Paper, 2017 This survey presents the work on paper of Charles Arnoldi (born 1946), a nationally renowned artist based in Los Angeles. Arnoldi has been described as an artist who draws in space to create his unique assemblage works of art. Throughout his long career he has been fascinated with shape and pattern as they apply to advanced formal concerns, from his 1970s paintings made entirely of natural forms, to his current geometric work. Internationally renowned architect Frank Gehry has said that the maturing Arnoldi has a secure color sense and the ability to work at large scale as well as to produce tiny, exquisite watercolors. Gehry cites Arnoldi as an influence in his own work, stating that this is an artist whose best is yet to come, who is still experimental and still willing to risk.

The Art of Paper Caroline O. Fowler, 2019 The untold story of how paper revolutionized art making during the Renaissance, exploring how it shaped broader concepts of authorship, memory, and the transmission of ideas over the course of three centuries. In the late medieval and Renaissance period, paper transformed society-not only through its role in the invention of print but also in the way it influenced artistic production. The Art of Paper tells the history of this medium in the context of the artist's workshop from the thirteenth century, when it was imported to Europe from Africa, to the sixteenth century, when European paper was exported to the colonies of New Spain. In this pathbreaking work, Caroline Fowler approaches the topic culturally rather than technically, deftly exploring the way paper shaped concepts of authorship, preservation, and the transmission of ideas during this period. This book both tells a transcultural history of paper from the Cairo Genizah to the Mesoamerican manuscript and examines how paper became Europeanized through the various mechanisms of the watermark, colonization, and the philosophy of John Locke. Ultimately, Fowler demonstrates how paper-as refuse and rags transformed into white surface-informed the works for which it was used, as well as artists' thinking more broadly, across the early modern world--Publisher's description.
