Resilience and Ageing Goulding, Anna,Davenport, Bruce,2018-12-19 Understanding how creative interventions can help develop social connectivity and resilience for older people is vital in developing a holistic cross-sector approach towards ageing well. Academics with a wide range of expertise critically reflect on how the built environment, community living, cultural participation, lifelong learning, and artist-led interventions encourage older people to thrive and overcome both challenging life events and the everyday changes associated with ageing. The book uses a range of approaches, including participatory research methods, to bring the voices of older people themselves to the foreground. It looks at how taking part in creative interventions develops different types of social relationships and fosters resilience.

Cinema as Weather Kristi McKim,2013-03-05 How do cinematic portrayals of the weather reflect and affect our experience of the world? While weatherly predictability and surprise can impact our daily experience, the history of cinema attests to the stylistic and narrative significance of snow, rain, wind, sunshine, clouds, and skies. Through analysis of films ranging from The Wizard of Oz to The Umbrellas of Cherbourg, from Citizen Kane to In the Mood for Love, Kristi McKim calls our attention to the ways that we read our atmospheres both within and beyond the movies. Building upon meteorological definitions of weather's dynamism and volatility, this book shows how film weather can reveal character interiority, accelerate plot development, inspire stylistic innovation, comprise a momentary attraction, convey the passage of time, and idealize the world at its greatest meaning-making capacity (unlike our weather, film weather always happens on time, whether for tumultuous, romantic, violent, suspenseful, or melodramatic ends). Akin to cinema's structuring of ephemera, cinematic weather suggests aesthetic control over what is fleeting, contingent, wildly environmental, and beyond human capacity to tame. This first book-length study of such a meteorological and cinematic affinity casts film weather as a means of artfully and mechanically conquering contingency through contingency, of taming weather through a medium itself ephemeral and enduring. Using film theory, history, formalist/phenomenological analysis, and eco-criticism, this book casts cinema as weather, insofar as our skies and screens become readable through our interpretation of changing phenomena.

Millions of Snowflakes Mary McKenna Siddals,1998-09-21 One little snowflake falls on my nose. It makes me shiver from my head to my toes. A little girl plays outside on a cold winter day, counting each snowflake as it falls softly to the ground. Bundled in her warmest snowsuit, she savors the snow, tasting each flake as it falls on her tongue, and makes snow angels. Simple rhyming text captures the joy of a winter afternoon while teaching basic counting skills. Exuberant pastel illustrations invite young readers to join the fun.

Isaac the Alchemist: Secrets of Isaac Newton, Reveal'd Mary Losure,2017-02-14 A surprising true story of Isaac Newton's boyhood suggests an intellectual development owing as much to magic as science. Before Isaac Newton became the father of physics, an accomplished mathematician, or a leader of the scientific revolution, he was a boy living in an apothecary's house, observing and experimenting, recording his observations of the world in a tiny notebook. As a young genius living in a time before science as we know it existed, Isaac studied the few books he could get his hands on, built handmade machines, and experimented with alchemy—a process of chemical reactions that seemed, at the time, to be magical. Mary Losure's riveting narrative nonfiction account of Isaac's early life traces his development as a thinker from his childhood, in friendly prose that will capture the attention of today's budding scientists—as if by magic. Back matter includes an afterword, an author's note, source notes, and a bibliography.

An Island Garden Celia Thaxter,2008-11 Celia Loughton Thaxter (1835-1894) was born in Portsmouth, NH. When she was four, her father became the lighthouse keeper on White Island in the Isles of Shoals. After resigning his post eight years later, he built a resort hotel on Appledore Island in Maine. The first of its kind on the New England coast, the hotel became a gathering place for writers and artists during the latter half of the 19th century. In her last year of life, Celia published this work, in which she lovingly describes her Appledore garden and its flowers. The flowers she grew in her cutting garden filled her own rooms and those of the hotel, and this work became famous for its descriptions of the old-fashioned flowers she grew there. Her island garden, a plot that measured 15 feet square, has been re-created and is open to visitors.

The Tragedy Paper Elizabeth Laban,2013-01-08 Perfect for fans of Thirteen Reasons Why and Looking for Alaska, Jennifer Weiner, #1 New York Times bestselling author, calls Elizabeth LaBan's The Tragedy Paper "a beguiling and beautifully written tale of first love and heartbreak." It follows the story of Tim Macbeth, a seventeen-year-old albino and a recent transfer to the prestigious Irving School, where the motto is "Enter here to be and find a friend." A friend is the last thing Tim expects or wants—he just hopes to get through his senior year unnoticed. Yet, despite his efforts to blend into the background, he finds himself falling for the quintessential "It" girl, Vanessa Sheller, girlfriend of Irving's most popular boy. To Tim's surprise, Vanessa is into him, too, but she can kiss her social status goodbye if anyone ever finds out. Tim and Vanessa begin a clandestine romance, but looming over them is the Tragedy Paper, Irving's version of a senior year thesis, assigned by the school's least forgiving teacher. Jumping between viewpoints of the love-struck Tim and Duncan, a current senior about to uncover the truth of Tim and Vanessa, The Tragedy Paper is a compelling tale of forbidden love and the lengths people will go to keep their secrets.

Albion's Seed David Hackett Fischer,1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Snowflake Bentley Jacqueline Briggs Martin,2020-10-20 In this Caldecott Medal-winning picture book, the true story of Wilson Bentley and his singular fascination with snowflakes is rendered in rich prose and gorgeous artwork, perfect for the holidays, snow days, and everyday. Wilson Bentley was always fascinated by snow. In childhood and adulthood, he saw each tiny crystal of a snowflake as a little miracle and wanted to understand them. His parents supported his curiosity and saved until they could give him his own camera and microscope. At the time, his enthusiasm was misunderstood. But with patience and determination, Wilson catalogued hundreds of snowflake photographs, gave slideshows of his findings and, when he was 66, published a book of his photos. His work became the basis for all we know about beautiful, unique snowflakes today. This biographical tribute to a very special farmer is the perfect holiday gift or snow day read.
