A major snow storm covering most of the northern states isn't that unusual. One that stays for months on end is very unusual—and it's a killer. Parker is an easygoing young man who has had every advantage in life, including wealthy parents who have given him everything he's ever wanted. But after agreeing to live in the woods of northern Michigan for a year, he soon finds that kind of spoiled life has not prepared him for life off-grid—in the woods—in the ruthless wintertime. But with the help of the teenaged boy next door, he begins to learn how to survive in the woods, and just in time. A winter storm of unprecedented magnitude is bearing down on them, and it will take everything they have to make it out alive.

Blizzard H. W. "Buzz" Bernard, 2015-02-16 Everyone laughs at what southerners call a snowstorm. A half-inch of the white stuff, and Atlanta panics. No one's laughing this time. A freakish combination of weather elements surpasses even the experts' predictions. Suddenly much of the upper South is covered in several feet of snow. There's never been a storm like this in the region before. Never in recorded history. For Atlanta executive J.C. Riggins, the storm is only one of the killers he'll have to face. In a desperate bid to save his job, his company, and quite possibly his young son's life, Riggins must transport a defense contract to North Carolina. The deadline can't be missed. With airports and roads closed, Riggins sets out in an SUV through a stunned countryside where no one can help him if trouble happens. Which it does, the moment a dangerous criminal joins him for the ride. H.W. Buzz Bernard is an Air Force veteran and retired Weather Channel meteorologist. His 2010 hurricane thriller, Eyewall, became a number one

bestseller in ebook. Visit him at buzzbernard.com.

White Death - Blizzard of '77 Erno Rossi, 1999 The Blizzard of 1977 was a deadly blizzard that hit the Western N.Y. state area upstate New York and Southern Ontario from January 28 to February 1, 1977. Daily peak wind gusts ranging from 46 to 69 mph were recorded by the National Weather Service Buffalo Office, with snowfall as high as 100 in recorded in areas, and the high winds blew this into drifts of 30 to 40 ft. There were 23 total storm-related deaths in western New York, with 5 more in northern New York. Certain pre-existing weather conditions exacerbated the blizzard's effects. November, December and January average temperatures were much below normal. Lake Erie froze over by December 14; an ice-covered Lake Erie usually puts an end to lake-effect snow because the wind cannot pick up moisture from the lake's surface, convert the moisture to snow and then dump it when the winds reach shore. Lake Erie was covered by a deep, powdery snow; January's unusually cold conditions limited the usual thawing and refreezing, so the snow on the frozen lake remained powdery. The drifted snow on roadways was difficult to clear because the strong wind packed the snow solidly.
