Advanced Paper Airplanes Andrew Thorne, 2020-11-29 Prepare to make more of the best looking and best flying paper airplanes ever! Easy to advanced designs that resemble and fly like real airplanes. Don't make another dart or some small barely flying origami creation, build an Advanced Paper Airplane! Detailed pictures guide you through step-by-step construction of 10 Advanced Paper Airplanes such as the F-15, F-4, F-105, A-4, X-5, MIG-21 and more. Test your skills at building and flying these amazing airplanes, or even design your own using included guidance. These paper airplanes are perfect for educators, students, S.T.E.M. demonstrations, science fair projects, pilots and engineers, or family fun. Don't waste your time learning complicated origami steps that only apply to one design, learn a hybrid origami process that will allow you to easily adapt it to your final aircraft design. This process has been used to design flyable biplanes, triplanes, large airplanes such as the U-2, B-1B, airliners, business jets, twin tail boom such as the P-38 and P-61, twin airframe such as the F-82, experimental aircraft, forward swept and variable sweep wings, and many more. The possibilities are endless. Create designs that are easy and forgiving, challenging, or even ones that require a seasoned test pilot or a catapult. The limit is the size of the room or field. Some are capable of reaching over 150 ft when thrown by hand or over 1000 ft if boosted aloft by a model rocket. These paper airplanes are constructed using standard 8.5 x 11 20-24lb printer paper. Use colored pencils, 24lb colored paper, or even stickers to enhance your design. Included designs are approximately 11-12 long with wingspans 6-12. These designs may be successfully scaled up using legal size paper or poster board, and have been tested up to a 46 wingspan. These planes are even capable of being catapulted or rocket launched (Catapult and rocket launch directions are not included).
