While the storm impacted a large part of the country, worst hit was southeast Texas and southern Louisiana. In these two areas alone, there were 24 fatalities and more than \$5 billion in damage. Due to the magnitude of this flooding event, a service assessment team was dispatched to examine the warning and forecast services provided by the National Weather Service (NWS) to emergency managers, flood control/public works agencies, and the public in southeast Texas and southern Louisiana. Service assessments provide a valuable contribution to our ongoing efforts to improve the quality and timeliness of our products and services for the protection of life and property.
