Flora DK,2018-10-23 Let the experts at the Royal Botanic Gardens guide you around the beautiful and mysterious world that is the plant kingdom. From regulating the air we breathe to providing food, clothes, fuels, and medicines - plants are fundamental to our lives. Discover an extraordinary diversity of species, which includes a grass that grows a meter a day, roots that breathe air, and queen of the night cactuses whose rare blooms vanish before dawn. In a combination of art and science, Flora celebrates plants from majestic trees to microscopic algae, explaining how they germinate, grow, and reproduce. It presents species that have evolved to accommodate pollinating insects such as the foxglove, and plants that have adapted to flourish in even the most hostile of habitats. Pierre-Joseph Redoute in the 18th-century was described as the Raphael of flowers. Flora showcases his botanical paintings as well as those of Georg Ehret and others in this gorgeous visual celebration of plants through the ages. Whether you are a keen gardener, naturalist, or botany student, this beautiful book is a treat that will entice, inform, and amaze.

Small Pulp and Paper Mills in Developing Countries Jörg Becker, 1991 Seminar papers.

Rural Industrialization in China Jon Sigurdson, 2020-03-17 Small-scale industries in rural areas in China are today an essential element of regional development programs. This monograph analyzes two main development strategies. One involves technology choices in a number of industrial sectors, most of which were initiated during the Great Leap Forward in the late fifties. The scaling down of modern large-scale technology through a product or quality choice, combined with changes in the manufacturing processes, is discussed at some length for nitrogen chemical fertilizer and cement. The other approach is the integrated rural development strategy where a number of activities are integrated within or closely related to the commune system. This strategy includes industry as only one component of many instruments where improved public health, education, and improved agricultural technology contribute to achieving such policy objectives as increased employment and productivity.
