New Expressions in Origami Art Meher McArthur,2017-03-07 This origami art book features the work of 25 contemporary master folders who are among the most innovative origami artists working today. They are pushing the boundaries of origami vigorously in new directions in terms of style, scale, materials, subject and scope. This elite group includes: Joel Cooper Erik Demaine and Martin Demaine Paul Jackson Beth Johnson Michael G. LaFosse and Richard L. Alexander Robert J. Lang Linda Mihara Bernie Peyton Richard Sweeney And many more... The stunning photos and brilliant essays in this book demonstrate why origami is now an international art movement—largely through the efforts and artistic genius of a few contemporary masters. The trailblazing efforts of Japanese artist Akira Yoshizawa elevated the paper folding to an art form by showing how subtle shapes and figures could be created from a single sheet of paper though a variety of non-traditional folding techniques. Artists in other parts of the world—including the United States, France, England, China and Scandinavia—took Yoshizawa's cue and pushed these techniques further and further. The result has been the emergence of many new and surprising sculptural forms created through techniques such as wet folding, curved creasing, tessellating and the application of alternative materials besides paper.

Mind-Blowing Modular Origami Byriah Loper,2016-10-11 Modular origami is the latest craze in paper folding! These three-dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear wire frame approach, which results in a very complex-looking model that reveals the interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York, and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or shelf!
