F-15 Eagle at War Tyson Rininger,2009-01-15 The F-15A entered service in 1972 as the first dedicated USAF air superiority fighter since the F-86 Sabre. More than three decades and myriad models and variants later, the F-15 is still the U.S. Air Force's premiere air superiority weapon, a veteran of U.S. conflicts as recent as Operation Desert Storm and presently serving in the air forces of U.S. allies around the world. *F-15 Eagle at War*, featuring the spectacular aerial photography of author Tyson V. Rininger, follows the design, manufacture, and performance of the F-15 from its first appearance through its service in various Cold War and contemporary conflicts. The book profiles each model and upgrade in technology up to the F-15C, D, and E models that served in the Persian Gulf, where they claimed 36 of 39 Air Force victories in air-to-air combat. F-15A Versus F/A-22 Fighter Aircraft Initial Operational Capability (IOC) U. S. Military,Department of Defense (DoD),U. S. Air Force (USAF),U. S. Government,2017-04-09 The F/A-22 Raptor is a new weapons system replacing the F-15C Eagle. Its operational debut in 2005 comes at a time of constrained budgets, a changing global threat environment, and the ongoing global war on terrorism (GWOT). Because of the current security environment, the aircraft's more than 15 years of development, and the close scrutiny of the F/A-22's test and evaluation (T&E) program, the US Air Force needs the Raptor's initial operational capability (IOC) status to be successful. One means of achieving this is to recognize and implement the lessons learned from America's current air superiority fighter, the F-15 Eagle. And just perhaps the overall effect might be to challenge the US Air Force's approach to major weapons-system development. The F/A-22's development, testing, and IOC declaration at Langley AFB, Virginia, in December 2005 closely parallels the F-15A's experience of 29 years ago. This paper provides background information on both aircraft, their T&E processes, and their first operational assignments to Langley AFB. Comparisons are made, differences highlighted, and recommendations offered. While it may appear that everything about the F/A-22 is new, the path to its IOC is well worn. A fresh look at F-15A development yields valuable insights for emerging twenty-first-century USAF weapons systems. Surprisingly, the overall lessons of the F-15A in 1976 still apply to the F/A-22 of 2005.

Boeing (MD) F-15 Eagle A. M. Thornborough,2011-08-01 The F-15 Eagle is the Western worlds air defense supreme. An all-weather, agile, tactical fighter, it is designed to gain and maintain air superiority in combat, achieved by a mixture of maneuverability, acceleration, range, weapons and avionics. The F-15 has electronic systems and weaponry that can detect, acquire, track and attack enemy aircraft while operating in friendly or enemy-controlled airspace and its weapons and flight control systems are designed so one person can safely and effectively perform air-to-air combat. Thus far the F-15 remains undefeated in aerial combat and author Anthony M. Thornborough brings every detail of this superb aircraft to the SAM Publications MDF series. This new book will chart the development of the F-15, though to its combat debut, its war roles and victories at the hands of the Israeli Air Force, where it forms the backbone of that country's aerial defence strategy.

Jet Fighters Coloring Book John Batchelor,Coloring Books,1998-06 Forty-four accurately rendered illustrations with captions capture the exciting details of a low-flying U.S. F-117 Stealth fighter, an aircraft carrier-based F-18, a Tornado GR-1, a Russian-built MiG-15, and other historic planes.

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies,2013-04-20 In many respects the most successful, versatile and widely-used combat aircraft of the post-war era the F-4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction. Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F-4Cs took over MiG-fighting duties from the F-100 Super Sabre. Although the

F-4 was never intended as a dog-fighter to tangle with light, nimble, gun-armed MiGs it was responsible for destroying 109 MiGs in aerial combat. At the end of their careers many of the survivors from the 3,380 'land-based' Phantoms were converted into target drones for training purposes. New aircraft were also built for West Germany, Iran and Israel. The USAF's experience with the Phantom showed clearly that the air-to-air fighter was still a necessity and its decision to fund its successor, the McDonnell-Douglas F-15 Eagle (as well as the F-16 Fighting Falcon and F-22A Raptor) was heavily influenced by the lessons of US and other Phantom pilots in combat.
