The Final Storm Mack Maloney, 2013-06-18 Only ace pilot Hawk Hunter can bring a Russian-backed traitor to justice. From “the best high-action thriller writer out there today, bar none” (Jon Land, USA Today–bestselling author). The Soviet Union had nearly been defeated when the vice president of the United States revealed himself as a traitor. He deactivated the defense grid just long enough for the Russians to strike, reducing America to a battle-scarred wasteland. The United States would have remained in shambles, were it not for Hawk Hunter, the greatest fighter pilot the world has ever known. He rebuilt the country one dogfight at a time, with one goal firmly fixed in his mind: to bring America’s greatest traitor to justice. Backed by a team of commandos, Hunter storms the vice president’s compound in Bermuda, and returns with the traitor in chains. To convict him for his crimes, the war’s story must be told in full for the first time. And there is no one better to begin the telling than Hawk Hunter. He has risked his life on every front, and it’s his courage that will ensure America rises again. The Final Storm is the sixth book of the Wingman series, which also includes Wingman and The Circle War.

Vipers in the Storm: Diary of a Gulf War Fighter Pilot Keith Rosenkranz, 2002-05-15 During Operation Desert Storm, Captain Keith Rosenkranz piloted his F-16 Viper in 30 combat missions. Here he recounts these experiences in searing, you-are-there detail, giving readers one of the most riveting depictions ever written of man and machine at war.

Warplane Hal Sundt, 2023-10-03 The A-10 is the Air Force's unlikely success story, an airplane designed to support the Army, and one that ground troops came to venerate. Originally conceived with the express purpose of destroying Soviet tanks, the Air Force only developed it to keep funding away from the Army’s response to the mission, the AH-56 Cheyenne helicopter. Inspired by the biography of a tank-busting German pilot in World War II, the engineering and design of the A-10 fell to Pierre Sprey, a precocious civilian who'd enrolled at Yale when he was just 15-years-old, and now, barely 30, was exiled to a Pentagon backwater with little, if any, supervision. The end result was one of the finest military aircraft ever built, a plane essentially constructed around a 19.5-foot, 4,000-pound cannon that fired 30mm depleted uranium bullets at a blistering rate. Looking like it was built from discarded airplane parts, it was probably the ugliest combat aircraft ever built, thus the “Warthog” appellation. But it was also an incredibly reliable ground attack aircraft, beloved by ground troops from Iraq to Afghanistan. Despite repeated attempts to replace it with stealth aircraft and drones, over 280 A-10s remain in service today, serviced by dedicated and imaginative engineers and maintainers, and defended by a fervent cohort of advocates descended from the Military Reform movement. This is the story of intra-service rivalries, Pentagon obsessions with speed and stealth over tactical simplicity, and an aircraft that shows no sign of obsolescence as it nears fifty years in service.

The Insurgents Fred Kaplan, 2013-01-02 A finalist for the Pulitzer Prize The inside story of the small group of soldier-scholars who—against fierce resistance from within their own ranks—changed the way the Pentagon does business and the American military fights wars. The Insurgents is the inside story of the small group of soldier-scholars, led by General David Petraeus, who plotted to revolutionize one of the largest, oldest, and most hidebound institutions—the United States military.

Their aim was to build a new Army that could fight the new kind of war in the post-Cold War age: not massive wars on vast battlefields, but “small wars” in cities and villages, against insurgents and terrorists. These would be wars not only of fighting but of “nation building,” often not of necessity but of choice. Based on secret documents, private emails, and interviews with more than one hundred key characters, including Petraeus, the tale unfolds against the backdrop of the wars against insurgents in Iraq and Afghanistan. But the main insurgency is the one mounted at home by ambitious, self-consciously intellectual officers—Petraeus, John Nagl, H. R. McMaster, and others—many of them classmates or colleagues in West Point’s Social Science Department who rose through the ranks, seized with an idea of how to fight these wars better. Amid the crisis, they forged a community (some of them called it a cabal or mafia) and adapted their enemies’ techniques to overhaul the culture and institutions of their own Army. Fred Kaplan describes how these men and women maneuvered the idea through the bureaucracy and made it official policy. This is a story of power, politics, ideas, and personalities—and how they converged to reshape the twenty-first-century American military. But it is also a cautionary tale about how creative doctrine can harden into dogma, how smart strategists—today’s “best and brightest”—can win the battles at home but not the wars abroad. Petraeus and his fellow insurgents made the US military more adaptive to the conflicts of the modern era, but they also created the tools—and made it more tempting—for political leaders to wade into wars that they would be wise to avoid.

Air Power Bill Gilbert, 2004-09 This winner of the Navy's Roosevelt Award for Excellence in Writing covers heroes and heroism in American flight missions since 1916 and includes 29 black and white photographs.

Aeronautical Engineering, 1989 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports (STAR) and International aerospace abstracts (IAA).

The Wingman Adventures Volume Two Mack Maloney, 2018-10-23 Hawk Hunter is America’s best hope—in the bestselling military adventure series by “the best high-action thriller writer out there today, bar none” (Jon Land). With nearly a quarter million copies sold, this high-octane series features Hawk Hunter, a fearless fighter pilot who saves the not-so-distant-future United States from the brink of all-out anarchy. Thunder in the East: The Soviet sneak attack crippled America, breaking the US into warring factions ruled by dictators, thugs, and thieves. In the western territories, democracy has survived—thanks to Maj. Hawk Hunter, the greatest fighter pilot of his time, and the Pacific American Air Corps. After narrowly stopping a Soviet ground invasion, Hunter vows to restore his beloved country—and he will begin by reclaiming Football City, formerly known as St. Louis, until it was captured by a criminal army from New Chicago. Only Hunter can break through its walls and lead his army onward to reclaim Washington, DC. The Twisted Cross: A new threat has emerged from the south. An army of neo-Nazis has seized control of the Panama Canal, and they’re armed to the teeth. Their hateful ideology may be decades out of date, but these jackbooted killers have firepower that is state-of-the-art. They’re going to need it . . . because the Wingman is coming. The Final Storm: The Soviet Union had nearly been defeated when the vice president of the United States revealed himself as a traitor. He deactivated the defense grid just long enough for the Russians to strike, reducing America to a battle-scarred wasteland. Fighter pilot Hawk Hunter rebuilt the country one dogfight at a time. Now he’s headed for the vice president’s compound in Bermuda, backed by a team of commandos, to bring America’s greatest traitor to justice, dead or alive. Freedom Express: After fighting off the Red Army invasion, Maj. Hawk Hunter and what remained of the country’s armed forces spent years rebuilding their nation. Only one territory was left deserted: the Southwest, now known as the Badlands. To reestablish the overland route between the eastern and western regions, a train of modern pioneers is sent across the desert. The train makes it safely, but when it arrives in Los Angeles, every passenger on board has vanished. To bring the fight to the bandits, Hunter trades in his F-16 for his own specially designed locomotive: a super-fortress on rails. The new Wild West is about to be tamed—Wingman-style.

The Oxford Handbook of Non-Synoptic Wind Storms Horia Hangan,Ahsan Kareem,2021-08-16 In different areas of the world, much of the damage due to wind is caused by non-synoptic, local wind storm events, such as tornadoes and downbursts. In North America the damage due to these winds is more than 65% of total wind damage, and there are no guidelines or code implementations to deal with such catastrophic events. As we enter the third decade of the twenty-first century, current research is in its first phase of addressing these types of events, from their characterization, simulation, and loading, to collapse-mode effects on buildings and structures, as well as socioeconomic implications. The need is clear to better understand non-synoptic local winds; properly simulate them; assess the difference in loading between these events and synoptic large-scale winds that have been part of the wind engineering practice for more than five decades; determine their statistics and associated risks; and apply this through guidelines, codes, risk mitigation, and adaptation responses to socioeconomic impact. The Oxford Handbook of Non-Synoptic Wind Storms, led by Dr. Horia Hangan and Dr. Ahsan Kareem, features nearly 30 chapters, contributed by an international panel of leading scientists, scholars, and engineers, that address these issues and stimulate thought, research, and responses to non-synoptic wind storm hazards in North America and worldwide. Together, these articles provide clear definitions of the problems to be tackled, offer a strategic framework for forward-looking research, identify the best-suited tools and methodologies to address the problems at hand, and suggest ways to maximize collaborative planning between the disciplines that will tackle these challenges.
