Dictionary of Louisiana French Albert Valdman, Kevin J. Rottet, Barry Jean Ancelet, Richard Guidry, Thomas A. Klingler, Amanda LaFleur, Tamara Lindner, Michael D. Picone, Dominique Ryon, 2010-09-30 The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane.

Pirmin Lemberger, Marc Batty, Médéric Morel, Jean-Luc Raffaëlli, 2019-08-14 Cet ouvrage s'adresse à tous ceux qui cherchent à tirer parti de l'énorme potentiel des « technologies Big Data », qu'ils soient data scientists, DSI, chefs de projets ou spécialistes métier. Le Big Data s'est imposé comme une innovation majeure pour toutes les entreprises qui cherchent à construire un avantage concurrentiel grâce à l'exploitation de leurs données clients, fournisseurs, produits, processus, machines, etc. Mais quelle solution technique choisir ? Quelles compétences métier développer au sein de la DSI ? Ce livre est un guide pour comprendre les enjeux d'un projet Big Data, en appréhender les concepts sous-jacents (en particulier le Machine Learning) et acquérir les compétences nécessaires à la mise en place d'un data lab. Il combine la présentation : • de notions théoriques (traitement statistique des données, calcul distribué...) ; • des outils les plus répandus (écosystème Hadoop, Storm...) ; • d'exemples d'applications ; • d'une organisation typique d'un projet de data science. Les ajouts de cette troisième édition concernent principalement la vision d'architecture d'entreprise, nécessaire pour intégrer les innovations du Big Data au sein des organisations, et le Deep Learning pour le NLP (Natural Language Processing, qui est l'un des domaines de l'intelligence artificielle qui a le plus progressé récemment).
