Master Ou's Surrogate Ex-wife Blue Mountain Mist, This is book 1 of Master Ou's Surrogate Ex-wife. When she married five years ago, she knew her husband had an old lover. Tilting her chin, he said to her, You're just a surrogate. Don't think of anything else except money. She thought that as long she tried her best to please him, he would eventually be touched and fall in love with her. However, she came to realize later that a man would not fall in love with someone just because they were touched by a woman's actions. After five years of marriage, her husband's first love has returned, and their marriage is on the verge of divorce. He even has even asked her to get rid of her baby...

Renegades Luca Guido,Stephanie Pilat,Angela Person,2020-01-28 Like America itself, the architecture of the United States is an amalgam, an imitation or an importation of foreign forms adapted to the natural or engineered landscape of the New World. So can there be an American School of architecture? The most legitimate claim to the title emerged in the 1950s and 1960s at the Gibbs College of Architecture at the University of Oklahoma, where, under the leadership of Bruce Goff, Herb Greene, Mendel Glickman, and others, an authentically American approach to design found its purest expression, teachable in its coherence and logic. Followers of this first truly American school eschewed the forms most in fashion in American architectural education at the time—those such as the French Beaux Arts or German Bauhaus Schools—in favor of the vernacular and the organic. The result was a style distinctly experimental, resourceful, and contextual—challenging not only established architectural norms in form and function but also traditional approaches to instructing and inspiring young architects. Edited by Luca Guido, Stephanie Pilat, and Angela Person, this volume explores the fraught history of this distinctively American movement born on the Oklahoma prairie. Renegades features essays by leading scholars and includes a wide range of images, including rare, never-before-published sketches and models. Together these essays and illustrations map the contours of an American architecture that combines this country’s landscape and technology through experimentation and invention, assembling the diversity of the United States into structures of true beauty. Renegades for the first time fully captures the essence and conveys the importance of the American School of architecture.

Tiny You Jennifer L. Holland,2020 Tiny You tells the story of one of the most successful political movements of the twentieth century: the grassroots campaign against legalized abortion. While Americans have rapidly changed their minds about sex education, pornography, arts funding, gay teachers, and ultimately gay marriage, opposition to legalized abortion has only grown. As other socially conservative movements have lost young activists, the pro-life movement has successfully recruited more young people to their cause. Jennifer L. Holland explores why abortion dominates conservative politics like no other cultural issue. Looking at anti-abortion movements in four western states since the 1960s--turning to the fetal pins passed around church services, the graphic images exchanged between friends, and the fetus dolls given to children in school--she argues that activists made fetal life feel personal to many Americans. Pro-life activists persuaded people to see themselves in the pins, images, and dolls they held in their hands and made the fight against abortion the primary bread-and-butter issue for social conservatives. Holland ultimately demonstrates that the success of the pro-life movement lies in the borrowed logic and emotional power of leftist activism.
