The Anime Machine Thomas Lamarre, 2013-11-30 Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP’s manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the “animetic machine” encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

Finish Your Film! Tips and Tricks for Making an Animated Short in Maya Kenny Roy, 2014-04-29 *Finish Your Film! Tips and Tricks for Making an Animated Short in Maya* is a first-of-its-kind book that walks the reader step-by-step through the actual production processes of creating a 3D Short film with Maya. Other books focus solely on the creative decisions of 3D Animation and broadly cover the multiple phases of animation production with no real applicable methods for readers to employ. This book shows you how to successfully manage the entire Maya animation pipeline. This book blends together valuable technical tips on film production and real-world shortcuts in a step-by-step approach to make sure you do not get lost. Follow along with author and director Kenny Roy as he creates a short film in front of your eyes using the exact same methods he shows you in the book. Armed with this book, you'll be able to charge forth into the challenge of creating a short film, confident that creativity will show up on screen instead of being stifled by the labyrinth that is a 3D animation pipeline.

The History of Chinese Animation II Lijun Sun, 2020-05-27 China has been one of the first countries to develop its own aesthetic for dynamic images and to create animation films with distinctive characteristics. In recent years, however, and subject to the influence of Western and Japanese animation, the Chinese animation industry has experienced several new stages of development, prompting the question as to where animation in China is heading in the future. This book describes the history, present and future of China’s animation industry. The author divides the business’s 95-year history into six periods and analyses each of these from an historical, aesthetic, and artistic perspective. In addition, the book focuses on representative works, themes, directions, artistic styles, techniques, industrial development, government support policies, business models, the nurturing of education and talent, broadcasting systems, and animation. Scholars and students who are interested in the history of Chinese animation will benefit from this book and it will appeal additionally to readers interested in Chinese film studies.

Producing Independent 2D Character Animation Mark A. Simon, 2013-02-11 PRODUCING INDEPENDENT 2D CHARACTER ANIMATION

takes an in-depth look at the artistry and production process of cel animation in a friendly, how-to manner that makes the sometimes tedious process of animation enjoyable and easy to understand. This book guides animators through every step of planning and production; includes examples of actual production forms, organization tips, screen shots, and sketches from the pre- to post-production processes; and contains detailed information on the hardware and software used to complete each step. By mapping out the course of how his small studio brainstormed, created, then produced its award-winning animation, TIMMY'S LESSONS IN NATURE, Mark Simon explains to animators what it takes-both creatively and resource-wise-to get their animations to market. Includes exclusive interviews with Oscar-nominated independent animator Bill Plimpton, Craig McCracken, creator of the POWER PUFF GIRLS, Craig Spike Decker of SPIKE & MIKE'S SICK AND TWISTED FESTIVAL OF ANIMATION, David Fine & Alison Snowden who are the Academy Award-Winning producers of BOB AND MARGARET, Cartoon Network's Senior Vice President of Original Animation, Linda Simensky, and Tom Sito, Co-Director of OSMOSIS JONES...as well as others.

Animation: A World History Giannalberto Bendazzi,2015-10-23 A continuation of 1994's groundbreaking Cartoons, Giannalberto Bendazzi's Animation: A World History is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, Animation: A World History encompasses the history of animation production on every continent over the span of three centuries. Volume II delves into the decades following the Golden Age, an uncertain time when television series were overshadowing feature films, art was heavily influenced by the Cold War, and new technologies began to emerge that threatened the traditional methods of animation. Take part in the turmoil of the 1950s through 90s as American animation began to lose its momentum and the advent of television created a global interest in the art form. With a wealth of new research, hundreds of photographs and film stills, and an easy-to-navigate organization, this book is essential reading for all serious students of animation history. Key Features Over 200 high quality head shots and film stills to add visual reference to your research Detailed information on hundreds of never-before researched animators and films Coverage of animation from more than 90 countries and every major region of the world Chronological and geographical organization for quick access to the information you're looking for
