3D Modeling & Animation Magesh Chandramouli,2021-12-30 If I were still teaching introductory computer graphics, I would not hesitate to use this textbook as it has just the right amount of coverage of the topic for a semester course and is presented in a highly appealing manner to engage the reader. – Gary Bertoline, PhD, Distinguished Professor of Computer Graphics Technology, Purdue University, USA Graphics-based 3D modeling and animation are relevant not only in the motion picture and video game industries, but also in many other disciplines including creative arts, engineering, architecture, education, medicine, etc. Understanding the basics of 3D modeling and animation requires understanding some basic concepts in physics and math. While some books assume the readers' prior knowledge of these concepts, but 3D Modeling & Animation: A Primer

explains these important concepts in a visually engaging manner. This book is not just for university students, but for anyone with an interest in computer graphics modeling and animation. Using a Software-Agnostic approach, this book focuses on the modeling and animation concepts spanning across multiple software platforms. Employing a balanced approach that is neither too technical nor too artistic, this book instills the need for creativity and visual composition in animation. KEY FEATURES: • Uses a simple, clear, and concise approach to explain the basics of modeling and animation • Two hundred plus vibrant images to easily understand and appreciate complex concepts • Review questions at chapter ends to help readers better review the content AUTHOR: Magesh Chandramouli is a Professor of Computer Graphics Technology at Purdue University Northwest and is a Distinguished Visiting Faculty of Computer Graphics at Feng Chia University, Taiwan. He is currently serving as the Director of Programs of the Engineering Design Graphics Division of the American Society for Engineering Education. He was a Frederick Andrews Fellow at Purdue University, West Lafayette, where he completed his Ph.D. He received Master of Science from the University of Calgary, Canada, Master of Engineering from the National University of Singapore, and B.E. from College of Engineering, Guindy, India. He has received National and International awards for his scholarly accomplishments and has delivered invited lectures in reputed universities and research centers around the world.

Toys and Playthings John Newson, Elizabeth Newson, 2017-12-06 John and Elizabeth Newson were well known for their studies of child rearing, which have combined a rigorous research methodology with sympathetic insights into family life and a lively approach to scientific reporting. 'Path-breaking', 'brilliant', 'seminal', 'outstanding', 'fascinating', 'enthraling' and 'enchancing' are some of the

adjectives used by critics to describe their previous books. They now turn their attention to toys, the 'pegs on which children hang their play', a study for which they are uniquely qualified. Not only had they long experience in normal child development: they had been actively involved for many years in research and training in remedial play for disabled children, their research unit was a major influence in the phenomenal development of the toy libraries self-help movement, they designed for and advised the toy industry, and they had their own family-run specialist toyshop. With this background, it is not surprising that their book on toys and playthings is both informative and entertaining on many different fronts. Richly observant, it follows the child's development in play from using the mother or father as the 'first and best toy', through the exploratory and manipulative sequences, to the use of toys in ritual, symbolic or contemplative ways. Against this detailed understanding of 'ordinary' children's growth points in play, the Newsons and their collaborators examine the special needs of disabled children, with a firm emphasis on how parents can help. What is more, in providing an intensely practical guide for the parents and teachers of the disabled child, they draw out comparative insights which are enlightening and absorbing for those whose children do not have such urgent problems. Once again the Newsons share with the reader the viewpoints and preoccupations of research workers in the field. There is indeed a continual sense of 'work in progress', and nowhere more than in the chapter on using toys for developmental assessment, where the reader is given a hot line to a laboratory (i.e. playroom) notes used in their own research unit at the time in a welcome move away from the rigid test-bound assessment of 'special' children. The book is enriched by the authors' sharp awareness that the history of playthings has a far longer perspective than the history of child psychology. They are not basically interested in educational toys as such, but in all the objects, made or found, on which the child hones his skill, his reasoning powers, his imagination, his

emotions or his sense of humour. Fairground baubles, joke toys and poppy-head dolls are as much a part of this book as bricks, sorting boxes and teddy bears. In the Newsoms' own words: 'We hope that people who simply like toys as objects will find something in this book to interest them; we suspect, indeed, that liking toys will be what all readers, whatever their reason for opening the book, have in common'.

Sardarji and Other Stories Khwaja Ahmad Abbas, 2014 The lyrical prose of writer, journalist and film director Khwaja Ahmad Abbas (1914-1987) easily lends itself to short stories. In *Sardarji and Other Stories*, a captivating collection, the protagonists of each tale are portrayed grappling with realities imposed upon them by an unrelenting historical churning that compels them to revisit their relationships with their cultural, spatial and psychological moorings. Communal riots, poverty, abjection, love and longing or renewed hopes and nascent dreams make this collection an incisive and moving portrayal of the human condition. This Khwaja Ahmad Abbas collection includes some of the best short stories ever penned down by the author, journalist and film director. Each of the stories selected for this volume gives a glimpse into the mind and works of this legendary writer. Encompasses a variety of themes that readers can easily identify with. Includes the last interview with Abbas about his last film, *Ek Aadmi*.

Toy Story and the Inner World of the Child Karen Cross, 2022-12-30 *Toy Story and the Inner World of the Child* offers the first comprehensive analysis of the role of toys and play within the development of film and animation. The author takes the reader on a journey through the complex interweaving of the animation industry with inner world processes, beginning with the early history of film. Karen Cross explores digital meditations through an in-depth analysis of the Pixar Studios and the making of the *Toy Story* franchise. The book shows how the *Toy Story* functions as an outlet for exploring fears and anxieties relating to new technologies and industrial processes and the value of taking a psycho-cultural approach to recent controversies surrounding the film industry, particularly its cultural and sexual politics. The book is key reading for film and animation scholars as well as those who are interested in applications of psychoanalysis to popular culture and children's media.
