Counting Working-age People with Disabilities Andrew J. Houtenville, 2009 The overarching objective of this book is to support and facilitate efforts to improve statistics and data on working-age people with disabilities.

Drawing Fritz Drury, Joanne Stryker, 2009 Viewing drawing as a unique art form, this book was designed to simplify and clarify the instruction of drawing for beginning learners in a manner that allows for specificity in instrumentation and concept. It discusses drawing as an underlying structural principle in relation to other art forms, with its own particular language rooted in direct tactile experience of media and the analytical investigation of the visible. Readers will gain an understanding of the basic workings of drawing by finding connections between natural visual phenomena and the more abstract principles of design and pictorial construction.

Cultural Consultation Laurence J. Kirmayer, Jaswant Guzder, Cécile Rousseau, 2013-08-15 Based on a recently completed project of cultural consultation in Montreal, Cultural Consultation presents a model of multicultural and applicable health care. This model used clinicians and consultants to provide in-depth assessment, treatment planning, and limited interventions in consultation with frontline primary care and mental health practitioners working with immigrants, refugees, and members of indigenous and ethnocultural communities. Evaluation of the service has demonstrated that focused interventions by consultants familiar with patients' cultural backgrounds could improve the relationship between the patient

and the primary clinician. This volume presents models for intercultural work in psychiatry and psychology in primary care, general hospital and specialty mental health settings. The editors highlight crucial topics such as: - Discussing the social context of intercultural mental health care, conceptual models of the role of culture in psychopathology and healing, and the development of a cultural consultation service and a specialized cultural psychiatric service - Examining the process of intercultural work more closely with particular emphasis on strategies of consultation, the identity of the clinician, the ways in which gender and culture position the clinician, and interaction of the consultant with family systems and larger institutions - Highlighting special situations that may place specific demands on the clinician: working with refugees and survivors of torture or political violence, with separated families, and with patients with psychotic episodes This book is of valuable use to mental health practitioners who are working in multidisciplinary settings who seek to understand cultural difference in complex cases. Psychiatrists, psychologists, social workers, nurse practitioners, primary care providers and trainees in these disciplines will make thorough use of the material covered in this text.

The Bread Bible Rose Levy Beranbaum, 2003-10-17 Presents a collection of baked bread recipes; outlines key baking techniques; and offers complementary information on ingredients, equipment, and baking chemistry.

Semiconductor Materials for Solar Photovoltaic Cells M. Parans Paranthaman, Winnie Wong-Ng, Raghu N. Bhattacharya, 2015-09-16 This book reviews the current status of semiconductor materials for conversion of sunlight to electricity, and highlights advances in both basic science and manufacturing. Photovoltaic

(PV) solar electric technology will be a significant contributor to world energy supplies when reliable, efficient PV power products are manufactured in large volumes at low cost. Expert chapters cover the full range of semiconductor materials for solar-to-electricity conversion, from crystalline silicon and amorphous silicon to cadmium telluride, copper indium gallium sulfide selenides, dye sensitized solar cells, organic solar cells, and environmentally friendly copper zinc tin sulfide selenides. The latest methods for synthesis and characterization of solar cell materials are described, together with techniques for measuring solar cell efficiency. *Semiconductor Materials for Solar Photovoltaic Cells* presents the current state of the art as well as key details about future strategies to increase the efficiency and reduce costs, with particular focus on how to reduce the gap between laboratory scale efficiency and commercial module efficiency. This book will aid materials scientists and engineers in identifying research priorities to fulfill energy needs, and will also enable researchers to understand novel semiconductor materials that are emerging in the solar market. This integrated approach also gives science and engineering students a sense of the excitement and relevance of materials science in the development of novel semiconductor materials.

- Provides a comprehensive introduction to solar PV cell materials
- Reviews current and future status of solar cells with respect to cost and efficiency
- Covers the full range of solar cell materials, from silicon and thin films to dye sensitized and organic solar cells
- Offers an in-depth account of the semiconductor material strategies and directions for further research
- Features detailed tables on the world leaders in efficiency demonstrations
- Edited by scientists with experience in both research and industry

Stamping American Memory Sheila Brennan, 2018-06-15 Winner of the University of Michigan Press /

Humanities, Arts, Science, and Technology Alliance and Collaboratory (HASTAC) Prize for Notable Work in the Digital Humanities In the age of digital communications, it can be difficult to imagine a time when the meaning and imagery of stamps was politically volatile. While millions of Americans collected stamps from the 1880s to the 1940s, *Stamping American Memory* is the first scholarly examination of stamp collecting culture and how stamps enabled citizens to engage their federal government in conversations about national life in early-twentieth-century America. By examining the civic conversations that emerged around stamp subjects and imagery, this work brings to light the role that these underexamined historical artifacts have played in carrying political messages. Sheila A. Brennan crafts a fresh synthesis that explores how the US postal service shaped Americans' concepts of national belonging, citizenship, and race through its commemorative stamp program. Designed to be saved as souvenirs, commemoratives circulated widely and stood as miniature memorials to carefully selected snapshots from the American past that also served the political needs of small interest groups. *Stamping American Memory* brings together the histories of the US postal service and the federal government, collecting, and philately through the lenses of material culture and memory to make a significant contribution to our understanding of this period in American history.

The Historiography of World War I from 1918 to the Present Christoph Cornelissen, Arndt Weinrich, 2022-11-11 From the Treaty of Versailles to the 2018 centenary and beyond, the history of the First World War has been continually written and rewritten, studied and contested, producing a rich historiography shaped by the social and cultural circumstances of its creation. *Writing the Great War*

provides a groundbreaking survey of this vast body of work, assembling contributions on a variety of national and regional historiographies from some of the most prominent scholars in the field. By analyzing perceptions of the war in contexts ranging from Nazi Germany to India's struggle for independence, this is an illuminating collective study of the complex interplay of memory and history.

Technology for Efficient Learner Support Services in Distance Education Anjana,2018-12-29 This book explores the ways in which technology is being used by various open universities in developing countries to extend learner support services to distance learners. It shares the best practices being followed by different open universities so that these may be replicated by other universities. It provides an overview of the use of various digital technologies, e-learning tools, eLearning platforms, virtual learning environments, and synchronous and asynchronous technologies in open and distance learning (ODL) systems. Moreover, it discusses the importance of ODL systems in providing inclusive education in developing countries through the use of ICT with a special focus on adult, rural and elderly learners, as well as the role of technology in science education through ODL system. A transformative model of sustainable collaborative learning is presented, integrating concepts based on theoretical frameworks to increase the flexibility and solve existing issues in developing countries, which may be used for policy changes in distance learning. It concludes by examining various challenges in successfully implementing technology for effective delivery of learner support services in distance education systems in developing countries and exploring the strategies required to overcome these challenges.

Futures Thinking and Organizational Policy Deborah A. Schreiber,Zane L. Berge,2018-12-19 This book

proposes that organizational policies are what ensure the institutionalization and sustainability of futures thinking in organizations. It presents several case studies from corporations and other institutions that describe effective use of foresight methods and internal policies to respond to rapid change. The case studies address changing trends in technology, globalization and/or workforce diversity, and the impact on the economic and political well-being of the organization. The editors also develop an organizational capability maturity model for futures thinking as well as providing questions for discussion that promote critical review of each case chapter. This book will inform scholars and organizational leaders how best to utilize foresight methodologies and organizational policies to sustain successful management strategies within futures thinking organizations. Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Legal Aspects of HIV/AIDS, 2007 This is an invaluable resource for lawyers, policy makers, and other practitioners with an interest in countries' responses to HIV/AIDS. *Legal Aspects of HIV/AIDS: A Guide for Policy and Law Reform* covers 65 wide-ranging topics in a concise, accessible format, explaining how laws and regulations can either underpin or undermine public health programs and responsible personal behavior. For each topic, the Guide summarizes the key legal or policy issues, provides relevant practice examples (citing actual laws and regulations), and offers a selective list of references that may be consulted for more information. Laws relating to many areas of our lives - from intimate physical conduct to international travel - can contribute to stigma, discrimination, and exclusion or, contrariwise, can help remedy these inequities. In order to create a supportive legal framework for responding to HIV/AIDS, it is

important that governments effectively address gaps and other problematic aspects in their legislation and regulatory systems. This book, written by a team of leading legal experts, helps them do so.

PISA 2009 Results: Learning Trends Changes in Student Performance Since 2000 (Volume V)

OECD,2010-12-07 This volume of PISA 2009 results looks at the progress countries have made in raising student performance and improving equity in the distribution of learning opportunities.

The Quest for the Christ Child in the Later Middle Ages Mary Dzon,2017-03-09 Beginning in the twelfth century, clergy and laity alike started wondering with intensity about the historical and developmental details of Jesus' early life. Was the Christ Child like other children, whose characteristics and capabilities depended on their age? Was he sweet and tender, or formidable and powerful? Not finding sufficient information in the Gospels, which are almost completely silent about Jesus' childhood, medieval Christians turned to centuries-old apocryphal texts for answers. In *The Quest for the Christ Child in the Later Middle Ages*, Mary Dzon demonstrates how these apocryphal legends fostered a vibrant and creative medieval piety. Popular tales about the Christ Child entertained the laity and at the same time were reviled by some members of the intellectual elite of the church. In either case, such legends, so persistent, left their mark on theological, devotional, and literary texts. The Cistercian abbot Aelred of Rievaulx urged his monastic readers to imitate the Christ Child's development through spiritual growth; Francis of Assisi encouraged his followers to emulate the Christ Child's poverty and rusticity; Thomas Aquinas, for his part, believed that apocryphal stories about the Christ Child would encourage youths to be presumptuous, while Birgitta of Sweden provided pious alternatives in her many Marian revelations. Through close readings of

such writings, Dzon explores the continued transmission and appeal of apocryphal legends throughout the Middle Ages and demonstrates the significant impact that the Christ Child had in shaping the medieval religious imagination.

Understanding Crime Trends National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Understanding Crime Trends, 2009-01-05 Changes over time in the levels and patterns of crime have significant consequences that affect not only the criminal justice system but also other critical policy sectors. Yet compared with such areas as health status, housing, and employment, the nation lacks timely information and comprehensive research on crime trends. Descriptive information and explanatory research on crime trends across the nation that are not only accurate, but also timely, are pressing needs in the nation's crime-control efforts. In April 2007, the National Research Council held a two-day workshop to address key substantive and methodological issues underlying the study of crime trends and to lay the groundwork for a proposed multiyear NRC panel study of these issues. Six papers were commissioned from leading researchers and discussed at the workshop by experts in sociology, criminology, law, economics, and statistics. The authors revised their papers based on the discussants' comments, and the papers were then reviewed again externally. The six final workshop papers are the basis of this volume, which represents some of the most serious thinking and research on crime trends currently available.

Is Everyone Really Equal? Ozlem Sensoy, Robin DiAngelo, 2017 This is the new edition of the award-winning guide to social justice education. Based on the authors' extensive experience in a range of settings

in the United States and Canada, the book addresses the most common stumbling blocks to understanding social justice. This comprehensive resource includes new features such as a chapter on intersectionality and classism; discussion of contemporary activism (Black Lives Matter, Occupy, and Idle No More); material on White Settler societies and colonialism; pedagogical supports related to “common social patterns” and “vocabulary to practice using”; and extensive updates throughout. Accessible to students from high school through graduate school, *Is Everyone Really Equal?* is a detailed and engaging textbook and professional development resource presenting the key concepts in social justice education. The text includes many user-friendly features, examples, and vignettes to not just define but illustrate the concepts. “Sensoy and DiAngelo masterfully unpack complex concepts in a highly readable and engaging fashion for readers ranging from preservice through experienced classroom teachers. The authors treat readers as intelligent thinkers who are capable of deep reflection and ethical action. I love their comprehensive development of a critical social justice framework, and their blend of conversation, clarity, and research. I heartily recommend this book!” —Christine Sleeter, professor emerita, California State University Monterey Bay

The Indigenous World 2007 Sille Stidsen, 2007 This Yearbook covers the period January-December 2006 and provides an update on the state of affairs of indigenous peoples worldwide through: region and country reports covering most of the indigenous world; and updated information on the international and regional processes relating to indigenous peoples. Thanks to the contributions from indigenous and non-indigenous scholars and activists, *The Indigenous World 2007* gives an overview of crucial developments in 2006 that have impacted on the indigenous peoples of the world. *The Indigenous World 2007* is a source

of information and an indispensable tool for those who need to be informed about the most recent issues and developments within the indigenous world.

Southeast Asia and the ASEAN Economic Community Roderick Macdonald, 2019-09-03 This book is an introduction to the ASEAN Economic Community (AEC), the economic community founded by Southeast Asian nations. It provides both economic profiles of the member nations and an explanation of the Community itself. This book also discusses the impact of China on the AEC. The book is a starting point for research into the region or into any member country, whether for academic or for business purposes. With over 170 tables and figures as well as an abundance of historical facts, the book offers data-based insights.

Parental Involvement in Childhood Education Garry Hornby, 2011-04-07 Parental participation has long been recognized as a positive factor in children's education. Research consistently shows that parents' contributions to their children's education lead to improvements in their academic and behavioral outcomes, from elementary through middle and secondary school. Recognizing the critical role of school psychologists in this equation, *Parental Involvement in Childhood Education* clearly sets out an evidence-based rationale and blueprint for building parental involvement and faculty awareness. The author's starting point is the gap between the ideals found in the literature and the reality of parental involvement in schools. An ecological analysis identifies professional, institutional, and societal factors that keep schools and parents distant. Methods for evaluating parental involvement are detailed, as is a model for developing and

maintaining strong parental relationships at the instructor, school, and education system level, with an emphasis on flexible communication and greater understanding of parents' needs. This empirically sound coverage offers readers: A detailed understanding of obstacles to parental involvement. An evidence-based model for parental participation. A three-nation study of parental involvement practices in schools. Guidelines for implementing parental involvement activities and initiatives. A review of effective communication strategies with parents. Analysis of key interpersonal skills for effective work with parents. Parental Involvement in Childhood Education is essential reading for practitioners and researchers in school psychology and counseling, social work, and educational psychology, whether they work directly with schools or in providing training for teachers and other professionals who work with children and their parents.
