The Boy Who Harnessed the Wind William Kamkwamba,Bryan Mealer,2015-02-05

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

Power from Wind Richard Leslie Hills,1996-09-12 The wind is a fickle source of power. Windspeeds are frequently too low to be of any practical use, so that windpower has generally remained a marginal resource. Since the inception of windpower around 1000 AD, technology has been deployed to obtain the most economical power from wind. The author traces its technical evolution, concentrating on the growth in understanding of wind and charting crucial developments in windmill design. The history of the windmill is focused on North Western Europe, drawing on the origins of the first horizontal windmills in Persia, Tibet and China. Industrial applications such as in textiles, papermaking and mining are examined. Gradually, windmills were improved but were finally eclipsed by steam engines in the nineteenth century due to increased levels of industrialisation. The book concludes with a look at the recent re-emergence of windpower as a viable source of power in the wake of the energy crisis.

Mrs. Delany & Her Circle Yale Center for British Art,Sir John Soane's Museum,2009 At the age of seventy-two, Mary Delany, née Mary Granville (1700-1788), embarked upon a series of nearly a thousand botanical collages, or paper mosaics," which would prove to be the crowning achievement of her rich creative life. designs, made by a method of Mrs. Delany's own invention, vie with the finest botanical works of her time. More than two centuries later her extraordinary work continues to inspire. Although best known for these collages, Mrs. Delany was also an amateur artist, woman of fashion, and commentator on life and society in 18th-century England and Ireland.
