I'm The Biggest Thing in the Ocean! Kevin

Sherry,2010-05-13 When a giant squid takes inventory of all of the creatures in the ocean, he realizes that he's way bigger than most of them! Of course, there are bigger things lurking around . . . but maybe this giant squid with a giant touch of hubris doesn't really care? First-time author-illustrator Kevin Sherry is sure to garner fans of all sizes for his perfect-for-preschool read-aloud with simple text, bold and delightful collage art, and a lovable squid whose spirit just cannot be crushed.

*The Ocean Calls* Tina Cho,2020-08-04 A breathtaking picture book featuring a Korean girl and her haenyeo (free diving) grandmother about intergenerational bonds, finding courage in the face of fear, and connecting with our natural world. Dayeon wants to be a haenyeo just like Grandma. The haenyeo dive off the coast of Jeju Island to pluck treasures from the sea--generations of Korean women have done so for centuries. To Dayeon, the haenyeo are as strong and graceful as mermaids. To give her strength, Dayeon eats Grandma's abalone porridge. She practices holding her breath while they do the dishes. And when Grandma suits up for her next dive, Dayeon grabs her suit, flippers, and goggles. A scary memory of the sea keeps Dayeon clinging to the shore, but with Grandma's guidance, Dayeon comes to appreciate the ocean's many gifts. Tina Cho's *The Ocean Calls*, with luminous illustrations by muralist Jess X. Snow, is a classic in the making.

**Life in the Ocean** Claire A. Nivola,2012-03-13 Sylvia Earle first lost her heart to the ocean as a young girl when she discovered the wonders of the Gulf of Mexico in her backyard. As an adult, she dives even deeper. Whether she's designing submersibles, swimming with the whales, or taking deep-water walks, Sylvia Earle has dedicated her life to learning more about what she calls the blue heart of the planet. With stunningly detailed pictures of the wonders of the sea, Life in the Ocean tells the story of Sylvia's growing passion and how her ocean exploration and advocacy have made her known around the world. **Imperiled Ocean** Laura Trethewey,2019-11-12 On a

life raft in the Mediterranean, a teenager from Ghana wonders whether he will reach Europe alive. A young chef disappears from a cruise ship, leaving a mystery for his friends and family to solve. A water-squatting community battles eviction from a harbor in a Pacific Northwest town, raising the question of who owns the water. *Imperiled Ocean* is a deeply reported work of narrative journalism that follows people as they head out to sea. What they discover holds inspiring and dire implications for the life of the ocean, and for all of us back on land. As *Imperiled Ocean* unfolds, battles are fought, fortunes made, and lives are lost. Behind this human drama, the ocean is growing ever more unstable, threatening to upend life on land. We meet a biologist tracking sturgeon who is unable to stop the development and pollution destroying the fish's habitat, he races to learn about the fish before it disappears. Sturgeon has survived more than 300 million years on earth and could hold important truths about how humanity might make itself amenable to a changing ocean. As a fisher and scientist, his ability to listen to the water becomes a parable for today. By eavesdropping on an imperiled world, he shows a way we can move forward to save the oceans we all share.

**The Boy and the Ocean** Max Lucado, 2013-03-31

See for yourself in this heart-warming story about a boy, his parents, and the wonder of creation. From the vast reaches of the ocean to the towering heights of the mountains, Max Lucado takes us on a journey of discovery and thanksgiving as he shows us how creation expresses the unmatched love of the Creator. Filled with beautiful illustrations, this charming tale teaches about the God

whose love never ends, and will remain a favorite among families for years to come.

**Grandpa Across the Ocean** Hyewon Yum, 2021-04-27  
Though separated by language, age, and an ocean, a child and grandparent find common ground in this warm, witty picture book *Grandpa* lives on the other side of the ocean. He takes naps all the time. He eats different foods. He speaks an unfamiliar language. His house is the most boring place on Earth! Or is it? A little time together just might reveal that Grandpa is also a great singer, an energetic sandcastle builder, and a troublemaker . . . just like his grandson! With her signature warmth and humor, award-winning author-illustrator Hyewon Yum shares the

challenges and joys of having a relative who lives far away—proving that even from across the ocean, the grandparent-grandchild relationship is a very special one.

**Consuming Ocean Island** Katerina Martina Teaiwa, 2014-12-27 *Consuming Ocean Island* tells the story of the land and people of Banaba, a small Pacific island, which, from 1900 to 1980, was heavily mined for phosphate, an essential ingredient in fertilizer. As mining stripped away the island's surface, the land was rendered uninhabitable, and the indigenous Banabans were relocated to Rabi Island in Fiji. Katerina Martina Teaiwa tells the story of this human and ecological calamity by weaving together memories, records, and images from displaced islanders, colonial administrators, and employees of the mining company. Her compelling narrative reminds us of what is at stake whenever the interests of industrial agriculture and indigenous minorities come into conflict. The Banaban experience offers insight into the plight of other island peoples facing forced migration as a result of human impact on the environment.

**Ocean Meets Sky** Terry Fan, Eric Fan, 2018-05-15

“Young readers will be captivated.” —The Washington Post

It's a good day for sailing. Finn lives by the sea and the sea lives by him. Every time he looks out his window it's a constant reminder of the stories his grandfather told him about the place where the ocean meets the sky. Where whales and jellyfish soar and birds and castles float. Finn's grandfather is gone now but Finn knows the perfect way to honor him. He'll build his own ship and sail out to find this magical place himself! And when he arrives, maybe, just maybe, he'll find something he didn't know he was looking for.

*On Earth We're Briefly Gorgeous Ocean*

Vuong, 2021-06-01 The instant New York Times Bestseller • Nominated for the 2019 National Book Award for Fiction “A lyrical work of self-discovery that's shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning.” —Ron Charles, The Washington Post  
*Ocean Vuong's* debut novel is a shattering portrait of a family, a first love, and the redemptive power of storytelling. *On Earth We're Briefly Gorgeous* is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family's history that began before he was born — a history whose epicenter is rooted in Vietnam — and serves as a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and masculinity. Asking questions central to our American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and

tenderness, *On Earth We're Briefly Gorgeous* is as much about the power of telling one's own story as it is about the obliterating silence of not being heard. With stunning urgency and grace, Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. The question of how to survive, and how to make of it a kind of joy, powers the most important debut novel of many years. Named a Best Book of the Year by: GQ, Kirkus Reviews, Booklist, Library Journal, TIME, Esquire, The Washington Post, Apple, Good Housekeeping, The New Yorker, The New York Public Library, Elle.com, The Guardian, The A.V. Club, NPR, Lithub, Entertainment Weekly, Vogue.com, The San Francisco Chronicle, Mother Jones, Vanity Fair, The Wall Street Journal Magazine and more!

**See the Ocean** Estelle Condra, 1994 Driving through mountain fog to the beach, two young brothers compete to see who will catch the first glimpse of the ocean, but it is their blind sister Nellie who senses it first.

*Ocean! Waves for All* Stacy McAnulty, 2020-05-05 From writer Stacy McAnulty and illustrator David Litchfield, *Ocean! Waves for All* is a light-hearted nonfiction picture book about the formation and history of the ocean, told from the perspective of the ocean itself. Dude. Ocean is incredible. Atlantic, Pacific, Arctic, Indian, Southern—it's all excellent Ocean! Not part of any nation, his waves are for all. And under those waves, man, he holds so many secrets. With characteristic humor and charm, Stacy McAnulty channels the voice of Ocean in this next autobiography in the *Our Universe* series. Rich with kid-friendly facts and beautifully brought to life by David Litchfield, this is an equally charming and irresistible companion to *Earth! My First 4.54 Billion Years*; *Sun! One in a Billion*; and *Moon! Earth's Best Friend*.

*This New Ocean* William E. Burrows, 2010-09-29 It was all part of man's greatest adventure--landing men on the Moon and sending a rover to Mars, finally seeing the edge of the universe and the birth of stars, and launching planetary explorers across the solar system to Neptune and beyond. The ancient dream of breaking gravity's hold and taking to space became a reality only because of the intense cold-war rivalry between the superpowers, with towering geniuses like Wernher von Braun and Sergei Korolyov shelving dreams of space travel and instead developing rockets for ballistic missiles and space spectacles. Now that Russian archives are open and thousands of formerly top-secret U.S. documents are declassified, an often startling new picture of the space age emerges: the frantic effort by the Soviet Union to beat the United States to the Moon was doomed from the beginning by gross inefficiency and by infighting so treacherous that Winston Churchill likened it to dogs fighting under a carpet; there was more than science behind the United States' suggestion that satellites be launched during the International Geophysical Year, and in one crucial respect, Sputnik was a godsend to Washington; the hundred-odd German V-2s that provided the vital start to the U.S. missile and space programs legally belonged to the Soviet Union and were spirited to the United States in a derring-do operation worthy of a spy thriller; despite NASA's claim that it was a civilian agency, it had an intimate relationship with the military at the outset and still does--a distinction the Soviet Union never pretended to make; constant efforts to portray astronauts and cosmonauts as Boy Scouts were often contradicted by reality; the Apollo missions to the Moon may have been an unexcelled political triumph and feat of exploration, but they also created a headache for the space agency that lingers to this day. *This New Ocean* is

based on 175 interviews with Russian and American scientists and engineers; on archival documents, including formerly top-secret National Intelligence Estimates and spy satellite pictures; and on nearly three decades of reporting. The impressive result is this fascinating story--the first comprehensive account--of the space age. Here are the strategists and war planners; engineers and scientists; politicians and industrialists; astronauts and cosmonauts; science fiction writers and journalists; and plain, ordinary, unabashed dreamers who wanted to transcend gravity's shackles for the ultimate ride. The story is written from the perspective of a witness who was present at the beginning and who has seen the conclusion of the first space age and the start of the second.

The Ocean at Home Bernd Brunner, 2005-05-12 The mysterious world beneath the ocean's surface has captivated man for centuries the Egyptians, Greeks, Romans, and ancient Chinese all kept fish in their homes for purposes other than the culinary. But it was not until the nineteenth-century invention of the aquarium that the deep was truly domesticated, offering the curiously inclined a chance to invent their very own exotic sea world within their own walls. In this fascinating history of the aquarium, Bernd Brunner traces the development of this most wonderful invention, giving insight into the cultural and social circumstances that accompanied its swift rise in popularity. Brunner tells a compelling story of obsession, beauty, discovery, and delight, from the aquarium's humble origins as a tool for scientific observation to the Victorian era's elaborately decorated containers of oceanic curiosity, to the great public aquaria of the twentieth century.
