Paper Cutting ,2011-05-27 "Jaw-dropping . . . a feast for the eyes that will appeal to a wide spectrum of readers, from professional paper cutters to casual observers of the art." —Adult Books 4 Teens (School Library Journal) There's a renaissance underway in the art form of cut paper, with an explosion of raw talent and an abundance of amazing work produced in the medium in recent years. This gorgeous volume features work from twenty-six contemporary international artists who are creating images of astonishing intricacy, using little more than paper and blade. Featuring a host of new discoveries and including art by such stars as Nikki McClure, Rob Ryan, and Thomas Allen, as well as a number of emerging practitioners, *Paper Cutting* is sure to engage art buffs and indie crafters alike. An in-depth introduction by paper art expert Natalie Avella illuminates the rich history of the centuries-old form, and a whimsical preface by beloved artist Rob Ryan rounds out this delightful collection.

Cases and Maps Mark Coppenger,2019-07-12 A dying man hires the services of a cannibal; a customs official insults a world-class sculptor; a farmer complains that low-flying bombers are killing his chickens; two rock groups claim the same name; a monkey takes a selfie; and a minister with mail-order credentials performs a wedding. The resulting court cases (and sixteen others) serve to introduce a wide range of philosophical notions (such as libertarianism, speciesism, and speech acts). Next, a subway employee draws a revolutionary map; a mountain loses its name; a strange cineplex puts people in each others' movies; the art museums of Madrid loom over neighboring buildings; a nautical chart guides seamen into a Connecticut port; and Jerusalem stands "due north" of the Mediterranean. These maps (twenty-three in all), whether real or imaginary, introduce yet other philosophical notions (such as pragmatism, universals, and paradigms). Along the way in both sections, we meet a wide range of thinkers, from Plato to Aquinas to Hume to Kant to Searle. The explanations and discussion questions are written from a Christian perspective, inviting believers to join in the perennial dialogue with the conviction that if you don't have philosophical and theological positions sorted out, then they will have you.

Dyslexia: Advances in Theory and Practice I. Lundberg, Finn Egil Tønnessen, Ingolv Austad,2012-12-06 A balanced view of recent research on reading disability is presented by leading international scholars representing various subdisciplines of psychology and allied sciences. The volume provides researchers, graduate students, educators and other professionals with up-dated and practical useful knowledge of and insights into the latest theories and findings of the nature and causes of reading disability. Rational guidelines for assessment, prevention and intervention are also provided, based on such concepts as phonological and orthographical processing, automaticity and metacognition. Several chapters are written without technical terminology, yet with scientific rigor, and should be readable by a wide audience.

The Alps Andrew Beattie, 2006-11-09 The Alps are Europe's highest mountain range: their broad arc stretches right across the center of the continent, encompassing a wide range of traditions and cultures. Andrew Beattie explores the turbulent past and vibrant present of this landscape, where early pioneers of tourism, mountaineering, and scientific research, along with the enduring legacies of historical regimes from the Romans to the Nazis, have all left their mark.

The Illusion of the Epoch Harry Burrows Acton, 2003 Written nearly fifty years ago, at a time when the world was still wrestling with the concepts of Marx and Lenin, 'The Illusion of the Epoch' is the perfect resource for understanding the roots of Marxism-Leninism and its implications for philosophy, modern political thought, economics, and history. As Professor Tim Fuller has written, this is not an intemperate book, but rather an effort at a sustained, scholarly argument against Marxian views. Far from demonising his subject, Acton scrupulously notes where Marx's account of historical and economic events and processes is essentially accurate. However, Acton also points out that Marx is generally right about things that were already widely known and accepted in his own time and indeed had been long understood in the nineteenth century. On the other hand, Acton shows that in many cases Marx either is simply wrong or has stated his views so as to render his theories immune to disproof. Acton also explains why the embodiment of Marxist-Leninist theory in an actual social order would require coercive support if it were not, sooner or later, to collapse of its own contradictions.
