Child of the Flower-Song People Gloria Amescua, 2021-08-17 Award-winning illustrator Duncan Tonatiuh brings to life debut author Gloria Amescua's lyrical biography of an indigenous Nahua woman from Mexico who taught and preserved her people's culture through modeling for famous artists. She was Luz Jiménez, child of the flower-song people, the powerful Aztec, who called themselves Nahua— who lost their land but who did not disappear. As a young Nahua girl in Mexico during the early 1900s, Luz learned how to grind corn in a metate, to twist yarn with her toes, and to weave on a loom. By the fire at night, she listened to stories of her community's joys, suffering, and survival, and wove them into her heart. But when the Mexican Revolution came to her village, Luz and her family were forced to flee and start a new life. In Mexico City, Luz became a model for painters, sculptors, and photographers such as Diego Rivera, Jean Charlot, and Tina Modotti. These artists were interested in showing the true face of Mexico and not a European version. Through her work, Luz found a way to preserve her people's culture by sharing her native language, stories, and traditions. Soon, scholars came to learn from her. This moving, beautifully illustrated biography tells the remarkable story of how model and teacher Luz Jiménez became “the soul of Mexico”—a living link between the indigenous Nahua and the rest of the world. Through her deep pride in her roots and her unshakeable spirit, the world came to recognize the beauty and strength of her people. The book includes an author's note, timeline, glossary, and bibliography.

With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all - Sew magazine A wonderful insight into the work of a truly skilled artist - PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in *The Art of the Fold*. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, *The Art of the Fold* is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers - how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of *The Art of the Fold* attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, the
