Fine Print Joann Johansen Burch,2011-01-01 Although he is credited with changing history through his invention of printing, Johann Gutenberg remains mysterious. In *Fine Print*, author Joann Johansen Burch pieces together Gutenberg's amazing story. When Johann was a child in the early 1400s, books were rare and sometimes very expensive. Each book had to be copied by hand, letter by letter. Gutenberg loved to read, and he often grew impatient waiting for the time-consuming bookmaking process to be completed. Young Gutenberg dreamed of finding a better way to make books. From his childhood in strife-torn Mainz through the many years of setbacks and bankruptcies, Gutenberg persevered in his belief that books could be made quickly and inexpensively. This is the story of the man who invented movable type and the printing press and gave the world the gift of books.

Five Hundred Years of Printing Sigfrid Henry Steinberg,1996 This classic work, first published as a Pelican Original in 1955 and maintained in successive editions until 1980 is now available in a finely illustrated larger format book, drawing on the collections and curatorial expertise of The British Library. It has been completely revised and brought up to date, covering topics such as censorship, best-sellers, the invention of lithography and the connection between printing and education. It is of particular use to anyone studying the huge technological changes that the printing industry has experienced during its long timespan.

Thirty Years Hundred Stories Liu Fook Thim,2016-04-29 Engineers play a vital role in nation building. Since independence, they have been driving Singapore's efforts in industrialisation. Their vision, creativity and resilience gave Singapore a competitive edge, enabling a meteoric rise from Third World to First in one generation. Going forward, the government wants to make Singapore a e;Smart Nation; - a nation where people live meaningful and fulfilled lives, enabled seamlessly by technology, offering exciting opportunities for all.

Engineers are vital in making this happen. This book captures 100 stories of engineering accomplishments in Singapore over a span of 30 years as told by the Nanyang Technological Institute (now known as NTU) Pioneer Engineering Class of 85. They demonstrate the breadth and depth of the engineering landscape in our nation. If this book inspires some to take up an engineering career, it will have achieved its purpose.
