**Coming Up Roses** Staci Hart, 2019-07-25 Everyone hates parts of their job. Maybe it's the paperwork. Maybe it's the day-to-day grind. Maybe it's that client who never knows what they want, or the guy who always cooks fish in the microwave. But not me. I love every corner of the Longbourne Flower Shop, every flower, every petal, every stem. I love the greenhouse, and I love Mrs. Bennet, my boss. I love creating, and I love being a florist. I don't hate anything at all. Except for Luke Bennet. The Bennet brothers have come home to help their mom save the flower shop, and Luke is at the helm. His smile tells a tale of lust, loose and easy. He moves with the grace of a predator, feral and wild. A thing unbridled, without rules or constraint. When he comes home to save Longbourne, I almost can't be mad at him. Almost. He doesn't remember that night I'll never forget. That kiss, touched with whiskey and fire. It branded me like a red-hot iron. But it meant nothing to him. Everyone hates part of their job, and I hate Luke Bennet. Because if I don't, I'll fall in love with him.

**100 Japanese Gardens** Stephen Mansfield, 2019-03-26 100 Japanese Gardens is an ambitious attempt to profile the finest gardens in Japan, while also highlighting lesser known, but equally accomplished landscapes in less-visited parts of the country. A celebration of Japanese landscape design, this book features gardens from Kyoto and Tokyo, as well as from the sub-arctic island of Hokkaido and the semi-tropical islands of Okinawa. Author Stephen Mansfield traveled the length and breadth of Japan on a quest to identify the most impressive gardens in this vast and culturally varied archipelago. His erudition and love of the Japanese garden shines through on every page, making this the perfect primer for travel to Japan or an enjoyable armchair read for gardening enthusiasts. Mansfield's insightful descriptions of each garden examine design concepts and principles, space management, compositional elements, and the iconographic and metaphysical role of Shinto and Buddhist influences. Through his exquisite visuals and engaging stories, we experience Japanese garden designs not merely as landscapes, but as large-scale art installations.

**Hiroshige's Japan** Philippe Delord, 2021-10 Journey along the famed Tokaido Road--an ancient thoroughfare with a modern twist. The Fifty-Three Stations of the Tokaido is the best-known work of the great 19th century Japanese woodblock artist Utagawa Hiroshige. The series of 53 masterful woodblock prints depicts stops along the ancient Tokaido road--which, from the eleventh to the nineteenth century, was the main thoroughfare between Tokyo and Kyoto. Though the road itself is now submerged under Japan's twenty-first-century urban landscape, French artist Philippe Delord set out to see if he could find the original locations, with just a moped, sketchbook, watercolors and a book of Hiroshige's prints. Hiroshige's Japan allows readers to make the journey alongside Delord, venturing from Tokyo and Mount Fuji to mountain passes and rugged coastlines. Inside are all 53 original scenery prints made by Hiroshige, alongside their modern-day equivalent by Delord. A lively commentary about his experiences as he tries to locate each of the 53 scenes (without speaking Japanese!) offers readers an insightful, and often humorous, look into both modern and historical Japan. Part travelogue, part work of art, this book is sure to delight armchair travelers, history buffs, art enthusiasts and Japanophiles alike!

**Tokyo on Foot** Florent Chavouet, 2012-10-23 This prize-winning book is both an illustrated tour of a Tokyo rarely seen in Japan travel guides and an artist's warm, funny, visually rich, and always entertaining graphic memoir. Florent Chavouet, a young graphic artist, spent six months exploring Tokyo while his girlfriend interned at a company there. Each day he would set forth with a pouch full of color pencils and a sketchpad, and visit different neighborhoods. This stunning book records the city that he got to know during his adventures. It isn't the Tokyo of packaged tours and glossy guidebooks, but a grittier, vibrant place, full of ordinary people going about their daily lives and the scenes and activities that unfold on the streets of a bustling metropolis. Here you find businessmen and women, hipsters, students, grandmothers, shopkeepers, policemen, and other urban types and tribes in all manner of dress and hairstyles. A temple nestles among skyscrapers; the corner grocery anchors a diverse assortment of dwellings, cafes, and shops--often tangled in electric lines. The artist mixes styles and tags his pictures with wry comments and observations. Realistically rendered advertisements or posters of pop stars contrast with cartoon sketches of iconic objects or droll vignettes, like a housewife walking her pet pig, a Godzilla statue in a local park, and an urban fishing pond that charges 400 yen per half hour. This very personal guide to Tokyo is organized by neighborhood with hand-drawn maps that provide an overview of each neighborhood, but what really defines them is what caught the artist's eye and attracted his formidable drawing talent. Florent Chavouet begins his introduction by observing that, Tokyo is said to be the most beautiful of ugly cities. With wit, a playful sense of humor, and the multicolor pencils of his kit, he sets aside the question of urban ugliness or beauty and captures the Japanese essence of a great city in this truly vital portrait.

**Profiles in Operations Research** Arjang A. Assad, Saul I. Gass, 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements--OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals--interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [sic] the pioneers of O.R. for many years to come. \*For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.
