Politics and the Internet in Comparative Context Paul Nixon, Rajash Rawal, Dan

Mercea, 2013-07-24 For many years now we have witnessed the developing use of the internet and associated technologies by political actors and organisations. Claims and counter claims have been made as to its suitability as a tool to help in the struggle to re-invigorate political participation in democracies across the globe has been contested. This book charts the shifting sands of political activity in the digital age. It interrogates the hybrid nature of modern politics as online and offline actions blur the boundaries of traditional politics between 'real-life' co-presence and the booming virtual domain of politics. By so doing, it critically reflects on the latest scholarship on the subject while concurrently advancing stimulating new insights into it. Encapsulating both the range and the diverse velocities of change in different political arenas and geographical locations, this volume seeks to map out a path if not towards the politics of tomorrow then towards a better comprehension of the politics of today. Featuring a range of international and comparative case studies presenting research on the UK,

US, Italy, France, Spain, Romania, Africa and China, this book will be of interest to students and scholars of Politics and Media, Political Communication, New Media studies, Public Administration, Sociology, Communication Studies, Computing and Information and Communications Technologies.

Advances in Plant Breeding Strategies: Vegetable Crops Jameel M. Al-Khayri, S. Mohan Jain, Dennis V. Johnson, 2021-08-24 This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding, in individual crops, for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production, enhanced food security, in addition to providing raw materials for innovative industrial products and pharmaceuticals. This Volume 8, subtitled Vegetable Crops: Bulbs, Roots and Tubers, consists of 12 chapters focusing on advances in breeding strategies using both traditional and modern approaches for the improvement of individual vegetable crops. Chapters are arranged in 3 parts according to the edible vegetable parts. Part I: Bulbs - Garlic (*Allium sativum* L.), Leek (*Allium ampeloprasum* L.) and Shallot (*Allium cepa* L. *Aggregatum* group); Part II: Roots -

Beetroot (*Beta vulgaris* ssp. *vulgaris* var. *conditiva* Alefeld), Carrot (*Daucus carota* L.), Parsnip (*Pastinaca sativa* L.), Radish (*Raphanus sativus* L.), Sugar beet (*Beta vulgaris* ssp. *vulgaris* L.) and Turnip (*Brassica rapa* var. *rapa* L.), Part III: Tubers - Potato (*Solanum tuberosum* L.) and Sweet potato (*Ipomea batatas* L.). The chapters were contributed by 38 internationally reputable scientists from 13 countries. Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience.

The Endtimes of Human Rights Stephen Hopgood, 2013-10-04 We are living through the endtimes of the civilizing mission. The ineffectual International Criminal Court and its disastrous first prosecutor, Luis Moreno-Ocampo, along with the failure in Syria of the Responsibility to Protect are the latest pieces of evidence not of transient misfortunes but of fatal structural defects in international humanism. Whether it is the increase in deadly attacks on aid workers, the torture and 'disappearing' of al-Qaeda suspects by American officials, the flouting of international law by states such as Sri Lanka and Sudan, or the shambles of the Khmer Rouge tribunal in Phnom Penh, the prospect of one world under secular

human rights law is receding. What seemed like a dawn is in fact a sunset. The foundations of universal liberal norms and global governance are crumbling.—from *The Endtimes of Human Rights* In a book that is at once passionate and provocative, Stephen Hopgood argues, against the conventional wisdom, that the idea of universal human rights has become not only ill adapted to current realities but also overambitious and unresponsive. A shift in the global balance of power away from the United States further undermines the foundations on which the global human rights regime is based. American decline exposes the contradictions, hypocrisies and weaknesses behind the attempt to enforce this regime around the world and opens the way for resurgent religious and sovereign actors to challenge human rights. Historically, Hopgood writes, universal humanist norms inspired a sense of secular religiosity among the new middle classes of a rapidly modernizing Europe. Human rights were the product of a particular worldview (Western European and Christian) and specific historical moments (humanitarianism in the nineteenth century, the aftermath of the Holocaust). They were an antidote to a troubling contradiction—the coexistence of a belief in progress with horrifying violence and

growing inequality. The obsolescence of that founding purpose in the modern globalized world has, Hopgood asserts, transformed the institutions created to perform it, such as the International Committee of the Red Cross and recently the International Criminal Court, into self-perpetuating structures of intermittent power and authority that mask their lack of democratic legitimacy and systematic ineffectiveness. At their best, they provide relief in extraordinary situations of great distress; otherwise they are serving up a mixture of false hope and unaccountability sustained by “human rights” as a global brand. The Endtimes of Human Rights is sure to be controversial. Hopgood makes a plea for a new understanding of where hope lies for human rights, a plea that mourns the promise but rejects the reality of universalism in favor of a less predictable encounter with the diverse realities of today’s multipolar world.

Routledge Handbook of Energy Transitions Kathleen M. Araújo, 2022-12-30 The Routledge Handbook of Energy Transitions draws upon a unique and multidisciplinary network of experts from around the world to explore the expanding field of energy transitions. This Handbook recognizes that

considerable changes are underway or are being developed for the modes in which energy is sourced, delivered, and utilized. Employing a sociotechnical approach that accounts for economics and engineering, as well as more cross-cutting factors, including innovation, policy and planning, and management, the volume considers contemporary ideas and practices that characterize the field. The book explores pressing issues, including choices about infrastructure, the role of food systems and materials, sustainability, and energy democracy. Disruption is a core theme throughout, with the authors examining topics such as digitalization, extreme weather, and COVID-19, along with regional similarities and differences. Overall, the Routledge Handbook of Energy Transitions advances the field of energy transitions by connecting ideas, taking stock of empirical insights, and challenging how we think about the theory and practice of energy systems change. This innovative volume functions as an authoritative roadmap with both regional and global relevance. It will be an essential resource for students, policymakers, researchers, and practitioners researching and working in the fields of energy transitions, planning, environmental management and policy, sustainable business, engineering,

science and technology studies, political science, geography, design anthropology, and environmental justice. “With the exception of Chapter 26, no part of this book may be reprinted or reproduced or utilised in any form or by any electronic, mechanical, or other means, now known or hereafter invented, including photocopying and recording, or in any information storage or retrieval system, without permission in writing from the publishers.” Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons [Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND)] 4.0 license.

Citrus Production Sajjad Hussain, Muhammad Fasih Khalid, Muhammad Arif Ali, Niaz Ahmed, Mirza

Hasanuzzaman, Shakeel Ahmad, 2022-12-29 The citrus industry is one of the world's most important fruit production industries, but global climate change, pests, diseases, and improper handling are affecting plant yields. *Citrus Production: Technological Advancements and Adaptation to Changing Climate* presents information on advancements in the citrus industry examining various aspects of citrus from its production to harvest. It looks at the challenges and approaches in stress tolerance improvements, increasing citrus crop productivity, and reducing postharvest losses. The book details taxonomy, genetic diversity, and metabolic and molecular responses in citrus crops, as well as abiotic and biotic stresses affecting citrus production. Featuring numerous full-color illustrations throughout, this book poses new harvesting techniques along with postharvest physiology of citrus fruits, devising strategies to prevent crop losses. *Citrus Production: Technological Advancements and Adaptation to Changing Climate* is an essential resource for researchers, academicians, and scientists looking to expand their knowledge of citrus, particularly horticulturists, food scientists, and botanists.

The Beans and the Peas Aditya Pratap, Sanjeev Gupta, 2020-11-22 *The Beans and the Peas*:

From Orphan to Mainstream Crops presents a comprehensive literature resource on the most important food legume crops previously known as orphans, but which are increasingly becoming mainstream as their production opportunities have been improved through genetic improvement and biotechnology, and their role as an important nutrient source gains urgency. This book focuses on 12 important food legumes and discusses all relevant aspects on their economic importance, crop statistics, botany, and their general description. It also provides exhaustive information on plant genetic resources and their use, genetic improvement, resistance to biotic and abiotic stresses, improved varieties, agronomy, seed system, and use of information and communication tools in each individual food legume. Development of innovative biotechnological tools, genetic transformation, and the genome sequencing information has also been covered in each chapter providing the readers with state-of-the-art information on pulses. All chapters have been supported by relevant figures, illustrations, and tables, which make the contents accessible and easy to understand. Each of the chapters has been authored by globally known scientists/researchers presenting up-to-date information on various aspects

of food legumes. This book provides a current and comprehensive treatise to the readers and will be tremendously helpful in furthering their academic and research pursuits. Provides a single-volume resource on the most important food legumes having a prominent role in food and nutritional security Written by experts with a focus on providing foundational information for further research and development Presents both theoretical aspects and application-based case studies Supported by relevant figures, illustrations, and tables

Team Geek Brian W. Fitzpatrick, Ben Collins-Sussman, 2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human

factors have as much influence on the outcome as technical factors. Even if you've spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

The ABC of XYZ Mark McCrindle, 2011 Based on more than a decade of research, *The ABC of XYZ* is designed for educators, business managers and parents who want a short and lively introduction to Australia's living generations. The book explores what a generation is, how its definition has changed over the years, and the trends that are emerging for the future. It examines generational conflicts in the school, home and workplace, and the ways in which they can be understood and resolved, and what might be beyond Z. Written by one of Australia's foremost social researchers, this revised edition of *The ABC of XYZ* reveals the truth behind the labels and is essential reading for

anyone interested in how our current generations live, learn and work.--Cover.

Mitigation of Greenhouse Gas Emissions in Livestock Production Pierre J. Gerber,Benjamin Henderson,Harinder P. S. Makkar,2013 The current analysis was conducted to evaluate the potential of nutritional, manure and animal husbandry practices for mitigating methane (CH₄) and nitrous oxide (N₂O) - i.e. non-carbon dioxide (CO₂) - GHG emissions from livestock production. These practices were categorized into enteric CH₄, manure management and animal husbandry mitigation practices. Emphasis was placed on enteric CH₄ mitigation practices for ruminant animals (only in vivo studies were considered) and manure mitigation practices for both ruminant and monogastric species. Over 900 references were reviewed; simulation and life cycle assessment analyses were generally excluded

Plant Mutation Breeding and Biotechnology Q. Y. Shu,Brian P. Forster,H. Nakagawa,Hitoshi

Nakagawa,2012 Abstract: This book presents contemporary information on mutagenesis in plants and its applications in plant breeding and research. The topics are classified into sections focusing on the concepts, historical development and genetic basis of plant mutation breeding (chapters 1-6); mutagens and induced mutagenesis (chapters 7-13); mutation induction and mutant development (chapters 14-23); mutation breeding (chapters 24-34); or mutations in functional genomics (chapters 35-41). This book is an essential reference for those who are conducting research on mutagenesis as an approach to improving or modifying a trait, or achieving basic understanding of a pathway for a trait --.

Advances in Plant Breeding Strategies: Breeding, Biotechnology and Molecular Tools Jameel M. Al-Khayri,Shri Mohan Jain,Dennis V. Johnson,2016-02-02 The basic concept of this book is to examine the use of innovative methods augmenting traditional plant breeding towards the development of new crop varieties under different environmental conditions to achieve sustainable food production. This book consists of two volumes: Volume 1 subtitled Breeding, Biotechnology and Molecular Tools and

Volume 2 subtitled Agronomic, Abiotic and Biotic Stress Traits. This is Volume 1 which consists of 21 chapters covering domestication and germplasm utilization, conventional breeding techniques and the role of biotechnology. In addition to various biotechnological applications in plant breeding, it includes functional genomics, mutations and methods of detection, and molecular markers. In vitro techniques and their applications in plant breeding are discussed with an emphasis on embryo rescue, somatic cell hybridization and somaclonal variation. Other chapters cover haploid breeding, transgenics, cryogenics and bioinformatics.

All Art is Ecological Timothy Morton, 2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. Provocative and playful, *All Art is Ecological* explores the strangeness of living in an age of mass extinction, and shows us that emotions and experience are the basis for a deep philosophical engagement with ecology. Over the past 75 years, a new canon has

emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Prison Tattoos Douglas Kent Hall, 1997-03-15 In prison, the tattoo stakes a claim to individuality. In *Prison Tattoos*, Douglas Hall Kent uses his camera as a sociologist's tool, photographing inmates from America's prisons whose tattoos, professionally done and homemade, indelibly imprint on their bodies what these men desire in their souls: autonomy and identity. Includes 80 pages of photos and a page of temporary tattoos.

This Can't Be Happening George Monbiot, 2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. In the galvanising speeches and essays brought together in *This Can't Be Happening*, George Monbiot calls on humanity to stop averting its gaze from the

destruction of the living planet, and wake up to the greatest predicament we have ever faced. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Breeding Field Crops John M. Poehlman, 2013-04-17 While preparing the first edition of this textbook I attended an extension short course on writing agricultural publications. The message I remember was select your audience and write to it. There has never been any doubt about the audience for which this textbook was written, the introductory course in crop breeding. In addition, it has become a widely used reference for the graduate plant-breeding student and the practicing plant breeder. In its preparation, particular attention has been given to advances in plant-breeding theory and their utility in plant-breeding practice. The blend of the theoretical with the practical has set this

book apart from other plant-breeding textbooks. The basic structure and the objectives of the earlier editions remain unchanged. These objectives are (1) to review essential features of plant reproduction, Mendelian genetic principles, and related genetic developments applicable in plant-breeding practice; (2) to describe and evaluate established and new plant-breeding procedures and techniques, and (3) to discuss plant breeding objectives with emphasis on the importance of proper choice of objective for achieving success in variety development. Because plant-breeding activities are normally organized around specific crops, there are chapters describing breeding procedures and objectives for the major crop plants; the crops were chosen for their economic importance or diversity in breeding systems. These chapters provide a broad overview of the kinds of problems with which the breeder must cope.

The Democracy of Species Robin Wall Kimmerer, 2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. In The Democracy of Species Robin Wall Kimmerer guides us towards a more reciprocal, grateful and joyful relationship with our animate earth,

from the wild leeks in the field to the deer in the woods. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.
