and early warning systems; (2) Grazing and Livestock management; (3) Soil and Water Management (including cross slope barriers); (4) Water harvesting (and storage practices); (5) Forest Management (as a coping strategy to water scarcity), and; (6) Integrated wetlands and fisheries management. These were then related to the corresponding main agro-ecological zones (AEZ), namely arid, semi-arid, sub-humid, humid, highlands and coastal and wetlands. The AEZ approach was considered as an entry-point to adopting or adapting an existing indigenous strategy to similar areas. Challenges that threaten the effectiveness of indigenous and community adaption strategies were identified. These challenges include climate change itself (which is affecting the indicators and resources used by communities), human and livestock population growth (which is increasing pressure on natural resources beyond their resilience thresholds), current institutional and political settings (which limit migrants' movements and delimits pieces of usable land per household), cultural considerations of communities (such as taboos and spiritual beliefs), and the lack of knowledge transfer to younger communities. Indigenous knowledge provides a crucial foundation for community-based adaptation strategies that sustain the resilience of social-ecological systems at the interconnected local, regional and global scales. In spite of challenges and knowledge gaps, these strategies have the potential of being strengthened through the adoption

and adaptation of introduced technology from other communities or modern science. Attention to these strategies is already being paid by several donor-funded organisations, although in an uncoordinated manner.

Racing the Storm Hillary Potter,2007 On August 29, 2005, Hurricane Katrina hit land and gravely affected the lives of many people in the states along the Gulf Coast. Katrina went beyond demonstrating the devastating natural effects of a hurricane by exposing the continuing significance of race relations and racial stereotyping in U.S. society. Racing the Storm serves to highlight the race-based perceptions of and responses to Katrina survivors by governmental entities, volunteers, the media, and the general public. Scholars from a variety of disciplines take on the task of analyzing the social phenomena and racial implications surrounding Hurricane Katrina. Book jacket.

Eye of the Storm Robert Pobi,2014-08-26 Now in mass market, Rob Pobi's "heartbreaking and chilling" (Andrew Pyper) debut novel is "a Sixth Sense-like take on Thomas Harris in his prime" (National Post). A storm is coming... As a massive hurricane approaches the Eastern Seaboard, FBI consultant Jake Cole returns to Montauk to care for his father, a formerly brilliant painter deep in the grip of Alzheimer's. But soon after his arrival, another malevolent force descends on the community—a monstrous serial killer—and a brutal double homicide teaches Jake that even though he has forgotten about the past, it has not yet forgotten about him. As the killer goes after everything Jake holds sacred, he is forced to balance his efforts between protecting his family and finding a psychopath who seems as unstoppable as the storm hammering the community. Pinned between the two forces of nature, Jake learns that old secrets never really die. Published in twelve countries, Rob

Pobi's brilliant debut thriller, formerly published as Bloodman, is twisted, gritty, and utterly compelling.

Senator Albert Gore, Sr. Kyle Longley, 2004-10-25 Best remembered as the father of Vice President Al Gore, Albert Gore, Sr., worked tirelessly in politics himself, a Democratic congressman and senator from 1939 to 1971 and a representative of southern liberalism and American reformism. In the first comprehensive biography of Gore, Kyle Longley has produced an incisive portrait of a significant American political leader and an arresting narrative of the shaping of a southern and American political tradition. His research includes archival sources from across the country as well as interviews with Gore's colleagues, friends, and family. Longley describes how the native of Possum Hollow, Tennessee, became known during his political career as a maverick, a man who, according to one journalist, would rock almost anybody's boat. For his actions, Gore often paid a heavy price, personally and professionally. Overshadowed by others in Congress such as Lyndon Johnson, J. William Fulbright, Richard Russell, and Barry Goldwater, Gore nonetheless played a major role on the important issues of taxes, the Interstate Highway system, civil rights, nuclear power and arms control, and the Vietnam War. Longley situates Gore as part of a generation of politicians who matured on the messages of William Jennings Bryan, Woodrow Wilson, and Franklin Roosevelt. In the South, Gore belonged to a staunch group of liberals who battled traditional conservative forces, often within their own party. He and others such as Estes Kefauver, Frank Porter Graham, and Ralph Yarborough set the stage for subsequent generations, including that of Jimmy Carter and Jim Sasser, and later Bill Clinton, Al Gore, Jr., and John Edwards. From his career shines one encapsulating moment in 1952: squared off on the floor of the Senate against Strom Thurmond, who wanted Gore to sign the Southern Manifesto declaring southern resistance to desegregation, Gore responded simply, classically, Hell no.

Concepts and Controversies in Tidal Marsh Ecology M.P. Weinstein,Daniel A.

Kreeger,2007-05-08 In 1968 when I forsook horticulture and plant physiology to try, with the help of Sea Grant funds, wetland ecology, it didn't take long to discover a slim volume published in 1959 by the University of Georgia and edited by R. A. Ragotzkie, L. R. Pomeroy, J. M. Teal, and D. C. Scott, entitled "Proceedings of the Salt Marsh Conference" held in 1958 at the Marine Institute, Sapelo Island, Ga. Now forty years later, the Sapelo Island conference has been the major intellectual impetus, and another Sea Grant Program the major backer, of another symposium, the "International Symposium: Concepts and Controversies in Tidal Marsh Ecology". This one re-examines the ideas of that first conference, ideas that stimulated four decades of research and led to major legislation in the United States to conserve coastal wetlands. It is dedicated, appropriately, to two then young scientists - Eugene P. Odum and John M. Teal - whose inspiration has been the starting place for a generation of coastal wetland and estuarine research. I do not mean to suggest that wetland research started at Sapelo Island. In 1899 H. C. Cowles described successional processes in Lake Michigan freshwater marsh ponds. There is a large and valuable early literature about northern bogs, most of it

from Europe and the former USSR, although Eville Gorham and R. L. Lindeman made significant contributions to the American literature before 1960. V. J.

Japan Extolled and Decried C.P. Thunberg,2012-11-12 This edition makes available once again Thunberg's extraordinary writings on Japan, complete with illustrations, a full introduction and annotations. Carl Peter Thunberg, pupil and successor of Linnaeus – of the great fathers of modern science – spent eighteen fascinating months in the notoriously inaccessible Japan in 1775-1776, and this is his story. Thunberg studied at Uppsala University in Sweden where he was a favourite student of the great Linnaeus, father of modern scientific classification. He determined to travel the world and enlisted as a physician with the Dutch East India Company. He arrived in Japan in the summer of 1775 and stayed for eighteen months. He observed Japan widely, and travelled to Edo (modern Tokyo) where he became friends with the shogun's private physician, Katsuragawa Hoshû, a fine Scholar and a notorious rake. They maintained a correspondence even after Thunberg had returned to his homeland. Thunberg's 'Travels' appeared in English in 1795 and until now has never been reprinted. Fully annotated and introduced by Timon Screech.

Albert Gore, Sr. Anthony J. Badger, 2018-12-04 In chronicling the life and career of Albert Gore, Sr., historian Anthony J. Badger seeks not just to explore the successes and failures of an important political figure who spent more than three decades in the national eye—and whose son would become Vice President of the United States—but also to explain the dramatic changes in the South that led to national political realignment. Born on a small farm in the hills of Tennessee, Gore served in Congress from 1938 to 1970, first in the House of Representatives and then in the Senate. During that time, the United States became a global superpower and the South a two party desegregated region. Gore, whom Badger describes as a policy-oriented liberal, saw the federal government as the answer to the South's problems. He held a resilient faith, according to Badger, in the federal government to regulate wages and prices in World War II, to further social welfare through the New Deal and the Great Society, and to promote economic growth and transform the infrastructure of the South. Gore worked to make Tennessee the atomic capital of the nation and to protect the Tennessee Valley Authority, while at the same time cosponsoring legislation to create the national highway system. He was more cautious in his approach to civil rights; though bolder than his moderate Southern peers, he struggled to adjust to the shifting political ground of the 1960s. His career was defined by his relationship with Lyndon Johnson, whose Vietnam policies Gore bitterly opposed. The injection of Christian perspectives into the state's politics ultimately distanced Gore's worldview from that of his constituents. Altogether, Gore's political rise and fall, Badger argues, illuminates the significance of race, religion, and class in the creation of the modern South.

Strange Weather in Tokyo Hiromi Kawakami, 2017-11-01 Shortlisted for the 2013 Man Asian Literary Prize, Strange Weather in Tokyo is a story of loneliness and love that defies age. Tsukiko, thirty-eight, works in an office and lives alone. One night, she happens to meet one of her former high

school teachers, Sensei, in a local bar. Tsukiko had only ever called him Sensei (Teacher). He is thirty years her senior, retired, and presumably a widower. Their relationship develops from a perfunctory acknowledgment of each other as they eat and drink alone at the bar, to a hesitant intimacy which tilts awkwardly and poignantly into love. As Tsukiko and Sensei grow to know and love one another, time's passing is marked by Kawakami's gentle hints at the changing seasons: from warm sake to chilled beer, from the buds on the trees to the blooming of the cherry blossoms. Strange Weather in Tokyo is a moving, funny, and immersive tale of modern Japan and old-fashioned romance.

Picnic in the Storm Yukiko Motoya, 2019-07-04 A housewife takes up bodybuilding and sees radical changes to her physique - which her workaholic husband fails to notice. A boy waits at a bus stop, mocking businessmen struggling to keep their umbrellas open in a typhoon - until an old man shows him that they hold the secret to flying. A woman working in a clothing boutique waits endlessly on a customer who won't come out of the fitting room - and who may or may not be human. A newlywed notices that her husband's features are beginning to slide around his face - to match her own. In these eleven stories, the individuals who lift the curtains of their orderly homes and workplaces are confronted with the bizarre, the grotesque, the fantastic, the alien - and, through it, find a way to liberation. Winner of the Kenzaburo Oe Prize, *Picnic in the Storm* is the English-language debut of one of Japan's most fearless young writers.
