Benjamin Now Kevin McLaughlin, Philip Rosen, 2003 *The Arcades Project* is the unfinished, final work of influential cultural theorist, critic, and historian Walter Benjamin. Until 1999, this huge, unruly manuscript, which provides a more complete picture of the diversity of Benjamin's work than formerly available, had not been fully translated into English. *Benjamin Now* is the first collection of essays in English to focus on *The Arcades Project*. While this essential text's title refers to its ostensible subject--the nineteenth-century shopping arcades of Paris--*The Arcades Project* is a mass of cultural, political, and social material presented in the form of a vast montage. *Benjamin Now* reconsiders the significance of his theories and writings in light of this final project. The contributors gathered in this special issue--several of whom participated in the translation of *The Arcades Project*--include leading scholars from modern culture and media studies, comparative literature and literary studies, art history, philosophy, cultural studies, and film studies. Contributors. T. J. Clark, Howard Eiland, Peter Fenves, Tom Gunning, Michael Jennings, Claudia Brodsky Lacour, Kevin McLaughlin, Philip Rosen, Henry Sussman, Lindsay Waters, Samuel Weber, Peter Wollen

Javascript-mancy Jaime Gonzalez Garcia, 2016-09-08 Are you a C# developer curious about the awesome things happening in the JavaScript world? Would you like to be a part of it? Build super rich web applications, mobile apps, backend services or even robots? Does JavaScript frustrate you? Then this is the book for you! With this book you'll get a great introduction to JavaScript and ES6 from a C# perspective. You'll learn the most common pitfalls and weird behaviors and end up enjoying writing JavaScript just as much as you do C#. And it has wizards! Imagine... imagine you lived in a world where you could use JavaScript to change the universe around you, to tamper with the threads that compose reality as you know it and do anything that you can imagine. Well, welcome to the world of JavaScript-mancy, where wizards, also known as JavaScriptmancers, control the arcane winds of magic wielding JavaScript to and fro and command the very fabric of reality. We, programmers, sadly do not live in such a world. But we do have a measure of magic in ourselves, we have the skills and power to create things out of nothingness. And even if we cannot throw fireballs or levitate (yet), we can definitely change/improve/enhance reality and the universe around us with our little creations. Ain't that freaking awesome? Well, I hope this book inspires you to continue creating, and using this beautiful skill we share, this time, with JavaScript;). This is the first book of the JavaScript-mancy series. Within its mysterious pages you'll find: * A great introduction to the JavaScript language full of fantasy inspired examples and exercises * A detailed look at the new and awesome

ES6 features in a historical context, highlighting why they exist and which problems they're trying to solve * A lot of references to C# that will make it super easy for C# developers to wrap their heads around JavaScript and its quirks. (This also extends to developers familiar with strongly typed languages) * A breathtaking story of EPIC proportions and awkward sense of humor...

Java XML and JSON Jeff Friesen,2019-01-10 Use this guide to master the XML metalanguage and JSON data format along with significant Java APIs for parsing and creating XML and JSON documents from the Java language. New in this edition is coverage of Jackson (a JSON processor for Java) and Oracle's own Java API for JSON processing (JSON-P), which is a JSON processing API for Java EE that also can be used with Java SE. This new edition of Java XML and JSON also expands coverage of DOM and XSLT to include additional API content and useful examples. All examples in this book have been tested under Java 11. In some cases, source code has been simplified to use Java 11's var language feature. The first six chapters focus on XML along with the SAX, DOM, StAX, XPath, and XSLT APIs. The remaining six chapters focus on JSON along with the mJson, GSON, JsonPath, Jackson, and JSON-P APIs. Each chapter ends with select exercises designed to challenge your grasp of the chapter's content. An appendix provides the answers to these exercises. What You'll Learn Master the XML language Create, validate, parse, and transform XML documents Apply Java's SAX, DOM, StAX, XPath, and XSLT APIs Master the JSON format for serializing and transmitting data Code against third-party APIs such as Jackson, mJson, Gson, JsonPath Master Oracle's JSON-P API in a Java SE context Who This Book Is For Intermediate and advanced Java programmers who are developing applications that must access data stored in XML or JSON documents. Environmental Geoinformatics Joseph L. Awange,John B. Kyalo Kiema,2013-06-13 There is no doubt that today, perhaps more than ever before, humanity faces a myriad of complex and demanding challenges. These include natural resource depletion and environmental degradation, food and water insecurity, energy shortages, diminishing biodiversity, increasing losses from natural disasters, and climate change with its associated potentially devastating consequences, such as rising sea levels. These human-induced and natural impacts on the environment need to be well understood in order to develop informed policies, decisions, and remedial measures to mitigate current and future negative impacts. To achieve this, continuous monitoring and management of the environment to acquire data that can be soundly and rigorously analyzed to provide information about its current state and changing patterns, and thereby allow predictions of possible future impacts, are essential. Developing pragmatic and sustainable solutions to address these and many other similar challenges requires the use of geodata and the application of geoinformatics. This book presents the concepts and applications of geoinformatics, a

multidisciplinary field that has at its core different technologies that support the acquisition, analysis and visualization of geodata for environmental monitoring and management. We depart from the 4D to the 5D data paradigm, which defines geodata accurately, consistently, rapidly and completely, in order to be useful without any restrictions in space, time or scale to represent a truly global dimension of the digital Earth. The book also features the state-of-the-art discussion of Web-GIS. The concepts and applications of geoinformatics presented in this book will be of benefit to decision-makers across a wide range of fields, including those at environmental agencies, in the emergency services, public health and epidemiology, crime mapping, environmental management agencies, tourist industry, market analysis and e-commerce, or mineral exploration, among many others. The title and subtitle of this textbook convey a distinct message. Monitoring -the passive part in the subtitle - refers to observation and data acquisition, whereas management - the active component - stands for operation and performance. The topic is our environment, which is intimately related to geoinformatics. The overall message is: all the mentioned elements do interact and must not be separated. Hans-Peter Bahr, Prof. Dr.-Ing. Dr.h.c., Karlsruhe Institute of Technology (KIT), Germany.

African Footballers in Europe Ernest Yeboah Acheampong, Malek Bouhaouala, Michel Raspaud, 2019-09-30 African Footballers in Europe traces the social and economic evolution of African football and examines the strategies and resources that players mobilise in their migrations, with a particular focus on 'Give Back Behaviours' (how players contribute to their countries or communities of origin). It shines new light on contemporary migrations, labour markets in sport, and processes of development in Africa. Using a multidisciplinary approach and Weberian methodology to analyse players' 'Give Back' behaviour, the book highlights the complex rationale behind this behaviour, based on a combination of social, cultural, and economic elements. It features interviews with former and current African professional players, providing a vivid picture of the role of communities in players' migration projects, the allure of the European football market, and investment initiatives that can contribute to local and regional development. This is a vital read for academics, researchers, and students of sport sciences, sociology of sport, sport management, sociology, geography, political sciences, management, sociology of Africa, migration studies, sociology of the labour market, and economic sociology. It is also an important resource for professional organisations, NGOs, football agents, football administrators, federations, confederations, and governments.

Alone Together Lawrence Roman, 1985 In the hilarious Broadway comedy, Alone Together, Mom and Dad have spent the last thirty years raising three active sons. How they looked forward to the peace, the quiet and the privacy of an empty nest. After considerable comic turmoil and revelation of deep feelings, the nest is finally emptied. Peace now? Quiet? Not for long. The empty nest fills up again by the sudden, unexpected arrival of their parents, each with a problem which is dumped on Mom and Dad. How to empty the nest once again so Mom and Dad can be alone together. Cleverly comic, witty and wise. Alone Together Again has delighted audiences in Europe as well as the U.S.-- Publisher's website.

Scars, Marks & Tattoos Jacqueline Caruso, 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). Engage Tb: Integrating Community-Based Tuberculosis Activities Into the Work of Nongovernmental and Other Civil Society Organizat World Health Organization, 2015-04-20 Tuberculosis (TB) affected an estimated 8.7 million people and caused 1.4 million deaths globally in 2011, including 0.5 million women and at least 64 000 children. About 13% of TB occurs among people living with HIV, and TB causes almost a quarter of AIDS deaths. There is evidence of links between TB and noncommunicable diseases such as diabetes mellitus and with determinants of ill-health like tobacco and drug use, alcoholism and malnutrition. TB mostly affects the productive segment of society in their prime. One third of people estimated to have TB are either not reached for diagnosis and treatment by the current health systems or are not being reported. Even in patients who are identified, TB is often diagnosed and treated late. In order to reach the unreached and to find TB patients early in the course of their illness, a wider range of stakeholders already involved in community-based activities needs to be engaged. These include the nongovernmental organizations (NGOs) and other civil society organizations (CSOs) that are active in community-based development, particularly in primary health care, HIV infection and maternal and child health, but have not

yet included TB in their priorities and activities. NGOs and other CSOs are non-profit organizations that operate independently from the state and from the private for-profit sector. They include a broad spectrum of entities such as international, national and local NGOs, community-based organizations (CBOs), faith-based organizations (FBOs), patient-based organizations and professional associations. CBOs are membership-based non-profit organizations that are usually self-organized in specific local areas (such as a village) to increase solidarity and mutual support to address specific issues. For example, these include HIV support groups, women's groups, parent-teacher associations and micro-credit village associations. CBO membership is comprised entirely of community members themselves, so these organizations can be considered to represent the community most directly. NGOs and other CSOs engage in activities that range from community mobilization, service delivery, and technical assistance to research and advocacy. The strengths of NGOs and other CSOs active in health care and other development interventions at the community level include their reach and spread and their ability to engage marginalized or remote groups. These organizations have a comparative advantage because of their understanding of the local context. Greater collaboration between NGOs and other CSOs and local and national governments could greatly enhance development outcomes. A more decentralized approach that formally recognizes the critical role of NGOs and other CSOs as partners addressing gaps through support to community-based actions will expand TB prevention, diagnosis, treatment and care activities. Community-based TB activities cover a wide range of activities contributing to prevention, diagnosis, improved treatment adherence and care that positively influence the outcomes of drug-sensitive, drug resistant and HIV-associated TB. The activities also include community mobilization to promote effective communication and participation among community members to generate demand for TB prevention, diagnosis, treatment and care services. While diagnostic tests for TB continue to be performed in clinical settings, for lack of simpler diagnostic methods, community-based TB activities are conducted outside the premises of formal health facilities (e.g. hospitals, health centres and clinics) in community-based structures (e.g. schools, places of worship, congregate settings) and homesteads. Such community-based TB activities could and should be integrated with other community-based activities supporting primary health care services, including those for HIV infection, maternal and child health and noncommunicable diseases to improve synergy and impact. Community-based TB activities utilize community structures and mechanisms through which community members, CBOs and groups interact, coordinate and deliver their responses to the challenges and needs affecting their communities.--Page 1.
