Fabrigami Jill Stovall,Scott Wasserman Stern,Florence Temko,2013-12-24 Fold decorative origami objects out of cloth with this easy-to-use origami book. Fabrigami is the Asian art of folding fabrics to create three-dimensional objects ranging from the practical to the whimsical. Like paper, there are countless beautiful fabric designs to choose from, only fabric has the virtue of being extremely durable. Fabrigami began as origami legend Florence Temko's final project. Everyone knows that origami is the art of paper folding, but Temko had begun experimenting with folding fabric to make objects that are just as beautiful but more lasting than paper. Sadly, Temko passed away before the book was completed, but her collaborator, Jill Stovall, continued their work. Now, Stovall—with the help of Scott Stern, a rising young star of origami—brings Fabrigami to print for everyone to use and enjoy. This origami book begins by presenting instructions on how to treat fabric so it holds a shape when folded. Then Stovall shares a series of fun craft projects with simple origami-style diagrams that you can use to make a range of lovely objects. Stiffening the fabric requires some practice, but the folds are all easy enough to be considered origami-for-kids projects and are a great way to learn origami. Cloth

**New Expressions in Origami Art** Meher McArthur, 2017-03-07 This origami art book features the work of 25 contemporary master folders who are among the most innovative origami artists working today. They are pushing the boundaries of origami vigorously in new directions in terms of style, scale, materials, subject and scope. Lang Linda Mihara Bernie Peyton Richard Sweeney And many more... The stunning photos and brilliant essays in this book demonstrate why origami is now an international art movement—largely through the efforts and artistic genius of a few contemporary masters. The trailblazing efforts of Japanese artist Akira Yoshizawa elevated the paper folding to an art form by showing how subtle shapes and figures could be created from a single sheet of paper through a variety of non-traditional folding techniques. Artists in other parts of the world—including the United States, France, England, China and Scandinavia—took Yoshizawa's cue and pushed these techniques further and further. The result has been the emergence of many new and surprising sculptural forms created through techniques such as wet folding, curved creasing, tessellating and the application of alternative materials besides paper.
