**Ignition!** John Drury Clark, 2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as "a good book on rocket stuff...that's a really fun one" by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

*King Lear* Jeffrey Kahan, 2008-04-18 Is King Lear an autonomous text, or a rewrite of the earlier and anonymous play King Leir? Should we refer to Shakespeare's original quarto when discussing the play, the revised folio text, or the popular composite version, stitched together by Alexander Pope in 1725? What of its stage variations? When turning from page to stage, the critical view on King Lear is skewed by the fact that for almost half of the four hundred years the play has been performed, audiences preferred Naham Tate's optimistic adaptation, in which Lear and Cordelia live happily ever after. When discussing King Lear, the question of what comprises 'the play' is both complex and fragmentary. These issues of identity and authenticity across time and across mediums are outlined, debated, and considered critically by the contributors to this volume. Using a variety of approaches, from postcolonialism and New Historicism to psychoanalysis and gender studies, the leading international contributors to *King Lear: New Critical Essays* offer major new interpretations on the conception and writing, editing, and cultural productions of King Lear. This book is an up-to-date and comprehensive anthology of textual scholarship, performance research, and critical writing on one of Shakespeare's most important and perplexing tragedies. Contributors Include: R.A. Foakes, Richard Knowles, Tom Clayton, Cynthia Clegg, Edward L. Rocklin, Christy Desmet, Paul

Cantor, Robert V. Young, Stanley Stewart and Jean R. Brink

**Ajax** Anthony T. Holdener, 2008 Provides information on the basics of Ajax to create Web applications that function like desktop programs.

**Plato's 'Republic': An Introduction** Sean McAleer, 2020-11-09 It is an excellent book – highly intelligent, interesting and original. Expressing high philosophy in a readable form without trivialising it is a very difficult task and McAleer manages the task admirably. Plato is, yet again, intensely topical in the chaotic and confused world in which we are now living. Philip Allott, Professor Emeritus of International Public Law at Cambridge University This book is a lucid and accessible companion to Plato's Republic, throwing light upon the text's arguments and main themes, placing them in the wider context of the text's structure. In its illumination of the philosophical ideas underpinning the work, it provides readers with an understanding and appreciation of the complexity and literary artistry of Plato's Republic. McAleer not only unpacks the key overarching questions of the text – What is justice? And Is a just life happier than an unjust life? – but also highlights some fascinating, overlooked passages which contribute to our understanding of Plato's philosophical thought. Plato's 'Republic': An Introduction offers a rigorous and thought-provoking analysis of the text, helping readers navigate one of the world's most influential works of philosophy and political theory. With its approachable tone and clear presentation, it constitutes a welcome contribution to the field, and will be an indispensable resource for philosophy students and teachers, as well as general readers new to, or returning to, the text.

**Introduction to Plasma Physics and Controlled Fusion** Francis F. Chen, 2013-03-09 TO THE SECOND EDITION In the nine years since this book was first written, rapid progress has been made scientifically in nuclear fusion, space physics, and nonlinear plasma theory. At the same time, the energy shortage on the one hand and the exploration of Jupiter and Saturn on the other have increased the national awareness of the important applications of plasma physics to energy production and to the understanding of our space environment. In magnetic confinement fusion, this period has seen the attainment 13 of a Lawson number  $nTE$  of  $2 \times 10^{21} \text{ cm}^{-3} \text{ sec}$  in the Alcator tokamaks at MIT; neutral-beam heating of the PL T tokamak at Princeton to  $KT_i = 6.5 \text{ keV}$ ; increase of average  $\beta$  to 3%-5% in tokamaks at Oak Ridge and General Atomic; and the stabilization of mirror-confined plasmas at Livermore, together with injection of ion current to near field-reversal conditions in the 2XII $\beta$  device. Invention of the tandem mirror has given magnetic confinement a new and exciting dimension. New ideas have emerged, such as the compact torus, surface-field devices, and the EST mirror-torus hybrid, and some old ideas, such as the stellarator and the reversed-field pinch, have been revived. Radiofrequency heating has become a new star with its promise of dc current drive. Perhaps most importantly, great progress has been made in the understanding of the MHD behavior of toroidal plasmas: tearing modes, magnetic VII VIII islands, and disruptions.

**Data Visualization with D3 and AngularJS** Christoph Körner, 2015-04-27 If you are a web developer with experience in AngularJS and want to implement interactive visualizations using D3.js, this book is for you. Knowledge of SVG or D3.js will give you an edge to get the most out of this book.

**Advanced Intelligent Environments** Wolfgang Minker, Michael Weber, Hani Hagras, Victor Callagan, Achilles Kameas, 2009-06-16 Over the last decade a number of research areas have contributed to the concept of advanced intelligent environments, these include ubiquitous computing, pervasive computing, embedded intelligence, intelligent user interfaces, human factors, intelligent buildings, mobile communications, domestic robots, intelligent sensors, artistic and architectural design and ambient intelligence. Undeniably, multimodal spoken language dialogue interaction is a key factor in ensuring natural interaction and therefore of particular interest for advanced intelligent environments. It will therefore represent one focus of the proposed book. The book will cover all key topics in the field of intelligent environments from a variety of leading researchers. It will bring together several perspectives in research and development in the area.

**Head First Java** Kathy Sierra, Bert Bates, 2005-02-09 Learning a complex new language is no

easy task especially when it's an object-oriented computer programming language like Java. You might think the problem is your brain. It seems to have a mind of its own, a mind that doesn't always want to take in the dry, technical stuff you're forced to study. The fact is your brain craves novelty. It's constantly searching, scanning, waiting for something unusual to happen. After all, that's the way it was built to help you stay alive. It takes all the routine, ordinary, dull stuff and filters it to the background so it won't interfere with your brain's real work--recording things that matter. How does your brain know what matters? It's like the creators of the Head First approach say, suppose you're out for a hike and a tiger jumps in front of you, what happens in your brain? Neurons fire. Emotions crank up. Chemicals surge. That's how your brain knows. And that's how your brain will learn Java. Head First Java combines puzzles, strong visuals, mysteries, and soul-searching interviews with famous Java objects to engage you in many different ways. It's fast, it's fun, and it's effective. And, despite its playful appearance, Head First Java is serious stuff: a complete introduction to object-oriented programming and Java. You'll learn everything from the fundamentals to advanced topics, including threads, network sockets, and distributed programming with RMI. And the new, second edition focuses on Java 5.0, the latest version of the Java language and development platform. Because Java 5.0 is a major update to the platform, with deep, code-level changes, even more careful study and implementation is required. So learning the Head First way is more important than ever. If you've read a Head First book, you know what to expect--a visually rich format designed for the way your brain works. If you haven't, you're in for a treat. You'll see why people say it's unlike any other Java book you've ever read. By exploiting how your brain works, Head First Java compresses the time it takes to learn and retain--complex information. Its unique approach not only shows you what you need to know about Java syntax, it teaches you to think like a Java programmer. If you want to be bored, buy some other book. But if you want to understand Java, this book's for you.

**Bastard Culture!** Mirko Tobias Schäfer, 2011 The computer and particularly the Internet have been represented as enabling technologies, turning consumers into users and users into producers. The unfolding online cultural production by users has been framed enthusiastically as participatory culture. But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices, this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse, as well as the material aspects of design, and their relation to the practices of design and appropriation.

**The Lives of the Sophists** Philostratus (the Athenian), 1921 PHILOSTRATUS AND EUNAPIUS.

(a) Of the distinguished Lemnian family of Philostrati, Flavius Philostratus, 'the Athenian', was a Greek sophist (professor), c. A.D. 170-205, who studied at Athens and later lived in Rome. He was author of the admirable *Life of Apollonius of Tyana* (Loeb Nos. 16 and 17) and *Lives of the Sophists* (which are really impressions of investigators alert but less fond of scientific method and discovery than of stylish presentation or things known), one part concerning some older, the other some later 'provessors'. Other extant works of this Philostratus are *Letters* and *Gymnasticus*, but the *Heroicus* or *Heroica* is apparently by another Philostratus, and the *Eikones* (Imagines, skilful descriptions of pictures, Loeb No. 256) were probably by two Philostrati, one being the son of Nervianus and born c. A.D. 190, the other his grandson who wrote c. AD. 300. (b) The Greek Sophist and historian Eunapius was born at Sardis in A.D. 347, but went to Athens to study and lived much of his life there teaching rhetoric and possibly medicine. He was initiated into the 'mysteries' and was hostile to Christians. Lost is his historical work (covering the years A.D. 270-404) but for excerpts and the use of it made by Zosimus, but we have his *Lives of Philosophers and Sophists* mainly contemporary with himself. Eunapius is our only source of our knowledge of Neo-Platonism in the latter part of the fourth century A.D.

**India's Ad Hoc Arsenal** Chris Smith, 1994 Chris Smith explores the evolution of Indian defence policy since 1947. He looks carefully at the domestic dynamics of Indian defence policy. This includes an in-depth analysis of the period 1947-62, which is often ignored by Indian defence analysts, and the performance of the defence industrial base.
