Cleaning Data for Effective Data Science David Mertz, 2021-03-31 Think about your data intelligently and ask the right questions Key Features Master data cleaning techniques necessary to perform real-world data science and machine learning tasks Spot common problems with dirty data and develop flexible solutions from first principles Test and refine your newly acquired skills through detailed exercises at the end of each chapter Book Description Data cleaning is the all-important first step to successful data science, data analysis, and machine learning. If you work with any kind of data, this book is your go-to resource, arming you with the insights and heuristics experienced data scientists had to learn the hard way. In a light-hearted and engaging exploration of different tools, techniques, and datasets real and fictitious, Python veteran David Mertz teaches you the ins and outs of data preparation and the essential questions you should be asking of every piece of data you work with. Using a mixture of Python, R, and common command-line tools, *Cleaning Data for Effective Data Science* follows the data cleaning pipeline from start to end, focusing on helping you understand the principles underlying each step of the process. You'll look at data ingestion of a vast range of tabular, hierarchical, and other data formats, impute missing values, detect unreliable data and statistical anomalies, and generate synthetic features. The long-form exercises at the end of each chapter let you get hands-on with the skills you've acquired along the way, also

providing a valuable resource for academic courses. What you will learn
Ingest and work with common data formats like JSON, CSV, SQL and NoSQL databases,
PDF, and binary serialized data structures
Understand how and why we use tools such as pandas, SciPy, scikit-learn, Tidyverse, and Bash
Apply useful rules and heuristics for assessing data quality and detecting bias, like Benford's law and the 68-95-99.7 rule
Identify and handle unreliable data and outliers, examining z-score and other statistical properties
Impute sensible values into missing data and use sampling to fix imbalances
Use dimensionality reduction, quantization, one-hot encoding, and other feature engineering techniques to draw out patterns in your data
Work carefully with time series data, performing de-trending and interpolation
Who this book is for
This book is designed to benefit software developers, data scientists, aspiring data scientists, teachers, and students who work with data. If you want to improve your rigor in data hygiene or are looking for a refresher, this book is for you. Basic familiarity with statistics, general concepts in machine learning, knowledge of a programming language (Python or R), and some exposure to data science are helpful.

JavaScript for Absolute Beginners Terry McNavage, 2011-08-23
If you are new to both JavaScript and programming, this hands-on book is for you. Rather than staring blankly at gobbledygook, you'll explore JavaScript by entering and running hundreds of code samples in Firebug, a free JavaScript debugger. Then in the last two chapters, you'll leave the safety of Firebug and hand-

code an uber cool JavaScript application in your preferred text editor. Written in a friendly, engaging narrative style, this innovative JavaScript tutorial covers the following essentials: Core JavaScript syntax, such as value types, operators, expressions, and statements provided by ECMAScript. Features for manipulating XHTML, CSS, and events provided by DOM. Object-oriented JavaScript, including prototypal and classical inheritance, deep copy, and mixins. Closure, lazy loading, advance conditional loading, chaining, currying, memoization, modules, callbacks, recursion, and other powerful function techniques. Encoding data with JSON or XML. Remote scripting with JSON-P or XMLHttpRequest Drag-and-drop, animated scrollers, skin swappers, and other cool behaviors. Optimizations to ensure your scripts run snappy. Formatting and naming conventions to prevent you from looking like a greenhorn. New ECMAScript 5, DOM 3, and HTML 5 features such as Object.create(), Function.prototype.bind(), strict mode, querySelector(), querySelectorAll(), and getElementsByClassName(). As you can see, due to its fresh approach, this book is by no means watered down. Therefore, over the course of your journey, you will go from JavaScript beginner to wizard, acquiring the skills recruiters desire.

Sexual Reproduction in Animals and Plants Hitoshi Sawada, Naokazu Inoue, Megumi Iwano, 2014-02-07 This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to

discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

Molecular Genetics, Genomics and Biotechnology of Crop Plants Breeding

Søren K. Rasmussen, 2020-05-27 This Special Issue on molecular genetics, genomics, and biotechnology in crop plant breeding seeks to encourage the use of the tools currently available. It features nine research papers that address quality traits, grain yield, and mutations by exploring cytoplasmic male sterility, the delicate control of flowering in rice, the removal of anti-nutritional factors, the use and development of new technologies for non-model species marker technology, site-directed mutagenesis and GMO regulation, genomics selection and genome-wide association studies, how to

cope with abiotic stress, and an exploration of fruit trees adapted to harsh environments for breeding purposes. A further four papers review the genetics of pre-harvest spouting, readiness for climate-smart crop development, genomic selection in the breeding of cereal crops, and the large numbers of mutants in straw lignin biosynthesis and deposition.

Nation-building and Identity Conflicts Ariel Hernandez,2014-07-08 Ending identity conflicts through negotiated agreements is an intractable process that is embedded complexly in the nation-building process. Ariel Hernandez looks on the complexity of the nation-building process in the Philippines and how its social and political context constrains the achievement of a peace agreement that would withhold new challenges as the process unfolds. Mediation as one of the possible modes of intervention to resolve identity conflicts is taken as the self-evident instrument to end the 40 year old conflict between the Filipino society at large and the Bangsamoro. The analysis confirms that mediation and other types of intervention are contributing to the intractability of identity conflicts by bringing in further complexities in the negotiation process. The conceptualization of “stumbling blocks” may provide knowledge based resources to develop strategies to “facilitate” the mediation process that allows negotiating parties to cope with the complexity of the bargaining table.

Business Intelligence for the Real-Time Enterprise Malu

Castellanos, Umeshwar Dayal, Timos Sellis, 2009-08-04 In today's competitive and highly dynamic environment, analyzing data to understand how the business is performing, to predict outcomes and trends, and to improve the effectiveness of business processes underlying business operations has become critical. The traditional approach to reporting is no longer adequate, users now demand easy-to-use intelligent platforms and applications capable of analyzing real-time business data to provide insight and actionable information at the right time. The end goal is to improve the enterprise performance by better and timelier decision making, enabled by the availability of up-to-date, high-quality information. As a response, the notion of real-time enterprise has emerged and is beginning to be recognized in the industry. Gartner defines it as "using up-to-date information, getting rid of delays, and using speed for competitive advantage is what the real-time enterprise is all about. . . . Indeed, the goal of the real-time enterprise is to act on events as they happen. " Although there has been progress in this direction and many companies are introducing products toward making this vision a reality, there is still a long way to go. In particular, the whole lifecycle of business intelligence requires new techniques and methodologies capable of dealing with the new requirements imposed by the real-time enterprise.

Bringing Fossils to Life Donald R. Prothero, 2013-11-05 One of the leading textbooks in its field, *Bringing Fossils to Life* applies paleobiological

principles to the fossil record while detailing the evolutionary history of major plant and animal phyla. It incorporates current research from biology, ecology, and population genetics, bridging the gap between purely theoretical paleobiological textbooks and those that describe only invertebrate paleobiology and that emphasize cataloguing live organisms instead of dead objects. For this third edition Donald R. Prothero has revised the art and research throughout, expanding the coverage of invertebrates and adding a discussion of new methodologies and a chapter on the origin and early evolution of life.

Teaching Organic Farming and Gardening Martha Brown, Jan Perez, Albie Miles, 2015-02-23 Drawing on nearly 50 years of teaching organic farming and gardening, the staff of the UC Santa Cruz Farm & Garden Apprenticeship and invited authors have developed an updated and expanded resource for instructors based on many of the skills and concepts taught in UCSC's annual Apprenticeship in Ecological Horticulture program. **Teaching Organic Farming & Gardening: Resources for Instructors, 3rd Edition** addresses practical aspects of organic farming and gardening, applied soil science, and social and environmental issues in agriculture. New features of the 3rd Edition include revised and expanded lecture outlines, new demonstrations and exercises, detailed narrative supplements to support lecture topics, and new appendices and illustrations. Although much of the material has been developed for field or garden demonstrations and skill building, most of the units can also be

tailored to a classroom setting. The 700-page manual was produced by UCSC's Center for Agroecology & Sustainable Food System and is designed for a wide audience of those involved in teaching farming and gardening skills and sustainable agriculture concepts, including colleges and universities with sustainable agriculture programs, student farms or gardens, and on-farm education programs; urban agriculture, community garden, and farm training programs; farms with internships or apprenticeships; agriculture extension stations; school gardening programs; organizations such as the Peace Corps, US AID, and other groups that provide international training in food growing and ecological growing methods; and master gardener programs.

Crown Ethers and Analogous Compounds M. Hiraoka, 2016-05-04 Since the discovery of crown ethers by Pedersen in 1967, several thousands of crown ethers and analogous compounds have been synthesized. Their specific characteristics have been investigated and a variety of applications developed. These developments have led to new fields of chemistry called host-guest chemistry and supramolecular chemistry. This book presents the state-of-the-art of the chemistry of crown ethers and analogous compounds. The first chapter provides an orientation in the new fields of chemistry. Chapter 2 reviews advances in synthetic procedures for crown ethers and analogous compounds including azacrown ethers, thiacrown ethers, functionalized crown ethers, cryptands and others. The focus of chapter 3 is on the concept and synthetic strategies for the molecular design of new crown

compounds. Chapters 4-7 are concerned with noteworthy topics in the applications of crown compounds. Chapter 4 deals with the application to ion-selective electrodes and liquid chromatography, both of which are the most important targets in the analytical application of crown compounds. One major application of crown ethers is the design and syntheses of artificial molecules which can catalyze a useful synthetic reaction in an enzyme-mimetic reaction manner, through novel non-covalent complexes. The strategies for enzymatic modelling with crown ethers are covered in chapter 5, while chapter 6 presents the principle of amine-selective colour complexation and its application. In chapter 7 switched-on crown ethers that can respond to environmental stimuli are reviewed. The final chapter is devoted to a wide-ranging discussion of developments in macrocyclic polyamine chemistry. Unlike crown ethers, macrocyclic polyamines, bearing nitrogen donor atoms which belong to a soft base, form complexes with ions of transition metals and heavy metals which are classified as soft acids. Therefore, macrocyclic polyamines are expected to have very versatile applications. Scientists in chemistry, biochemistry, physical organic chemistry, pharmaceutical chemistry and industrial chemistry will find this book a helpful summary and a stimulating contribution to research in this specialized field of crown compounds.

Rhabdoviruses Ralf Georg Dietzgen, Ivan V. Kuzmin, 2012 Rhabdoviruses are a

diverse family of single stranded, negative sense RNA viruses that can successfully utilize a myriad of ecological niches, ranging from plants and insects to fish and mammals. This virus family includes pathogens, such as rabies virus, vesicular stomatitis virus, and potato yellow dwarf virus that are of tremendous public health, veterinary, and agricultural significance. Due to the relative simplicity of their genomes and morphology, in recent years rhabdoviruses have become powerful model systems for studying molecular virology. Written by a select group of world-renowned virologists, this book reviews all of the most recent advances in rhabdovirology, providing a timely overview of the field. Most contributions are written from a molecular and genomic perspective and contain expert insights upon which to base future research efforts. The topics covered include: morphology * genome organization * transcription * virus replication * taxonomy * characterization * virus evolution * vesiculovirus * lyssavirus * ephemeroviruses * fish novirhabdoviruses * the sigma viruses of *Drosophila* * virus-host protein interaction of plant-adapted rhabdoviruses * cereal-infecting rhabdoviruses * rabies prevention and control, including lyssavirus vaccine development. The book is a must read for all virologists working on these and related negative sense RNA viruses. It is recommended for all biology, veterinary, and medical libraries.
