Diagnostic Report of the National Hurricane Center ,1988

The National STORM Program University Corporation for Atmospheric Research,1983

National Weather Service Observing Handbook United States. National Weather Service,1995

Tropical Storm Allison United States. National Weather Service,2001 Tropical Storm Allison was the most costly tropical storm in U.S. history. While the storm impacted a large part of the country, worst hit was southeast Texas and southern Louisiana. In these two areas alone, there were 24 fatalities and more than $5 billion in damage. Due to the magnitude of this flooding event, a service assessment team was dispatched to examine the warning and forecast services provided by the National Weather Service (NWS) to emergency managers, flood control/public works agencies, and the public in southeast Texas and southern Louisiana. Service assessments provide a valuable contribution to our ongoing efforts to improve the quality and timeliness of our products and services for the protection of life and property. Findings and recommendations from this assessment will help to improve techniques, products, and services--Preface.

What Stands in a Storm Kim Cross,2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America’s biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it’s a story of survival; for others it’s the story of their last hours. Cross’s immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas,

where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that’s just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

Storm Data ,1980

Storm Warning Nancy Mathis,2008-03-04 Veteran journalist Mathis has produced a compulsively readable account of one of the most terrible tornadoes in history--a mile-wide F5 twister--and the extraordinary people who kept it from becoming the deadliest.

The Widespread Tornado Outbreak of April 3-4, 1974 United States. National Oceanic and Atmospheric Administration. Natural Disaster Survey Team,1974 The widespread tornado outbreak of April 3-4, 1974, led to the formation of a National Oceanic and Atmospheric Administration survey team to review the effectiveness of NOAA's tornado warning services. This Natural Disaster Survey Team was formed by the evening of April 4. This report describes the tornado outbreak and presents the findings and recommendations of the survey team--Foreword.

Embark on a transformative journey with Explore the World with is captivating work, Discover the Magic in **Ncc&sortm** .
